Pipeliners: Company Master Profile

Single source of truth for anyone (AI, writer, SEO specialist, new team member) working on Pipeliners. Built 2026-10-01 from everything on record: the owner's (Scott's) Oct 1 answers, the site's own published copy, GBP, GSC, the Keystone CRM, Google Ads, and four months of SEO work.

Status labels used below:

- ✅ = verified by Scott, Jake or Kim, or taken from the client's own published copy
- ⚠️ = present somewhere but NOT confirmed, so do not repeat it
- ❓ = not on record, so ask Scott

Structure: Company Master Profile → Brand Persona → Services → Customers → Locations → SEO → Competitors → Content Rules → Claims → Business Goals.

---

1. Basic company information

Field	Value
Company name	**Pipeliners**. The legal/brand form "Pipeliners USA" appears on older pages; new copy says **"Pipeliners"** only.
Website	https://pipelinersusa.com/
Industry	Plumbing, trenchless pipe rehabilitation
Business type	Specialist trenchless contractor: pipe lining and restoration, not a general plumber
Years in business	❓ Not on record. Do not invent a founding year.
Owner	Scott Vincent. Jake (field lead) approves service claims.
Main office	633 W 2nd Ave, Mesa, AZ 85210 ✅
License	Arizona ROC #362960 (from GBP and the site; ⚠️ Scott has not reconfirmed it is current)
Service area	Phoenix metro and Pinal County, 37 city pages (28 in Maricopa County, 9 in Pinal)
Phone for copy and meta	**(480) 535-6503** ✅ (the base number the site renders)
Other numbers	GBP (480) 447-5345. Pool swaps such as (480) 770-3098 and (623) 286-3774. These are GoHighLevel call tracking by design; never change or "fix" them.
Unknown number	(480) 969-7978 on Birdeye and the Ace DuraFlo installer list (❓ ask Scott who owns it)
Social	facebook.com/pipelinersusa, instagram.com/pipelinersusa, linkedin.com/company/pipeliners
Business hours	GBP lists 24 hours. ⚠️ Do NOT advertise 24/7 (see below).

Field	Value
Emergency / after hours	**Do not claim it.** Scott (Oct 1): they are booked out a couple of months.
Primary CTA	Call (480) 535-6503 / schedule a sewer camera inspection / request a free estimate (/contact/)

2. Products and services

Core services (the site's Services menu):

1. **Trenchless drain and sewer pipe lining (relining):** CIPP, epoxy-saturated liner, UV LED cured, jointless pipe.
2. **ePIPE restoration:** epoxy coating of water supply lines from the inside for pinhole leaks and corrosion. The coating is NSF/ANSI 61 certified for drinking water.
3. **Hydro jetting:** drain and sewer cleaning, done after a camera inspection ("we don't jet blind").

Supporting services (safe to describe):

- Sewer camera inspection (always the first step)
- Leak detection and leak locating (pressure testing, acoustic listening, thermal imaging ✅)
- Slab leak repair by lining the pipe ✅
- Root intrusion repair (cleaning, then lining)
- Cast iron, clay and Orangeburg sewer line restoration
- Permits pulled ✅

Residential vs commercial: primarily residential, with a commercial angle. ⚠️ Scott has not yet confirmed which commercial jobs they take; do not promise commercial scope.

Equipment and methods: sewer camera inspection, CIPP liners cured with UV LED light, ePIPE epoxy coating, hydro jetter, and pressure, acoustic and thermal leak locating.

Most profitable / priority to promote: trenchless drain lining and ePIPE (the paid landing pages /trenchless-drain-pipe-repair/ and /epipe-restoration/). About 15 of 63 recent lead calls asked specifically about relining. Hydro jetting is the entry service.

Services NOT offered (never write copy for these):

Not offered	Note
Full repipes	ePIPE restoration only. Existing repipe wording on the site stays as is; never ADD repipe claims.
Manhole lining	
Gas line work	
Pipe bursting	

Not offered	Note
Water heaters, faucets, toilets, showers, garbage disposals, sump pumps	The GBP lists some of these by mistake.
HVAC, water softeners, crawl spaces	
Pigging / industrial pipeline cleaning	
Kitec restoration	Do not claim it.

3. Ideal customers

- **Homeowners in older Valley homes:**
- Phoenix pre-1950 homes: clay and Orangeburg.
- Mesa 1950s-70s and Sun City 1960-78: cast iron.
- Copper homes with pinhole leaks.
- Slab-on-grade houses where a leak means breaking the floor.
- **Retirees and age-restricted communities:** Sun City, Sun City West, Sun Lakes, Youngtown. They own long-held homes, are averse to disruption and want the house livable during repair.
- **Larger lots and acreage:** Gold Canyon, Rio Verde, Carefree, Cave Creek, Fountain Hills. Long sewer or septic runs, rocky ground, landscaping they don't want trenched.
- **Realtors, home inspectors and buyers:** about 7 of the recent GBP leads were agents. "Sewer scope before you buy" is a planned content topic.
- **Property managers, HOAs, small commercial:** a secondary target, pending Scott's scope confirmation.

What triggers the call:

- a backup or slow drains that keep coming back
- sewer smell
- a camera inspection found roots, a belly or a crack
- a water bill spike or a pinhole leak
- a warm spot or water under the slab
- a home sale or inspection
- a monsoon-season backup
- a dig-and-replace quote that shocked them

4. Customer problems / pain points

1. **Recurring drain or sewer backups:** roots, bellied lines, buildup.
2. **Old pipes failing:** cast iron scaling and cracking, clay joints separating, Orangeburg collapsing.
3. **Tree-root intrusion.**
4. **Copper pinhole leaks from hard water** (Phoenix water is 10-17.6 grains per gallon).

5. **Slab leaks under the foundation.**
6. **Fear of excavation:** trenches through the yard, driveway, pool deck or slab floor.
7. **Fear of a big, open-ended bill.**
8. **Not knowing what's wrong:** they want a clear diagnosis before paying for repairs.
9. **Disruption:** having to move out, or losing water and drains for days.

5. Customer goals

- Fix it once, with a long-term fix and a written warranty.
- Avoid digging up the yard, the floors or the landscaping.
- Spend less than dig-and-replace.
- Understand the cause; see the camera footage.
- Keep living in the house during the work.
- Protect the home's value and pass a sale inspection.

6. Unique selling proposition

Why Pipeliners: a trenchless specialist. They inspect with a camera first, then restore the pipe from the inside, so no trench goes through the yard or slab. The work carries written warranties.

USP item	Detail	Status
Specialized expertise	Trenchless relining and ePIPE only; not a general plumber	✅
Warranties	**20-year transferable structural warranty on drain lining, 10-year on ePIPE, in writing**	✅
Lifespan	Drain liners rated 50+ years; ePIPE coating lasts 75+ years	✅
Savings	Up to 30% less than dig-and-replace	✅
Drinking-water safe	ePIPE coating NSF/ANSI 61 certified	✅
Technology	UV LED cured CIPP; camera inspection; pressure, acoustic and thermal leak locating	✅
Permits	Pipeliners pulls the permits	✅
Local	Mesa-based crew (W 2nd Ave), works the whole Valley and Pinal County	✅
Licensed	ROC #362960	⚠️ confirm still current
Insured	"Licensed & Insured" badge on the leak detection page	⚠️ not owner-confirmed

USP item	Detail	Status
"Only ePIPE installer in Arizona" / "licensed ePIPE partners"	appears on About Us, Maricopa, San Tan Valley	⚠️ unverified, do not repeat
Financing	appeared in older OTTO FAQ answers	⚠️ unverified, do not claim
Response time / 24/7 / same day		❌ do not claim
Guarantees ("All Work Guaranteed")		⚠️ unverified, do not repeat

7. Competitive positioning

Competitors seen in search and AI answers (research only; NEVER name or link them in published copy):

- **Trenchless and relining specialists:** NuFlow Phoenix, Why Repipe (whyrepipe.com), Pipe Restoration Inc, Pipeliner Pros, Pro Pipe Arizona, All Pipe Restoration, US Pipelining LLC, Pipe Masters AZ.
- **Drain and general plumbing:** Roto-Rooter, Mr. Rooter, Jetters N Drains, Hillside Plumbing, Urban Piping, Leaktronics (leak detection), plus many Valley plumbers bidding on the same terms.
- **The ePIPE product maker** (ACE DuraFlo) also lists other installers.

AI share of voice (Search Atlas, Jul 2026): Pipeliners 35.1 vs NuFlow 33.8, Why Repipe 33.1, ePIPE 31.8.

What competitors do well:

- The big brands dominate generic "near me" and "drain cleaning" results.
- Franchise city pages dominate local SERPs.
- Why Repipe owns repipe intent.

Where Pipeliners is different:

- Specialist, with camera-first diagnosis.
- Restores rather than replaces.
- 20/10-year written warranties.
- NSF-certified potable-water lining.
- Mesa-local crew.

Services competitors offer that Pipeliners doesn't: full repipes, water heaters, fixtures, gas, pipe bursting, 24/7 emergency service.

Pricing position: mid-to-premium specialist. The message is "less than dig-and-replace (up to 30%)", never "cheapest". Never state prices.

Geographic advantage:

- Mesa base for the East Valley and Pinal County.
- City pages use real local detail: utilities (EPCOR, Global Water, Liberty Utilities, Fountain Hills Sanitary District), soils, build eras.

8. Brand personality

Knowledgeable specialist, straightforward and honest, practical, local, trustworthy, calm. Technical, but explained in homeowner terms. Not salesy, not hype, not "emergency" urgency. Willing to say when lining is NOT the right answer.

9. Brand voice

Style: conversational and plain. Use short paragraphs and an answer-first opening. Use "we" for the company. Explain one technical term at a time.

Use:

- "We camera the line first, then recommend the repair that fits."
- "lining the pipe", "relining", "restoring the line from the inside", "no-dig", "without a trench across your yard"
- "Most jobs take a couple of days."
- "Up to 30% less than digging and replacing."

Avoid:

- "pipe lining" or "pipelining" as a noun (it reads like the brand name); "pipeline"; "pigging"
- "Pipeliners USA" in new copy
- em dashes
- "rooter"
- unverified local claims such as "expansive soil" unless they are verified for that city
- civics-lesson trivia like founding years
- AI-brief phrasing ("this guide maps practical decision criteria")
- prices

Never claim: see §17.

10. Company values

- Honest recommendations (inspect before quoting; say so when restoration won't work).
- Long-term solutions over quick fixes.
- Minimal disruption to the home and property.
- Customer education (show the camera footage, explain the cause).
- Quality workmanship backed in writing.

- Safety (drinking-water-safe materials, permits pulled).

11. Geographic identity

Primary city: Mesa (HQ).

Core metro cities (highest demand): Phoenix, Mesa, Tempe, Chandler, Gilbert, Scottsdale, Glendale, Peoria, Buckeye, Florence.

All 37 city pages:

- Anthem, Apache Junction, Avondale, Buckeye, Carefree, Casa Grande, Cave Creek, Chandler, Coolidge
- El Mirage, Florence, Fort McDowell, Fountain Hills, Gilbert, Glendale, Gold Canyon, Goodyear, Laveen
- Litchfield Park, Maricopa, Mesa, Paradise Valley, Peoria, Phoenix, Queen Creek, Rio Verde, Sacaton, San Tan Valley, Scottsdale
- Sun City, Sun City West, Sun Lakes, Superior, Surprise, Tempe, Tolleson, Youngtown

Counties: Maricopa and Pinal.

Jurisdiction notes:

- Fort McDowell (Fort McDowell Yavapai Nation) and Sacaton (Gila River Indian Community) are tribal nations, not towns.
- Laveen is in the City of Phoenix.
- San Tan Valley is unincorporated Pinal County.

Local conditions to write about (verified):

- **Very hard water:** City of Phoenix 2025 report, 172-302 ppm. It drives pinhole leaks and scale.
- **Extreme heat and dry soil;** caliche (safe Valley-wide).
- **Monsoon season (July-September):** backups and storm debris.
- **Subsidence and earth fissures** in Pinal County (San Tan Valley); use this instead of "expansive soil".
- **Aging pipe by build era:** Phoenix 1900s-40s clay/Orangeburg, Mesa 1950s-70s, Sun City 1960-78 cast iron.
- **Tree roots** in older neighborhoods.
- **Septic and long runs** in Rio Verde, Apache Junction, Carefree and Gold Canyon.
- **Utilities:** EPCOR (San Tan Valley), Global Water / Palo Verde Utilities (Maricopa sewer), Liberty Utilities (Gold Canyon), Fountain Hills Sanitary District.

Wrong-state traffic to ignore: Florence OR/SC/KY, Superior (Bohemia NY), Youngtown (Baytown TX), El Mirage (Rancho Mirage CA), Fountain Valley CA, Peoria IL. Always put "AZ" in city titles.

12. SEO identity

Primary service keywords (US monthly volume / keyword difficulty, Search Atlas):

Keyword	Volume / KD	Owner page
trenchless sewer repair	4,400	/trenchless-sewer-repair/
no dig sewer repair	5,400	CIPP post
trenchless pipe repair	3,600 / 13	ad page /trenchless-drain-pipe-repair/
cipp lining	4,400	
sewer pipe lining	2,400	
slab leak	3,808 / 22	
sewer camera inspection	8,100 / 18	planned hub
sewer cleanout	6,600 / 14	planned
main sewer line clog	1,900 / 21	/main-sewer-line-clog/
clay sewer pipe	1,223 / 21	
epoxy pipe lining	590-720 / 9	
hydro jetting sewer line	1,000 / 15	
sewer lateral repair	880 / 28	
relining cast iron pipe	590 / 7	
leak detection in Phoenix	292 / 5	

Location keyword patterns: "sewer line repair in [City], AZ", "trenchless sewer repair in [City], AZ", "[City] pipe break repair", "[City] water line repair", "[City] copper repipe" (repipe demand exists, but the existing wording is left as is).

Current wins:

- "florence pipe break repair" #1 in local Phoenix results
- "pipe lining near me" and "pipe lining companies" #1 (Search Atlas)
- "trenchless sewer repair mesa" #2 (via the map pack)
- "pipe relining vs replacement cost" at position 2
- "cipp pipe lining cost" at position 3

Biggest impression pages: /what-is-cipp/ (but position ~77, national), /glendale/, /phoenix/, /buckeye/, /mesa/, /how-plumbers-use-cured-in-place-pipe-lining.../, /reline-vs-replace.../.

Important service pages:

- /trenchless-drain-pipe-repair/ (paid ads page)
- /epipe-restoration/ (paid ads page)
- /hydro-jetting/
- /trenchless-sewer-repair/

- /epoxy-pipe-lining/
- /uv-cured-pipe-lining/
- /leak-detection-services-in-phoenix-arizona/
- /slab-leaks-phoenix/
- /services/
- /whole-house-repipe/ (paid ads page; leave as is)

Location pages: /<city>/ (flat URLs are canonical; /service-areas/<city>/ redirects to them). Hub: /services-areas/ (do not edit).

Blog categories: Trenchless (25), Pipe Repair (22), Plumbing Tips (23), Clogged Drain (28), Root Intrusion (26), Epoxy (27), Plumbing Upgrades, Pipeliners (21).

Cannibalization: keywords to avoid or route carefully

- **Lining vs replacement:** /reline-vs-replace-best-options-for-drain-and-sewer-pipes/ and /sewer-pipe-lining-vs-replacement-how-to-know-which-repair-is-right/ compete. Pick one owner page (Kim's decision).
- **CIPP:** /what-is-cipp/ vs /how-plumbers-use-cured-in-place-pipe-lining.../ vs /cipp-vs-traditional.../.
- **Owned by service pages:** do not target "trenchless pipe repair" (the ad page), "trenchless sewer repair", "hydro jetting" or "leak detection" with blogs.
- **Never target** gas line, water heater, pipe bursting, repipe or manhole terms.
- **Never use** "pipe lining" or "pipelining" in new focus keywords.

13. AEO / GEO topics (questions to own)

- What is trenchless sewer repair, and how does it work?
- What is CIPP / UV-cured lining? How long does a pipe liner last? (50+ years)
- Is lining cheaper than replacing a sewer line? (Up to 30% less; no prices.)
- Will you need to dig up my yard, driveway or floor?
- How long does trenchless repair take? (Most jobs take a couple of days.)
- Can a cast iron, clay or Orangeburg pipe be relined?
- What causes pinhole leaks in copper pipes in Phoenix? (Hard water.)
- Is epoxy pipe lining safe for drinking water? (NSF/ANSI 61.)
- What are the signs of a slab leak, and can it be fixed without breaking the floor?
- Can tree roots damage a sewer line, and how do you remove them?
- What is a bellied sewer line?
- What causes a sewer smell in the house?
- Hydro jetting vs snaking: which is right?
- When should a sewer line be replaced instead of lined?
- Should I get a sewer scope before buying a Phoenix home?
- Why does my sewer back up during monsoon season?

AI visibility baseline: 44/100 (Sep 29). Pipeliners ranks #1 on ePIPE questions, 0-20 on commercial trenchless questions, and 0 in Google AI Mode.

14. Sales information

- **Lead volume (Keystone CRM, 30 days to Sep 29):** 63 leads, 8 booked.
- Google Business Profile 23 (best channel)
- Organic search 5
- Google Ads 4-5
- Inspection partner 3
- direct/other ~20
- **Booked value examples:**
- GBP 30 days to Sep 12: 5 bookings, $27,590.
- Organic 30 days to Sep 12: 3 bookings, $17,600.
- Organic over 90 days: 4 bookings, $8,800.
- Roughly $2,200-$5,900 per booked job in these samples. ❓ Get the true average job value from Scott.
- **2026 year to date (Aug 19 meeting):** about $14k ads spend, about $252k estimates, about $57k closed.
- **High-value services:** sewer and drain relining, ePIPE whole-house restoration, slab leak repair.
- **Sales cycle:** inspection, then estimate, then scheduling. The crew is booked out a couple of months. ❓ Typical days from first call to signed job.
- **Estimate / inspection process:** sewer camera inspection first, then a repair recommendation and estimate. A free sewer inspection / free estimate offer runs on the landing pages.
- **Financing:** ⚠️ unconfirmed. Do not mention.
- **Primary CTAs:** "Schedule a sewer camera inspection", "Call (480) 535-6503", "Request a free estimate". Use one CTA per section; it closes every page.

15. Customer objections (and approved answers)

Objection	Approved answer direction
"Is trenchless repair expensive?"	It is usually up to 30% less than dig-and-replace once landscaping, concrete and restoration are counted. Never quote a price.
"Will you dig up my yard?"	No trench. Access is through existing cleanouts or a small access point.
"How long will it take?"	Most jobs take a couple of days; small jobs can be one day. NEVER "same day".
"Can my pipe even be lined?"	The camera inspection answers that. When lining isn't the right fix, we say so.
"Is it permanent?"	Liners are rated 50+ years with a 20-year written warranty; ePIPE 75+ years with a 10-year warranty.

Objection	Approved answer direction
"Is it safe for drinking water?"	The ePIPE coating is NSF/ANSI 61 certified.
"Can I stay in my house?"	Generally yes. ⚠️ Keep the wording general; no "water back the same day".
"Why not just repipe?"	Compare honestly: restoring the existing pipe vs replacing it. Pipeliners does not do full repipes.

16. Trust signals (only these may be referenced)

- **Google reviews:** 4.99 average (shows as 5.0), about 123-127 reviews, 100% replied. Birdeye 5.0 (~125).
- **Warranties:** 20-year drain lining, 10-year ePIPE, written and transferable ✅
- **Material certification:** NSF/ANSI 61 (ePIPE coating) ✅
- **Design life:** 50+ years for liners, 75+ years for ePIPE ✅
- **License:** ROC #362960 ⚠️ confirm still current
- **Permits pulled** ✅
- **Local office in Mesa** ✅
- **Mesa job video** on the leak detection page
- **Not available yet:** real case studies, before/after job write-ups, awards, associations. ❓ Ask Scott for 2-3 real job photos with summaries.
- **Do NOT use:** fabricated reviews or testimonials. The aggregateRating 4.9/122 in the city-page schema is not visible on the pages; leave it as is.

17. Claims and restrictions

Approved claims ✅

- 20-year drain-lining warranty; 10-year ePIPE warranty (written)
- Drain liners last 50+ years; ePIPE coating lasts 75+ years
- Up to 30% savings vs dig-and-replace
- ePIPE coating NSF/ANSI 61 certified for drinking water
- Epoxy-saturated liner cured with UV LED; jointless pipe
- Camera inspection before any repair
- Leak locating with pressure testing, acoustic listening and thermal imaging
- Slab leak repair by lining the pipe
- Pipeliners pulls the permits
- Most jobs take a couple of days

Prohibited claims ❌

- 24/7 or emergency service, or "available around the clock"

- Same-day service, or "water back the same day"
- Full repipes, manhole lining, gas line work, pipe bursting, Kitec restoration
- Any price or price range in new copy (leave existing ones alone)
- "Cheapest", "#1", "best in Arizona", "lifetime warranty", "guaranteed results"
- Financing (unconfirmed)

Unverified, do not repeat ⚠️

- "Only ePIPE installer in the state"
- "Licensed ePIPE partners"
- "All Work Guaranteed" / "Satisfaction Guaranteed"
- "Insured" (badge exists; not owner-confirmed)
- "Expansive soil" (unless verified per city)
- Pipe-material lifespans beyond the two above

Other restrictions

- Never name or link competitors.
- Never change phone numbers or tracking.
- Never invent reviews, jobs, statistics or local facts.

18. Content guidelines

Structure (blogs):

1. Answer-first "Quick answer" (40-60 words)
2. Key Takeaways
3. Question-style H2s (blue #1a446f)
4. One comparison table
5. FAQ accordion of 5-7 questions with FAQPage schema (`_pipeliners_faq_jsonld`)
6. Closing CTA

Length: blogs about 1,200-2,000 words; city pages 1,200-2,400 words of genuinely local content.

Focus keyword: one per page. Put it in the title (≤60 characters, ending "| Pipeliners"), H1, meta (≤160 characters, ending with a call line using 480-535-6503), first 100 words, one H2 and the answer block. Show the alignment table.

Internal links:

- 2-5 contextual links per 1,000 words, with descriptive anchors (never "here!").
- Every post links to at least one service page.
- Add 2 inbound links to each new post.
- City pages link to services and to neighboring cities only when it is relevant.

External sources: .gov, .edu or standards bodies only (EPA, NWS, City of Phoenix, USGS, NASSCO, NSF, ASTM, university extension). Each link must return 200 before insert and again before publish. No competitors.

CTA placement: an intro mention, a mid-article mention where natural, and a closing CTA section.

Schema:

- FAQPage on FAQ posts.
- Article/BlogPosting where enabled.
- Service + LocalBusiness (Plumber) on city pages, managed in OTTO.
- No fake reviews in schema.

Images:

- Real job photos first. Inside-the-pipe shots (cracks, liners, jetting debris) are best.
- AI images must look like Arizona (desert landscaping, stucco, tile roofs; no green lawns or basements), at 4-inch residential pipe scale, with no logos, text or fake shirt crests. Draw the cleanout straight up.
- Featured card 1600x774 in the house template.
- Descriptive alt text; no keyword stuffing.

Tone and reading level: plain homeowner English, about grade 7-8. Short sentences. No jargon without explanation. No em dashes.

Cadence: about 5 blogs a month per Scott; current plan is 1 new guide plus 1 refresh per week. Keep monsoon topics to a minimum.

19. Business goals

1. More qualified leads from organic search and Google Maps (GBP is already the #1 lead source).
2. Rank the trenchless lining and ePIPE service pages in the core metro cities.
3. Generate relining leads specifically (highest value).
4. Improve Google Maps / local pack visibility.
5. Reduce dependence on paid ads. Ads conversion tracking has been broken since late July, and organic currently brings only ~5 leads a month.
6. Build topical authority and AI-answer citations (baseline 44/100).
7. Possibly grow commercial work (pending Scott).

Current baseline:

- Organic clicks about 25-35 a month.
- 104 pages indexed.
- Mobile PageSpeed about 47-56 (LCP is the issue).
- Search Atlas Authority 17.

20. Priority hierarchy (for agents making decisions)

1. **Don't break anything.** Protect the homepage, ad landing pages, phone tracking and GBP. Show changes before they go live.
2. **Generate qualified leads:** clear CTA, camera-inspection offer, accurate claims.
3. **Rank the high-value services:** relining, ePIPE, slab leak, sewer repair by city.
4. **Improve local visibility:** city pages with real local detail, GBP signals (report only), citations.
5. **Build topical authority / AEO:** answer-first guides on the §13 questions.
6. **Brand awareness:** last.

When two goals conflict, the higher number loses. Accuracy beats volume, and an unverified claim is never worth the ranking.

Open questions for Scott (to complete this profile)

1. Founding year / years in business.
2. Is ROC #362960 current? Confirm "insured".
3. Average job value and typical time from first call to booked job.
4. Financing: offered or not?
5. Commercial scope: which jobs they take.
6. 2-3 real job photos and summaries (hydro jetting, drain lining, ePIPE).
7. Who owns (480) 969-7978.
8. "Only ePIPE installer in Arizona" / "licensed partner": true?
9. The correct GBP service list (remove services they don't offer).
