Summit Plumbing Pros (AZ) - Batch 2: General Plumbing City Hub Pages

Pre-implementation report (nothing changed on the live site)

Date: 2026-09-03. Prepared by TAG Marketing (Kim) with Claude.

Pages in scope: /general-plumbing-services-in-tempe/, /general-plumbing-services-queen-creek/, /general-plumbing-services-in-phoenix/, /general-plumbing-services-in-scottsdale/, /general-plumbing-services-in-mesa/, plus the parent /plumbing/ and, for overlap only, /general-plumbing-services-chandler/ and the homepage.

Tags: [VERIFIED] checked in a named source; [EVIDENCE-BASED] recommendation from verified data; [ASSUMPTION] stated working assumption; [CONFIRM] needs Kim, Scott, or Summit before going live.

Sources: Company Avatar (only business source of truth; the Product Marketing Context file does not exist), Search Console via Search Atlas (US, 2026-06-03 to 2026-09-01), OTTO export of 2026-09-02, the live site, stored WordPress and Elementor data, Google Business Profile record, official city and utility pages (section 6).

1. Executive summary

- [VERIFIED] These five pages plus the parent carry 16,245 impressions in three months and 3 clicks. Tempe alone has 14,128 impressions across 612 queries at average position 25. It is the single largest page on the site and it behaves like the whole company's "Tempe plumber" page.
- [VERIFIED] The Tempe page is taking the emergency demand that belongs to /emergency-plumber-in-tempe/: 2,186 emergency-intent impressions ("emergency plumber tempe az" 206, "24 hour plumber tempe" 109, "emergency plumbing tempe" 128) land on the general page while the emergency page has zero impressions in the same window.
- [VERIFIED] Outside Tempe and Queen Creek, these pages earn almost nothing non-branded: Phoenix 26 impressions on city-plumber queries, Scottsdale 11, Mesa 19. Their totals are brand searches ("summit plumbing pros", "summit plumbing pros reviews") and noise. The homepage owns brand (2,249 branded impressions) and also owns Mesa ("licensed plumber in mesa az" 336). The parent /plumbing/ page has an H1 of "Plumbing Service in Mesa, Arizona", so three URLs compete for Mesa.
- [VERIFIED] Mesa and Chandler are word-for-word identical apart from the city name (100 percent shared text). Every page uses the same eight service blurbs with the city swapped in; only the intro paragraph differs. Scottsdale has an empty heading ("Resolving Water Pressure Issues" with no text).
- [VERIFIED] OTTO is injecting content that Google treats as a violation risk: hidden keyword paragraphs (display:none) on Tempe, Scottsdale, and Queen Creek; a hidden outbound "Partners Links" block on the Mesa page linking to Aegis Plumbing, a competing plumber; ten Review schema entries on Tempe; and it rewrote a Tempe H2 into a phone link. Section 10 has the fix list. These need OTTO settings changes before the copy goes live, or the rewrite will be undermined.
- [VERIFIED] Photos are real Summit photos (DSC-series from 2024) but every one has empty alt text.
- [EVIDENCE-BASED] Recommended order: OTTO cleanup first (site-wide, one day), then the parent page, Tempe, Queen Creek, Mesa (with Chandler rewritten off its copy), Phoenix, Scottsdale.

2. Verified GSC baseline

Window 2026-06-03 to 2026-09-01, US. Same source and window as the Phase 1 report; totals match.

2a. Page totals

Page	Clicks	Impressions	CTR	Avg pos	Distinct queries (tool total)	Phase 1 match
/general-plumbing-services-in-tempe/	2	14,128	0.01%	25	612	Yes
/general-plumbing-services-queen-creek/	0	1,025	0%	45	88	Yes
/general-plumbing-services-in-phoenix/	0	560	0%	24	50	Yes
/general-plumbing-services-in-scottsdale/	1	328	0.3%	18	67	Yes
/general-plumbing-services-in-mesa/	0	204	0%	11	14	Yes
/general-plumbing-services-chandler/ (overlap check)	0	299	0%	38	18	Yes
/plumbing/ (parent)	0	120	0%	30	14	Yes
/ (homepage, overlap check)	51	3,623	1.4%	20	204	n/a
/emergency-plumber-in-tempe/ (overlap check)	0	0	-	-	0	Yes

[VERIFIED] Query rows are a filtered sample from the integration (Tempe's 612 rows were pulled in full; queries under 3 impressions were left out of the CSV). Full classified list: Summit-AZ-General-Batch2-GSC-Queries-2026-09-03.csv (386 rows).

2b. Query classes (impressions)

Page	City plumber (target)	Emergency intent	Generic near me	Generic plumber	Specific service	Branded	Irrelevant	Off-topic
Tempe	1,609 (28 q)	2,186 (37 q)	1,357 (24 q)	1,000 (19 q)	1,080 (58 q)	108	1,340 (43 q)	271 (boiler, commercial)
Queen Creek	266 (13 q)	10	0	0	7	73	167	2
Phoenix	26 (6 q)	0	0	1	0	383	143	0
Scottsdale	11 (2 q)	0	0	0	0	102	29	0
Mesa	19 (2 q)	0	0	2	0	173	3	0
Chandler	0	0	0	145 (7 q, "general plumbing repair/maintenance")	0	109	45	0
/plumbing/	0	0	0	0	0	94	22	0
Homepage	Mesa 456 (13 q)	0	0	0	0	2,249	71	5

2c. Top target queries

- Tempe: "plumber tempe" 499 @36, "plumber tempe az" 347 @46, "licensed plumber in tempe az" 240 @68, "plumbing repair tempe az" 159 @41, "plumbing services tempe" 117 @40, "plumbing service tempe" 72 @46, "plumbing repair tempe" 40 @38, "plumbing services tempe az" 33 @42, "plumbers in tempe az" 31 @51, "tempe plumbers" 31 @42, "residential plumbing tempe az" 26 @40, "tempe plumbing company" 18 @38, "plumbers tempe" 15 @19. Generic:

"plumber near me" 598 @21, "plumbing repair" 211 @21, "plumber" 182 @19, "24 hour plumber" 140 @12, "general plumbing needs" 156 @13, "general plumbing services" 89 @11.

- Queen Creek: "plumbing services queen creek" 102 @42, "plumbing repair queen creek az" 78 @39, "plumbing services queen creek az" 50 @46, "plumbing company queen creek" 47 @43, "plumbers queen creek" 27 @57, "plumber in queen creek az" 21 @57, "plumbers in queen creek" 20 @55, "plumbing repair queen creek" 18 @40, "plumbing companies queen creek" 18 @50, "plumbing contractor queen creek" 14 @51.
- Phoenix: "general plumber repairs phoenix" 6 @10, "general plumbers phoenix" 6 @15, "general plumbing phoenix" 4 @6, "general plumber phoenix" 4 @26, "full service plumbing company phoenix" 5 @26.
- Scottsdale: "general plumber repairs scottsdale" 10 @5, "plumbing repair scottsdale" 1 @98.
- Mesa: "general plumbing mesa az" 15 @12, "general plumbing mesa" 4 @11. Homepage takes "licensed plumber in mesa az" 336 @60, "best plumbers in mesa az" 21, "plumbing contractors mesa az" 15, "expert plumbing service mesa" 20 @8.

2d. Queries that must not influence the copy [VERIFIED]

- Other places named Summit or Tempe lookalikes: "summit plumbing" variants that are other companies (Summit Plumbing and Heating, Summit Plumbing Redding CA, Summit Plumbing Tulsa, Summit County), "temple plumbing", "emergency plumber halls", "fife 24 hour plumber" (47), "find a plumber in 19029" (45, a Pennsylvania ZIP), "best plumbing repair in 19029" (23), "24 hour plumber bisbee/sierra vista arizona", "general plumbing cave creek" (Cave Creek is outside the Avatar service area).
- Other companies: "jessup plumbing", "adelaideplumbingservices.com", "tiny plumber services", "arizona all service plumbing", "valley pro plumbing", "iconic plumbing services", "booth plumbing", "brown plumbing", "sweet dreams plumbing", "zoom drain tempe", "plumbingtempeaz.com", "www.mesa-plumbing.co".
- Off-topic services Summit does not list: boilers ("emergency boiler repair tempe" 59, "expert boiler services tempe arizona" 12, and 15 more), commercial plumbing (Avatar says residential), gas line repair, sump pumps, "water well repair", "advanced treatment unit installation".
- Neighborhood-level queries ("plumbing broadmor az", "plumbing daley park az", "plumbing gililland az"): real Tempe neighborhoods, but the Avatar lists cities only. Do not add neighborhood names to copy.

2e. Branded versus non-branded

[VERIFIED] Branded impressions: Tempe 108, Queen Creek 73, Phoenix 383, Scottsdale 102, Mesa 173, Chandler 109, parent 94, homepage 2,249. Phoenix, Scottsdale, Mesa, and the parent are majority-branded pages today. "summit plumbing pros llc reviews" alone is 620 impressions on the homepage at position 4 and 75 on Scottsdale at position 7: people are looking for reviews and landing on service pages that show none.

3. Hub versus city cannibalization

[VERIFIED] Three separate splits:

1. **Tempe general page versus Tempe emergency page.** The general page ranks for 37 emergency-intent queries (2,186 impressions, positions 12 to 32). The emergency page has zero queries. The general page's H3 "24/7 Emergency Plumbing Services in Tempe" and its "fast emergency service" paragraph are why. Owner decision: the emergency page (batch 4) should own emergency intent; the general page keeps one sentence and a clear link.
2. **Mesa: homepage versus /plumbing/ versus general Mesa page.** The homepage ranks for Mesa plumber queries (456 impressions across 13 queries). The parent /plumbing/ has the H1 "Plumbing Service in Mesa, Arizona" and OTTO's description "Mesa, AZ plumbing services". The general Mesa page gets 19 non-brand impressions. Owner decision: the homepage stays the brand page and the Mesa home-base page (Summit's office is in Mesa; that is legitimate). The parent becomes the East Valley service index. The general Mesa page targets "plumber in Mesa" and links up to the homepage for brand.

3 **Mesa versus Chandler copy.** Identical content. Chandler ranks only for "general plumbing repair/maintenance" generic queries (145 impressions at positions 43 to 77), not for Chandler. Owner decision: rewrite Chandler in this batch as a sixth page rather than leave a 100 percent copy live next to a rewritten Mesa.

[VERIFIED] Specific-service queries on the Tempe page (1,080 impressions across 58 queries: sewer 179 + 64 + 21, drain 75 + 58 + 50, water heater 29, toilet 12, water line 12) are landing on the general page instead of the Tempe service pages. That is expected for a hub, but each of those Tempe service pages should be linked from the general page with an exact anchor so Google can route the query.

Ownership map [EVIDENCE-BASED]:

Query group	Owner	Change
"plumber [city]", "plumbing services [city]", "plumbing repair [city]", "plumbing company [city]", "licensed plumber [city]"	General city page	Title, H1, intro, and one section built around "licensed plumber in [city]" with the ROC number
"emergency plumber [city]", "24 hour plumber [city]"	Emergency city page	General page keeps one sentence + link; remove the emergency H3 from the general template
"[service] [city]" (sewer, drain, water heater, leak, softener, pressure, fixtures, disposal)	Service city page	General page lists each service in one or two sentences with the exact-match link
"summit plumbing pros", "summit plumbing pros reviews"	Homepage (brand)	Add a visible reviews section with real Summit reviews to the homepage, not to city pages [CONFIRM which reviews]
Mesa plumber queries	Homepage + general Mesa page	Parent /plumbing/ drops Mesa from H1 and description
Generic "plumber near me", "plumber", "plumbing repair"	No page targets them	Location-relative; leave

4. Claim validation

Claim on the pages	Where	Support	Decision
24/7 emergency plumbing	All	Avatar: 24/7 emergency line; GBP "Emergency Plumbing"	KEEP as "24/7 emergency line", with a link to the emergency page
"fast, reliable, and professional", "we respond quickly"	All	Avatar key phrases include "fast" and "reliable"; no response-time data	REWRITE to "prompt" and "on time"; no time promises
"certified plumbers"	Queen Creek, Mesa, Chandler	Avatar: licensed, bonded, insured (ROC #338366); "certified" not stated	REWRITE to "licensed"
"unmatched professionalism and expertise", "top-quality", "Scottsdale's go-to plumbing experts", "one-stop shop"	QC, Mesa, Chandler, Scottsdale	Empty praise, no source	REMOVE
"advanced equipment / advanced technology / latest tools"	QC, Phoenix, Scottsdale	No equipment record	REWRITE to plain description of the work (camera inspection, electronic leak detection only if Summit confirms the tools) [CONFIRM]
"Your Home and Business" (commercial)	Phoenix H2	Avatar: residential company; homeowners, landlords, home-warranty customers	REMOVE "business"; say homeowners and rental owners
"slab leak repair ... a common issue in older homes"	QC, Phoenix	General statement, no source	REWRITE to "we find and repair slab leaks"

Claim on the pages	Where	Support	Decision
"Tempe's water conditions can lead to mineral buildup" / "Queen Creek's hard water" / "Mesa homeowners often deal with water quality concerns"	Tempe, QC, Mesa	Needs the city's published hardness figure	KEEP only with the section 6 figure and source; otherwise remove
"energy-efficient unit"	QC, Scottsdale	Generic product statement	KEEP as "help you choose a unit"
"drain line repair in Tempe ... fixes it without major digging"	Tempe	Avatar: trenchless pipe lining is the signature service	KEEP, anchor to /pipe-lining-tempe/
Free estimate, $20 coupon, financing	All	Avatar	KEEP
Water filtration system installation	All	Avatar: water softeners and filtration	KEEP
Garbage disposal repair and replacement (1/3, 1/2, 3/4 HP)	Phoenix, Scottsdale, parent	Avatar	KEEP
"Customer Reviews" heading with review widget	All	Widget content [CONFIRM it shows real Summit reviews, not the mixed Pipeliners feed]	KEEP only after confirmation
Same-day service	Not on these pages		n/a
Guarantee / warranty	Not on these pages		n/a

5. Keyword map

5a. OTTO suggestions review

Page	OTTO item	Decision	Reason
Tempe	Title "General Plumber in Tempe AZ" (deployed) vs OTTO rec "General Plumbing Services in Tempe, AZ"	Use neither; see section 7	The demand is "plumber tempe" and "plumbing repair tempe az", not "general plumbing services"
Tempe	H2 rewritten to "Expert Plumbing Services from Your Trusted Team in Tempe" as a tel link	Reject	Heading turned into a phone link; empty praise
Tempe	NLP term paragraph (hidden)	Reject and remove	Hidden text
Tempe	NLP FAQs: "How quickly can a technician reach my Tempe home?", "Do you provide same day plumbing solutions?"	Reject	Would create response-time and same-day claims
Tempe	NLP FAQs: "Can I get a free estimate?", "Are your services available throughout Tempe?", "Is Summit licensed?"	Accept the angles	Answerable from the Avatar
Queen Creek	Missing keywords "plumbing company queen creek", "plumbing services queen creek", "plumber queen creek", "plumber queen creek az"	Accept, in copy, not as a hidden module	These are the page's real target queries (266 impressions)
Queen Creek	Hidden missing-keywords module and NLP module	Remove	Hidden text

Page	OTTO item	Decision	Reason
Queen Creek	Heading "Call (480) 535-6174" (a pool number)	Replace with plain text and the default number	Pool number in a heading
Scottsdale	Hidden NLP module; heading "Call (480) 504-1428"	Remove; replace	Hidden text; pool number
Phoenix	Title rec adds "Pros"; description rec keeps "24/7 emergency repairs"	Accept title; rewrite description	
Mesa	Hidden "Partners Links: Aegis Plumbing"	Remove and disable the feature	Hidden link to a competitor
Parent	Title rec "Expert Plumbing & Drain Services in Arizona" (deployed) but description "Mesa, AZ plumbing services" and H1 "Plumbing Service in Mesa"	Align all three to East Valley	Mesa split
Parent	Link fix: /expert-drain-line-services/ should redirect to /drain-cleaning/	Accept if the URL returns 404 (checked below)	

5b. Ownership map

URL	Primary intent	Supporting queries shown by GSC	Do not target
/plumbing/	plumbing services in the East Valley (index of all services)	none today; brand only	Mesa in H1 or description
Tempe	plumber in Tempe, AZ (licensed, residential)	plumbing repair tempe az, plumbing services tempe, tempe plumbing company, plumbers in tempe az, residential plumbing tempe az	emergency, boiler, commercial, Fife, 19029
Queen Creek	plumber in Queen Creek, AZ	plumbing services queen creek (az), plumbing repair queen creek (az), plumbing company queen creek, plumbers queen creek, plumbing contractor queen creek	Cave Creek, gas line, advanced treatment unit
Phoenix	plumber in Phoenix, AZ	general plumbing phoenix, general plumber repairs phoenix, full service plumbing company phoenix	commercial, business, brand queries
Scottsdale	plumber in Scottsdale, AZ	general plumber repairs scottsdale, plumbing repair scottsdale	reviews queries (send to homepage)
Mesa	plumber in Mesa, AZ (home base)	general plumbing mesa az, plumbing repair mesa az (homepage today), plumbing contractors mesa az	brand
Chandler	plumber in Chandler, AZ	general plumbing repair, general plumbing maintenance (generic, will fade)	Mesa copy

6. City-page briefs

Local research: official city utility pages, water quality reports, EPCOR, and NWS, fetched 2026-09-03. [VERIFIED] mesaaz.gov, phoenix.gov, scottsdaleaz.gov, and chandleraz.gov were read directly. tempe.gov, queencreekaz.gov, and roc.az.gov blocked direct fetching and a bot check, so those facts come from the official domains' own search snippets and are marked "spot-check": open the URL in a browser before publishing. Sources with exact URLs are in 6h.

The general pages are city hubs, not service pages. Their job is to answer "who is a licensed plumber in [city], what do they fix, and what should I know about my city's water" and then route the reader to the right service page. Shared across pages: layout, coupon block, the service-list structure, the four-pillar "why Summit" block, and the CTA. Unique per page: intro, the local water section, the utility responsibility facts, the permit note, the FAQs, and every internal link.

6a. Tempe

- Primary keyword: plumber in Tempe, AZ
- Intent: homeowner or landlord who needs a licensed plumber for a repair now. Largest demand on the site: "plumber tempe" 499, "plumber tempe az" 347, "licensed plumber in tempe az" 240, "plumbing repair tempe az" 159, "plumbing services tempe" 117.
- Customer problem: needs someone licensed who will show up; also 2,186 emergency-intent impressions that belong on the emergency page.
- Verified local angle [spot-check, tempe.gov]: Tempe's water FAQ puts hardness at about 15 grains per gallon (range 6.4 to 18.1), with about 87 percent of supply from Salt River Project watersheds. Tempe's leak page tells residents that a leak in the service line means "you will need to contact a professional who specializes in service lines", and its WaterSmart program alerts customers to continuous use of six gallons per hour for 72 hours. Tempe offers a high-efficiency toilet rebate of 50 percent up to $75, up to two toilets per home.
- Confirmed Summit solution: licensed (ROC #338366, see section 12 item 1), bonded, insured; repairs, drains, sewer, trenchless lining, leak detection, water heaters, softeners, fixtures, disposals; 24/7 emergency line; free estimates; financing.
- Unique purpose: the Tempe hub. Own "plumber Tempe", route emergency intent to the emergency page, route service intent to the nine Tempe service pages.
- Claims to avoid: same-day, response times, boiler, commercial, neighborhoods (Broadmor, Daley Park, Gililland), "fast".
- CTA: free estimate; phone and form.

6b. Queen Creek

- Primary keyword: plumber in Queen Creek, AZ
- Intent: "plumbing services queen creek" 102, "plumbing repair queen creek az" 78, "plumbing company queen creek" 47, "plumbers queen creek" 27, "plumber in queen creek az" 21, "plumbing contractor queen creek" 14, all at positions 39 to 57.
- Customer problem: newer-home owner in a town where the water provider depends on the street, unsure who handles what.
- Verified local angle [spot-check, queencreekaz.gov]: the Town says water is provided "by a number of different companies, depending on where you live"; the Town's own Water Department serves about 40 square miles from about 20 groundwater wells; Town water contains 6 to 17 grains per gallon of hardness; the Town is "not responsible for damages caused by breakage or leaks to your pipes or plumbing fixtures"; the Town's home water audit page explains the plus sign on the meter's leak indicator; in 2023 the Town and EPCOR exchanged service areas. Free site assessments: conserve@queencreekaz.gov.
- Unique purpose: the only batch-2 page besides Tempe with real non-brand demand and page-4 positions to lift.
- Claims to avoid: Cave Creek, gas line repair, advanced treatment units, "certified", "unmatched".
- CTA: free estimate.

6c. Phoenix

- Primary keyword: plumber in Phoenix, AZ
- Intent: small today ("general plumber repairs phoenix" 6 @10, "general plumbing phoenix" 4 @6). Purpose is to be the credible hub for the strong Phoenix service pages (sewer Phoenix 1,763 impressions, emergency Phoenix 765).
- Verified local angle [VERIFIED, phoenix.gov]: the City of Phoenix 2025 Water Quality Report lists total hardness of 172 to 302 ppm, or 10 to 17.6 grains per gallon, and states that hard water "can cause some types of scaling in pipes and water heaters, and on plumbing fixtures such as faucets and showerheads". Phoenix Water Services states that issues from the street to the water meter are the city's responsibility and issues after the meter are the homeowner's. Phoenix's

permit exemption list says a plumbing permit is not required to replace an existing water heater in a one- or two-family home when a licensed contractor does it, and that fixing a leak needs no permit unless a concealed section of pipe is replaced. Phoenix offers up to $75 for a WaterSense toilet and up to $75 for a smart irrigation controller to city water customers in single-family homes.

- Unique purpose: hub; say plainly which part of Phoenix Summit serves [CONFIRM].
- Claims to avoid: "home and business", "advanced technology", brand queries in copy, Scottsdale or Glendale.
- CTA: free estimate.

6d. Scottsdale

- Primary keyword: plumber in Scottsdale, AZ
- Intent: "general plumber repairs scottsdale" 10 @5; the rest is brand and reviews. Hub for Scottsdale service pages (water softener Scottsdale 367 impressions, pipe lining Scottsdale 152).
- Verified local angle [VERIFIED, scottsdaleaz.gov]: Scottsdale Water's 2026 Water Quality Report (2025 testing) lists approximate hardness of 13 to 17 grains per gallon depending on area (south of Indian School Road 13 to 15 gpg; north of Indian School Road 13 to 17 gpg) and states the city does not treat for hardness because most residential use is outdoors. Scottsdale requires a permit for water heater replacement (homeowner or licensed contractor may obtain it) and lists "Plumbing for a water softener", "Replace water lines for single family residence", and "Sewer line repair" as permit items; repair or replacement of a fixture in the same location is exempt. Scottsdale's troubleshooting page: turn off all water, wait 30 minutes, and if the meter's sweep hand moved, something on the property is pulling water. Scottsdale discontinued its toilet rebate in 2023; do not mention one. Its smart irrigation controller rebate is up to $250.
- Unique purpose: hub; fix the empty heading; send reviews-seekers to the homepage.
- Claims to avoid: "go-to plumbing experts", "one-stop shop", "advanced technology", toilet rebate.
- CTA: free estimate.

6e. Mesa

- Primary keyword: plumber in Mesa, AZ (home city)
- Intent: "general plumbing mesa az" 15 @12; Mesa demand sits on the homepage ("licensed plumber in mesa az" 336).
- Verified local angle [VERIFIED, mesaaz.gov]: Mesa's 2025 Water Quality Consumer Confidence Report (issued 2026) says water in the City Zone averages about 12 grains per gallon of hardness and the Eastern and Southern Zones average 16 gpg, and it recommends setting a softener at 16 gpg and adjusting. Mesa's meter page tells customers that a leak "on your property beyond the meter" is theirs to fix and suggests contacting a plumber, and lists toilets, irrigation, water softeners, hose bibs, and pool autofill as common leak sources. Mesa requires no permit for a like-for-like gas or electric water heater replacement but does require one to switch a storage gas heater to a tankless gas unit, and requires a permit for installing or modifying plumbing systems. Mesa's utility emergency line is 480-644-2262.
- Unique purpose: the home-city page. Summit's office is at 950 W. Birchwood Ave, Ste 12, Mesa. Win "plumber in Mesa" without fighting the homepage for brand.
- Claims to avoid: "certified", "unmatched", anything shared with the Chandler clone.
- CTA: free estimate; "your Mesa neighbors".

6f. Chandler

- Primary keyword: plumber in Chandler, AZ
- Intent: today only generic "general plumbing repair/maintenance" (145 impressions, positions 43 to 77) because the copy is a Mesa clone.
- Verified local angle [VERIFIED, chandleraz.gov]: Chandler's 2025 Consumer Confidence Report lists total hardness of 173 to 288 mg/L, or 10.1 to 16.8 grains per gallon; the city's water FAQ gives an average of 16.5 gpg and says most manufacturers suggest flushing a water heater once a year with a softener and every six months without one. Chandler

states that plumbing up to and including the meter is the city's and everything after the meter is the homeowner's. Chandler's Homeowner's Building Permit Manual (April 2026) exempts like-for-like replacement of water heaters and water softeners from a permit, but not replacement or relocation of water supply, sewer, or drain piping, and requires rental owners to use a licensed contractor to pull permits. Chandler offers a smart irrigation controller rebate of 50 percent up to $250 and free water-efficiency site visits.

- Unique purpose: replace the clone with a page built on Chandler's own permit and water facts.
- Claims to avoid: neighborhoods (Sun Lakes, Ocotillo), "certified", "fast".
- CTA: free estimate.

6g. Facts not found (and therefore not used)

Official housing-stock age for Tempe, Mesa, Queen Creek, Chandler; a Tempe or Queen Creek water-heater permit rule; a Scottsdale water-meter responsibility statement; any monsoon-to-plumbing link on an official page. [VERIFIED] The Registrar of Contractors lookup could not be reached (bot check). A third-party listing shows ROC #338366 as "Specialty Residential, Active, expiration 05/31/2026". That date has passed. Section 12 item 1.

Reasons: demand is "plumber [city]" and "plumbing repair [city]", not "general plumbing services"; the new H1s are still exact service-plus-city phrases. Descriptions drop "fast", "expert", and "24/7 emergency repairs" wording and add the license number. Title lengths 46 to 57 characters. [ASSUMPTION] The "general plumbing [city]" queries (45 impressions across six pages) will follow since "plumbing" and the city stay in the title and H1.

8. Full proposed page copies

Rules for all six city pages:

- Keep: H1 position, coupon block, the three DSC photos (add alt text), the four-pillar "why Summit" block (Avatar wording), the request-estimate button, the appended related-links block.
- Remove: "Call (480) ..." and "Call Us Today!" H2s (become plain text), the eight keyword-repeating service paragraphs, the "Customer Reviews" H2 until the review source is confirmed, empty headings, all OTTO hidden modules.
- Rewrite: intro, service list with exact links, a local water section, a "who fixes what" utility section, FAQs, closing CTA.
- Voice: warm, neighborly, plain-spoken. Short paragraphs. No em dashes. Order on every page: problem, solution, benefit, trust, local, CTA.
- Phone stays as printed; GoHighLevel swaps it per visitor. No changes to forms, tracking, or the coupon block.

8a. Tempe (/general-plumbing-services-in-tempe/)

H1: Plumber in Tempe, AZ

When something in the house stops working, you do not want a research project. You want a licensed plumber in Tempe who answers the phone, shows up when they said they would, and fixes it right the first time.

That is the job Summit Plumbing Pros does for Tempe homeowners and rental owners. We are licensed, bonded, and insured (Arizona ROC #338366), we give a free estimate before any work starts, and we treat your home the way we would want ours treated.

[Coupon block unchanged]

H2: What we fix in Tempe homes

Most calls from Tempe are about one of these. Each has its own page with details, or just call and describe the problem.

- **Drains and clogs.** Slow sinks, backed-up showers, a toilet that keeps clogging. See drain cleaning in Tempe.
- **Sewer lines.** Backups in more than one fixture, sewage smells, wet spots in the yard. See sewer line repair in Tempe.

- **Trenchless pipe lining.** Our signature no-dig repair for damaged drain and sewer pipes. See trenchless pipe lining in Tempe.
- **Leaks and slab leaks.** A water bill that jumped, a warm spot on the floor, running-water sounds with everything off. See leak detection in Tempe.
- **Water heaters.** No hot water, not enough, or a tank that is leaking. See water heater repair and installation in Tempe or tankless water heater installation in Tempe.
- **Hard water.** Scale on fixtures, spotty dishes, appliances wearing out early. See water softener installation in Tempe.
- **Water pressure.** Weak showers or pressure that changes through the day. See water pressure repair in Tempe.
- **Toilets, faucets, and fixtures.** Repairs and new installs. See fixture installation in Tempe.
- **Garbage disposals.** Repair or replacement. See garbage disposal repair in Tempe.

If water is running where it should not be right now, call our 24/7 line or see the emergency plumber in Tempe page.

[Plain text:] Call (480) 447-7008 or request a free estimate online.

H2: Tempe water and your plumbing

Tempe's water utility puts local hardness at roughly 15 grains per gallon, which counts as hard water. That is why Tempe homes see white scale on faucets and showerheads, water heaters that lose efficiency, and softeners that need service. If you are deciding whether a softener is worth it, we will look at your fixtures and water heater and give you a straight answer, not a sales pitch.

Tempe also offers a rebate on high-efficiency toilets. We can install a WaterSense toilet and tell you what paperwork the city needs.

H2: Your pipes, the city's pipes, and who fixes what

The City of Tempe's leak guidance says that if the leak is in the service line on your property, you need a professional who works on service lines. That is us. If your meter's dial keeps turning with everything off, or the city's WaterSmart alert flags continuous use, call us and we will find where the water is going.

H2: Why Tempe homeowners choose Summit

- **We care.** Once we enter the home, we become family, and we treat you that way.
- **Affordable.** Fair, competitive pricing, free estimates on every job, financing available.
- **Professional and personable.** Skilled plumbers who explain the work in plain language.
- **Prepared.** Licensed, bonded, and insured. Arizona ROC #338366.

H2: Frequently asked questions

1. **Are you a licensed plumber in Tempe?** Yes. Summit Plumbing Pros holds Arizona ROC license #338366 and is bonded and insured. You can check any Arizona contractor on the Registrar of Contractors website.
2. **Is there a charge for an estimate?** No. Estimates are free on all work, and you see the price before we start.
3. **Do you handle plumbing emergencies in Tempe?** Yes. Our emergency line is open 24/7. For what to do while you wait, see the emergency plumber in Tempe page.
4. **Is Tempe water hard enough to need a softener?** The city's water FAQ lists hardness around 15 grains per gallon, which is considered hard. Whether a softener makes sense depends on your fixtures, water heater, and habits. We will tell you honestly.
5. **Do you work on rental properties in Tempe?** Yes. We work with homeowners, landlords, and home-warranty customers across Tempe.

CTA (H2): Ready when you are.

8b. Queen Creek (/general-plumbing-services-queen-creek/)

H1: Plumber in Queen Creek, AZ

Queen Creek is spread out, and so is its plumbing. Depending on your street, your water may come from the Town, from EPCOR, or from another provider. What does not change is that everything from your meter into your house is yours to maintain, and that is where Summit Plumbing Pros comes in.

We provide plumbing services in Queen Creek for repairs, installations, and the everyday problems that come with a busy household. Licensed, bonded, and insured (Arizona ROC #338366), with a free estimate before any work.

[Coupon block unchanged]

H2: What we fix in Queen Creek homes

- **Drains and clogs.** See drain cleaning in Queen Creek.
- **Sewer lines.** See sewer line repair in Queen Creek.
- **Trenchless pipe lining.** Our no-dig repair for damaged drain and sewer pipes. See trenchless pipe lining in Queen Creek.
- **Leaks and slab leaks.** See leak detection in Queen Creek.
- **Water heaters.** See water heater services in Queen Creek and tankless water heater installation in Queen Creek.
- **Hard water.** See water softener installation in Queen Creek.
- **Water pressure.** See water pressure repair in Queen Creek.
- **Toilets, faucets, and fixtures.** See fixture installation in Queen Creek.
- **Garbage disposals.** See garbage disposal repair in Queen Creek.

Active leak or backup right now? Call our 24/7 line or see the emergency plumber in Queen Creek page.

[Plain text:] Call (480) 447-7008 or request a free estimate online.

H2: Queen Creek water and your plumbing

The Town of Queen Creek draws its water from groundwater wells and reports hardness between 6 and 17 grains per gallon. On the high end of that range, scale builds on fixtures and inside water heaters. If your dishes spot, your showerhead crusts over, or your water heater rumbles, hard water is usually the reason, and a softener sized for your home solves it.

H2: Who fixes what in Queen Creek

The Town states that it is not responsible for damage from breaks or leaks in your own pipes and fixtures. Its home water audit page shows a simple check: with all water off, look for the plus sign on your meter's leak indicator. If it is there, water is moving somewhere on your property. Call us and we will find it. The Town also offers free water-use assessments through its conservation office if you want a second look at your usage.

H2: Why Queen Creek homeowners choose Summit

[Four pillars, as 8a.]

H2: Frequently asked questions

1. **Do you serve all of Queen Creek?** Yes. Queen Creek is part of our East Valley service area, along with neighboring San Tan Valley.
2. **Are you licensed in Arizona?** Yes. Arizona ROC #338366, bonded and insured.

3. **My water comes from EPCOR, not the Town. Does that matter?** Not for us. The provider owns the main and the meter; the pipes and fixtures on your side are the same job either way.
4. **How hard is Queen Creek water?** The Town reports 6 to 17 grains per gallon. We can test at your tap and tell you where your home falls.
5. **Is the estimate free?** Yes, on all work, before anything starts.

CTA (H2): Ready when you are.

Call (480) 447-7008 or request a free estimate online. [Button]

Internal links: the nine Queen Creek service pages (/drain-cleaning-services-queen-creek/, /sewer-line-repair-queen-creek/, /pipe-lining-queen-creek/, /water-leak-detection-queen-creek/, /water-heater-services-queen-creek/, /tankless-water-heater-installation-queen-creek/, /water-softener-installation-queen-creek/, /water-pressure-services-queen-creek/, /plumbing-fixture-installation-in-queen-creek/, /garbage-disposal-service-queen-creek/), /emergency-plumber-in-queen-creek/, /general-plumbing-services-san-tan-valley/ (anchor: San Tan Valley), /plumbing/.

8c. Phoenix (/general-plumbing-services-in-phoenix/)

H1: Plumber in Phoenix, AZ

Summit Plumbing Pros is a licensed residential plumber based in Mesa, and Phoenix is part of our East Valley service area. [CONFIRM: all of Phoenix, or the East Valley side including Ahwatukee.] Homeowners and rental owners call us for repairs, drains, sewer lines, water heaters, leaks, and fixtures, with a free estimate before any work.

[Coupon block unchanged]

H2: What we fix in Phoenix homes

[Nine-item list, Phoenix service pages, plus the emergency sentence linking to /emergency-plumber-in-phoenix/.]

[Plain text:] Call (480) 447-7008 or request a free estimate online.

H2: Phoenix water and your plumbing

The City of Phoenix's 2025 Water Quality Report lists hardness between 10 and 17.6 grains per gallon, and the city itself notes that hard water causes scaling in pipes, water heaters, faucets, and showerheads. That scale is behind a lot of the water heater and fixture calls we get from Phoenix. A softener, or simply flushing the water heater on schedule, keeps it in check.

Phoenix water customers in single-family homes can also get up to $75 back on a WaterSense toilet. We install them and can point you to the city's rebate page.

H2: Who fixes what in Phoenix

Phoenix Water Services is clear about the line: from the street to the meter is the city's responsibility, and everything after the meter is yours. If the meter is still running with the house shut off, the leak is on your side, and we will find it. Phoenix also does not require a permit to replace an existing water heater in a single-family home when a licensed contractor does the work, so that job stays simple.

H2: Why Phoenix homeowners choose Summit

[Four pillars.]

H2: Frequently asked questions

1. **Which parts of Phoenix do you serve?** [CONFIRM wording.]
2. **Are you licensed to work in Phoenix?** Yes. Arizona ROC #338366 is a state license, valid across Arizona.
3. **Do I need a permit to replace my water heater in Phoenix?** Phoenix exempts replacement of an existing water heater in a one- or two-family home when a licensed contractor does it. We handle it.
4. **How hard is Phoenix water?** The city's 2025 report lists 10 to 17.6 grains per gallon. That is hard water, and it is why water heaters here benefit from regular flushing.

5 **Do you charge for estimates?** No. Free on all work.

CTA (H2): Ready when you are. [Button]

Internal links: the Phoenix service pages, /emergency-plumber-in-phoenix/, /plumbing/, /sewer-line-repair-phoenix/ (the strongest Phoenix page, linked from the list).

8d. Scottsdale (/general-plumbing-services-in-scottsdale/)

H1: Plumber in Scottsdale, AZ

Scottsdale homeowners call Summit Plumbing Pros for the same reasons our East Valley neighbors do: a plumber who is licensed, shows up on time, explains the work, and leaves the house clean. We handle repairs, drains, sewer lines, water heaters, leaks, and softeners, with a free estimate before any work.

[Coupon block unchanged]

H2: What we fix in Scottsdale homes

[Nine-item list, Scottsdale service pages, plus the emergency sentence linking to /emergency-plumber-in-scottsdale/.]

[Plain text:] Call (480) 447-7008 or request a free estimate online.

H2: Scottsdale water and your plumbing

Scottsdale Water's 2026 Water Quality Report lists hardness of about 13 to 17 grains per gallon depending on where you live, and the city says plainly that it does not treat for hardness because most residential water goes outdoors. Inside the house, that hardness shows up as scale on fixtures and inside the water heater. It is the main reason water softener installation in Scottsdale is one of our most requested services here.

H2: Permits and who fixes what in Scottsdale

Scottsdale requires a permit to replace a water heater, and lists softener plumbing, water line replacement, and sewer line repair as permit work. Repairing or replacing a fixture in the same spot does not need one. As a licensed contractor we pull the permit and schedule the inspection for you.

If you suspect a leak, the city's own test is simple: turn off all water, wait 30 minutes, and see whether the meter's sweep hand moved. If it did, something on your property is using water, and that is where we start.

H2: Why Scottsdale homeowners choose Summit

[Four pillars.]

H2: Frequently asked questions

1 **Do you serve all of Scottsdale?** Scottsdale is part of our East Valley service area. [CONFIRM north Scottsdale coverage.]

2 **Do I need a permit to replace a water heater in Scottsdale?** Yes. Scottsdale requires one, and either the homeowner or a licensed contractor can obtain it. We take care of it.

3 **How hard is Scottsdale water?** The city's 2026 report lists roughly 13 to 17 grains per gallon depending on area.

4 **Does Scottsdale still offer a toilet rebate?** No. The city discontinued it in 2023. It does offer a smart irrigation controller rebate.

5 **Is the estimate free?** Yes, on all work.

CTA (H2): Ready when you are. [Button]

Internal links: Scottsdale service pages, /emergency-plumber-in-scottsdale/, /water-softener-installation-scottsdale/ (in the water section), /plumbing/.

8e. Mesa (/general-plumbing-services-in-mesa/)

H1: Plumber in Mesa, AZ

Summit Plumbing Pros is based in Mesa, at 950 W. Birchwood Avenue, Suite 12. When you call us for a plumber in Mesa, you are calling a company whose crews start their day a few miles from your house.

We handle repairs, drains, sewer lines, water heaters, leaks, softeners, fixtures, and disposals for Mesa homeowners and rental owners. Licensed, bonded, and insured (Arizona ROC #338366), free estimate before any work.

[Coupon block unchanged]

H2: What we fix in Mesa homes

[Nine-item list, Mesa service pages, plus Orangeburg pipe repair in Mesa, plus the emergency sentence linking to /emergency-plumber-in-mesa/.]

[Plain text:] Call (480) 447-7008 or request a free estimate online.

H2: Mesa water and your plumbing

Mesa's 2025 Water Quality Report says hardness averages about 12 grains per gallon in the City Zone and 16 grains per gallon in the Eastern and Southern Zones, and the city suggests starting a softener at 16 grains and adjusting from there. That hardness is why so many Mesa water heaters fill with sediment and why we recommend a flush at least once a year. If you are not sure which zone you are in, we can tell from your address.

H2: Who fixes what in Mesa

The City of Mesa's meter page puts it simply: a leak on your property beyond the meter is yours, and the city suggests calling a plumber. It also lists the usual suspects we find on Mesa leak calls: toilets, irrigation, water softeners, hose bibs, and pool autofill valves. If your meter keeps turning with everything off, call us.

Permits in Mesa are straightforward: a like-for-like water heater swap needs none, while switching a gas storage heater to a gas tankless unit does. We handle the permit when one is required.

H2: Why Mesa homeowners choose Summit

- **Your Mesa neighbors.** Our office is on West Birchwood Avenue.
- **We care.** Once we enter the home, we become family.
- **Affordable.** Fair pricing, free estimates, financing available.
- **Prepared.** Licensed, bonded, and insured. Arizona ROC #338366.

H2: Frequently asked questions

1. **Where is Summit Plumbing Pros located?** 950 W. Birchwood Ave, Suite 12, Mesa, AZ 85210.
2. **How hard is Mesa water?** About 12 grains per gallon in the City Zone and 16 in the Eastern and Southern Zones, per the city's 2025 report.
3. **Do I need a permit to replace my water heater in Mesa?** Not for a like-for-like gas or electric replacement. You do for a switch from a storage gas heater to a gas tankless unit. We handle it either way.
4. **The city said the leak is on my side of the meter. What now?** Call us. We locate the leak, show you what we found, and give you a free estimate for the repair.
5. **Do you offer emergency service in Mesa?** Yes, 24/7. See the emergency plumber in Mesa page.

CTA (H2): Ready when you are. [Button]

Internal links: Mesa service pages, /orangeburg-pipe-repair-in-mesa-az/, /emergency-plumber-in-mesa/, /plumbing/, homepage once (brand).

8f. Chandler (/general-plumbing-services-chandler/)

H1: Plumber in Chandler, AZ

Chandler homeowners and landlords call Summit Plumbing Pros for a licensed plumber who does the job to code, pulls the permit when the city requires one, and gives a free estimate before any work. We are licensed, bonded, and insured under Arizona ROC #338366.

[Coupon block unchanged]

H2: What we fix in Chandler homes

[Nine-item list, Chandler service pages, plus the emergency sentence linking to /emergency-plumber-in-chandler-az/.]

[Plain text:] Call (480) 447-7008 or request a free estimate online.

H2: Chandler water and your plumbing

Chandler's 2025 Consumer Confidence Report lists hardness of 10.1 to 16.8 grains per gallon, and the city's water FAQ puts the average at 16.5. The same FAQ passes on the manufacturers' advice: flush your water heater once a year if you have a softener and every six months if you do not. We do water heater flushes, softener installs, and the repairs that hard water eventually causes.

H2: Permits and who fixes what in Chandler

The City of Chandler states that plumbing up to and including the meter is the city's, and everything after the meter is the homeowner's. Chandler's Homeowner's Building Permit Manual exempts like-for-like replacement of water heaters and water softeners from a permit, but replacing or relocating water supply, sewer, or drain piping is not exempt, and if you rent the home out, a licensed contractor has to pull that permit. That is one reason landlords in Chandler work with us.

H2: Why Chandler homeowners choose Summit

[Four pillars.]

H2: Frequently asked questions

1. **Do I need a permit for plumbing work in Chandler?** Not for a like-for-like water heater or softener swap. Yes for replacing or relocating water, sewer, or drain piping. We handle the permit.
2. **I own a rental in Chandler. Can I pull the permit myself?** Chandler's permit manual says a licensed contractor must obtain permits for homes you lease or rent. We are licensed, so we take care of it.
3. **How hard is Chandler water?** About 16.5 grains per gallon on average per the city's water FAQ.
4. **How often should I flush my water heater in Chandler?** The city's FAQ cites manufacturers: yearly with a softener, every six months without.
5. **Is the estimate free?** Yes, on all work.

CTA (H2): Ready when you are. [Button]

Internal links: Chandler service pages, /emergency-plumber-in-chandler-az/, /plumbing/.

8g. Parent /plumbing/ - targeted edits

- H1 -> "Plumbing Services in the East Valley".
- Intro rewritten: "Summit Plumbing Pros is a licensed residential plumber based in Mesa, serving Mesa, Gilbert, Chandler, Tempe, Queen Creek, San Tan Valley, Apache Junction, Fountain Hills, Scottsdale, and Phoenix. Pick a service below, or find your city."
- New H2 "Find a plumber in your city" with ten links (Plumber in Mesa, Plumber in Gilbert, and so on) to the general city pages.
- Service cards: keep; change the drain-line card link from the redirecting /expert-drain-line-services/ to /drain-cleaning/; rewrite the two one-line placeholder cards (water pressure systems, water filtration) with a real sentence each.
- Remove the duplicated bottom block (intro H3, coupon, and phone H2 appear twice).
- Demote "Call Us Today!" and phone H2s to text.
- OTTO: title and description per section 7 (drop Mesa).

9. Internal-linking matrix

[VERIFIED] All 14 parent-page service links return 200 except /expert-drain-line-services/, which 301-redirects to /drain-cleaning/ (update the link to the final URL). All city service pages linked below exist and return 200 (checked 2026-09-03).

From	To	Anchor text	Rule
Each city page, emergency sentence	/emergency-plumber-in-[city]/	emergency plumber in [City]	Only in the one emergency sentence; removes the emergency cannibalization
Each city page, service list	/drain-cleaning-services-[city]/	drain cleaning in [City]	One link per service, exact match to the destination
Each city page, service list	/sewer-line-repair-[city]/	sewer line repair in [City]	
Each city page, service list	/pipe-lining-[city]/	trenchless pipe lining in [City]	
Each city page, service list	/water-leak-detection-[city]/	leak detection in [City]

Each city page, service list	/garbage-disposal-service-[city]/	garbage disposal repair in [City]	
Each city page, first mention	/plumbing/	all plumbing services	Parent
Each city page, "why Summit" block	/ (homepage)	Summit Plumbing Pros	Brand link, once
Mesa page	/slab-leaks/	slab leak repair	Site-wide slab page; keep the existing link
Parent /plumbing/	all ten general city pages	Plumber in [City]	New "Where we work" section; today the parent links to no city page
Parent /plumbing/	/drain-cleaning/	drain cleaning	Replace the redirecting /expert-drain-line-services/ link
Homepage	none added in this batch		Homepage is out of scope; note only that it should carry the reviews section
Removed	"Call (480) 447-7008" H2s, "Call Us Today!" H2s		Headings, not links; demote to text

Related-links block appended by the server plugin: on general pages it prints "General Plumbing Services in other cities" (up to 12) and "Other Services in [City]" (up to 10). The second list already provides most of the service links above, but with generic anchors ("Drain Cleaning Services"). [EVIDENCE-BASED] Keep the plugin block; the in-copy links above add the city-specific anchors Google needs. When Scott trims the block (batch 1 recommendation), the general pages are the ones that should keep the full "Other Services in [City]" list because they are the city hubs.

10. Technical, OTTO, and schema fixes

Item	Finding [VERIFIED]	Fix	Owner
Hidden keyword text	OTTO injects `<p style="display:none" class="otto-nlp-module">` keyword lists on Tempe, Scottsdale, Queen Creek, and an `otto-missing-keywords-module` on Queen Creek. Hidden text stuffed with keywords.	Turn off OTTO's NLP terms and missing-keywords deployment for this site, or at minimum for all local pages. Put the accepted Queen Creek keywords into visible copy instead (section 8).	OTTO settings (Kim)
Hidden competitor link	Mesa page carries `<div class="otto-community-backlink" style="display:none">Partners Links: Aegis Plumbing</div>` linking to aegisplumbingaz.com. Only page on the site with it (checked all 122 local pages).	Disable OTTO's community backlink / link-exchange feature and recrawl. A hidden link to a competing plumber is a link-scheme signal and sends equity to a competitor.	OTTO settings (Kim) [CONFIRM Summit did not knowingly agree to a link exchange]
Review schema	OTTO injects ten Review entries (Kathleen Griffin, Megan Thompson, and others naming Brian and Christian) into the Tempe page's schema. These look like real Summit reviews, but self-serving review markup on a service page is not eligible for rich results and inflates the schema.	Remove Review markup from local pages. If Summit wants review schema, put it once on the homepage and only for reviews Summit confirms.	OTTO (Kim) [CONFIRM]
Schema bloat	Tempe: 94 "Thing" entities, 11 Organization, 10 Person, 3 Plumber blocks; Queen Creek 64 Thing; Scottsdale 73 Thing. From OTTO's semantic "mentions" feature.	Turn off OTTO semantic/knowledge-graph mentions on local pages. Keep one Plumber block (the server plugin's, which carries areaServed) plus Service and BreadcrumbList.	OTTO / Scott
Heading rewritten to phone link	OTTO changed a Tempe H2 to `<a href="tel:...">Expert Plumbing Services from Your Trusted Team in Tempe</a>`.	Reject the heading suggestion in OTTO; after the rewrite the heading no longer exists.	OTTO
Pool phone numbers in headings	Queen Creek H2 "Call (480) 535-6174", Scottsdale H2 "Call (480) 504-1428" (pool numbers captured at crawl time). Phoenix/Tempe/Mesa show the default number.	Demote all phone headings to styled text; the pool script keeps swapping the visible number. No change to the number itself (Kim's decision).	Elementor
Heading order	7 to 9 H2s per page, several of them phone numbers or "Call Us Today!"; Scottsdale has an empty H3 "Resolving Water Pressure Issues"; Mesa/Chandler H1 has a double space ("General Plumbing").	Rewrite gives each page one H1, 6 to 8 real H2s, H3s under the service list. Fix the double space.	Elementor
Duplicate pages	Mesa and Chandler are identical apart from the city name (100 percent).	Rewrite both in this batch.	Elementor
Images	2 to 3 real Summit photos per page (DSC03552, DSC03480, DSC03690), all with empty alt text; the parent has none.	Add alt text describing what is in the photo plus "Summit Plumbing Pros"; do not add a city name to the alt unless the photo was taken there [CONFIRM where the three photos were taken].	Elementor

Item	Finding [VERIFIED]	Fix	Owner
Titles	Tempe "General Plumber in Tempe AZ" (49); Queen Creek and Phoenix 62; Scottsdale 60; Mesa 55; parent 66.	New titles in section 7, all 60 or under.	OTTO
Canonical, robots, indexability	All self-canonical, indexable, in sitemap, 200.	None	
City slug redirects	/tempe-plumbing/, /scottsdale-plumbing/, /gilbert/, /queen-creek/, /phoenix/ 301 to the general pages. /mesa/ and /chandler/ return 404.	Add 301s for /mesa/ and /chandler/ to their general pages for consistency (low priority).	Redirection plugin (Kim)
Parent link to redirecting URL	/expert-drain-line-services/ 301s to /drain-cleaning/.	Update the button link.	Elementor
FAQ	No FAQ section on any general page (10 general pages are the only local pages without one).	Add five FAQs per page (section 8); the server plugin will pick them up for FAQPage schema after the cache is cleared.	Elementor + WP-CLI

11. Backups completed

[VERIFIED] Created 2026-09-03 before any change for all seven pages (IDs 549 Tempe, 801 Queen Creek, 551 Phoenix, 550 Scottsdale, 548 Mesa, 1864 Chandler, 17 parent).

Server: /home/u2010-5ezyjnlrxgnr/faqjob/backup_batch2_general_2026-09-03/ (9.4 MB)

Local: C:\TAG Marketing Claude\Summit Plumbing Pros\backups\backup_batch2_general_2026-09-03\ (42 files)

Per page: .post.json, .post_content.html, .elementor_data.json, .postmeta.tsv (all postmeta incl. OTTO title/description/keywords/structured data and _summit_faqs_cache), .live_otto.html (public render with OTTO injections, including the hidden modules and backlink as evidence), .raw_wp.html (OTTO bypassed).

OTTO deployments for all 122 pages: Summit-AZ-Local-Pages-OTTO-Meta-2026-09-02.csv and the OTTO export sheet of 2026-09-02.

Homepage and emergency pages were read only; nothing was written anywhere.

12. Items requiring client confirmation

1. **License status.** Every proposed page states "Arizona ROC #338366". The Registrar of Contractors lookup could not be reached (bot check), and a third-party listing shows an expiration date of 05/31/2026, which has passed. Confirm the license is active and its current expiration at https://roc.az.gov/contractor-search before any page goes live. If it lapsed, remove every license claim until it is renewed.
2. OTTO features: approval to turn off NLP term injection, missing-keyword modules, community backlinks, semantic mentions, and Review schema on local pages. This is the single most important item in this batch.
3. Did Summit agree to a link exchange with Aegis Plumbing? If not, the hidden link should go immediately.
4. Which Google reviews may be shown and where (homepage reviews section)? The connected feed mixes Pipeliners USA reviews with Summit's.
5. Does Summit serve commercial properties at all? The Avatar says residential; the Phoenix page says "home and business".

6 Leak detection equipment: may the copy say "electronic leak detection" or "camera inspection"? Otherwise it stays as "we locate the leak".

7 Where were the three DSC photos taken (for alt text)?

8 City water hardness: the copy uses the figures from each city's published water quality report (section 6). Confirm Summit is comfortable citing the city reports.

9 Redirects for /mesa/ and /chandler/ (optional).

13. Recommended implementation order

1 OTTO cleanup (site-wide, one sitting): disable the five injection features in section 10, recrawl the seven URLs, verify the hidden modules and the Aegis link are gone on the live HTML.

2 Parent /plumbing/: H1, description, "Where we work" city links, fix the drain-line link.

3 Tempe (largest page; emergency H3 removed, links to the Tempe emergency page added).

4 Queen Creek (highest non-brand upside after Tempe).

5 Mesa, then Chandler in the same sitting (so the duplicate never coexists with the rewrite).

6 Phoenix.

7 Scottsdale.

8 After each save: clear _summit_faqs_cache, purge SiteGround cache, verify one FAQPage block, the page stylesheet, mobile layout, and that no display:none OTTO module reappears.

9 OTTO: update seven titles and descriptions, recrawl.

10 Search Console: request indexing for the seven URLs the day they go live.

All within one week of approval so the tracking windows align with batch 1.

14. Tracking plan

Baseline recorded in section 2. Publish dates to be recorded per page.

Check point	Check	Pass signal
Day 14	Seven URLs indexed; hidden OTTO modules absent on live HTML; Tempe emergency-intent impressions starting to move to /emergency-plumber-in-tempe/; Queen Creek target queries appearing above position 40	No new coverage issues; emergency page above zero impressions
Day 28	Clicks, impressions, CTR, position per page versus baseline; Tempe target queries ("plumber tempe", "plumber tempe az", "plumbing repair tempe az") position; Queen Creek target set; brand share on Phoenix/Scottsdale/Mesa falling as non-brand rises	Tempe clicks above 2; Queen Creek first clicks; Chandler no longer ranking for generic "general plumbing repair" only
Day 60	Same, plus whether the parent ranks for any East Valley or Arizona plumbing query and whether Mesa demand is split cleanly between homepage (brand + Mesa) and the Mesa page	Average position improves on 5 of 7; Tempe target queries into the top 20

Method identical to batch 1: same Search Atlas GSC pulls, US, comparable 28-day windows, query classification re-run so brand, noise, boiler, commercial, and out-of-area queries stay out of the judgment.
