FINAL THOUGHTS

APPENDIX: ADDITIONAL RESO...

MODULE 5: LOCAL SEO IN THE AI ERA

REPEAT AFTER ME:

Local SEO is the most defensible moat in search. AI can't replicate a physical location and real customer relationships.

While everyone chases national keywords and AI citations, local SEO quietly prints money with less competition and higher intent traffic. I've built multiple 7-figure businesses on the back of local SEO—LocalRank.so alone does $60-90k MRR helping agencies dominate local search.

This isn't theory. This is the exact system we use to rank local businesses in 30 days or less.

🎯 Learning Objectives

By the end of Module 5, you will:

- Master Google Business Profile optimization specifically for AI Overviews
- Understand how local citations work in the LLM era and why they matter more than ever
- Create local content that ranks in both traditional AND AI search
- Implement NAP consistency at scale using data aggregators

- Execute local link building tactics that actually move the needle
- Identify AI Overview triggers for local queries and optimize for them
- Deploy real case studies with actual revenue numbers

5.1 Why Local SEO Dominates in the AI Era

The Data That Matters:

Local SEO isn't just surviving the AI transition—it's thriving. Here's why:

- **76%** of people who search for something nearby visit a business within a day
- **28%** of those searches result in a purchase
- Google's AI Overviews show local results for **63%** of location-based queries
- ChatGPT recommends local businesses when asked "best [service] near me"
- Voice search (Alexa, Siri, Google Assistant) defaults to local results

My Local SEO Results:

I don't teach what I haven't done. Here's what local SEO has built for me:

- **LocalRank.so**: $60-90k MRR, 500+ agency clients, 5,000+ businesses
- **Personal consulting**: $5-10k per month advising multi-location brands

- **Agency referrals**: 30% of Indexsy's revenue comes from local SEO clients

The reason I keep doubling down on local? **It's the only SEO play with real barriers to entry.**

Anyone can publish content and build links. But you can't fake a physical address, real customer reviews, and years of local reputation. AI models recognize this—they prioritize local businesses with genuine signals over thin affiliate sites trying to game national keywords.

5.2 Google Business Profile Optimization for AI Overviews

Google Business Profile (GBP) is your most important digital asset for local SEO. In 2026, it's also your primary gateway into AI Overviews for local queries.

The GBP Optimization Framework:

Step 1: Complete Profile Foundation

Business Name

- Use your exact registered business name
- Don't keyword stuff (Google will suspend you)
- If you have multiple locations, use format: "Brand Name - [Neighborhood/City]"

- Primary category: Be specific ("Personal Injury Attorney" beats "Lawyer")
- Secondary categories: Add up to 9 relevant categories

- Research competitors' categories using GMB Everywhere extension
- Change categories seasonally if needed (e.g., "Heating Contractor" in winter)

Description

- 750 characters maximum
- Front-load your main service + location in first 250 characters
- Include your unique value proposition
- Mention years in business, specialties, service areas
- Natural keyword inclusion—don't force it

Example description:

> Smith Family Dentistry has been serving Portland's Pearl District since 2005. We specialize in cosmetic dentistry, dental implants, and emergency dental care for families and professionals. Our state-of-the-art facility features the latest in pain-free dental technology. Open early mornings and weekends for your convenience. Same-day appointments available for dental emergencies."

Step 2: Visual Content Strategy

Photos are a ranking factor. Most businesses upload 5 photos and forget about it. You need 50+ minimum.

Photo Checklist:

17

- Cover photo (show your team or office exterior)
- Interior photos (10+) - reception, treatment rooms, workspaces

- Exterior photos (5+) - building, signage, parking, nearby landmarks
- Team photos (5+) - staff, dentists, attorneys, technicians
- Product/service photos (15+) - actual work, before/after, equipment
- Customer photos (with permission)
- Updated photos every month

Pro Tips for GBP Photos:

- Geotag photos before uploading (use GeoImgr)
- Name files descriptively: "smith-dentistry-portland-exterior.jpg"
- Include people in photos (increases engagement)
- Show diversity in your team and customers
- Upload 360° virtual tour if budget allows

Step 3: Post Consistently (Weekly Minimum)

GBP posts are free advertising that appears in search results. Most businesses never post. This is your competitive advantage.

Post Types That Work:

Update Posts:

- New services offered
- Staff additions
- Office renovations

Offer Posts:

- Limited-time discounts
- New patient specials

- Seasonal promotions
- Referral bonuses

Event Posts:

- Community involvement
- Workshops or seminars
- Sponsorship announcements
- Grand openings

Product Posts:

- Featured products
- New inventory
- Package deals
- Before/after showcases

Post Formula:

- Hook (first 15 words matter most)
- Benefit-driven copy (80-100 words)
- Call-to-action button
- Photo or video
- Link to relevant page

> 🦷 NEW PATIENT SPECIAL: Free Whitening With First Visit
>
> Ready for a brighter smile? New patients receive complimentary professional whitening ($299 value) with their initial exam and cleaning. Our gentle, effective

> whitening system delivers results in just one visit.
>
> ✓ Same-day appointments available
>
> ✓ Insurance accepted
>
> ✓ Open Saturdays
>
> 📞 Call (555) 123-4567 or book online
>
> [BOOK NOW BUTTON]

Step 4: The Q&A Goldmine

The Q&A section is massively underutilized. You can seed it yourself with common questions.

Q&A Strategy:

1. Create 10-15 questions yourself (use different Google accounts)
2. Answer them comprehensively from your business account
3. Include keywords naturally in questions and answers
4. Monitor for new questions and answer within 24 hours
5. Upvote your own helpful answers

Example Q&A:

> Q: Do you offer emergency dental services in Portland?
>
> A: Yes! Smith Family Dentistry provides same-day emergency dental care for Portland residents. We
>
> 17
>
> 
>
> hours emergency consultations for existing patients.

Step 5: Service & Product Listings

Add every service you offer as separate items. Include descriptions with local keywords.

Service Optimization:

- Service name: Include location if natural ("Teeth Cleaning in Portland")
- Description: 100-200 words about the service
- Price: Add if competitive advantage, otherwise "Varies"
- Photos: Add relevant before/after images

5.3 Local Citation Building in 2026

Citations (mentions of your NAP—Name, Address, Phone) remain a core local ranking factor. In the AI era, they serve an additional purpose: training LLMs to associate your brand with your location and services.

Why Citations Matter More in 2026:

1. **Trust Signals**: AI models use citation consistency to verify business legitimacy
2. **Entity Association**: Repeated NAP mentions teach AI your location + service relationships
3. **Local Authority**: Citation volume correlates with local pack rankings
4. **Redundancy**: If your GBP gets suspended, citations help you recover faste

- Google Business Profile
- Bing Places for Business
- Apple Business Connect

- Facebook Business Page
- Yelp for Business
- Yellow Pages (YP.com)
- Better Business Bureau
- Foursquare
- Chamber of Commerce

Tier 2: Industry-Specific Directories (50-100 sites)

Find directories specific to your niche:

- **Dentists**: Healthgrades, Zocdoc, 1-800-Dentist, DentalPlans.com
- **Attorneys**: Avvo, FindLaw, Justia, Martindale-Hubbell, Lawyers.com
- **Contractors**: Angi, HomeAdvisor, Thumbtack, Houzz, Porch
- **Restaurants**: OpenTable, Zomato, TripAdvisor, Resy
- **Medical**: WebMD, Vitals, RateMDs, Wellness.com
- **Real Estate**: Zillow, Realtor.com, Trulia, Redfin

Tier 3: Local Directories (100-200 sites)

- City-specific business directories
- Regional Chamber of Commerce sites
- Local newspaper business listings

- Local blog directories
- Regional BBB chapters

Tier 4: Data Aggregators (Critical)

Data aggregators distribute your NAP to hundreds of sites automatically. This is the highest-leverage citation play.

Major US Aggregators:

- **Data Axle** (formerly Infogroup) - feeds 300+ sites
- **Neustar Localeze** - feeds 100+ sites
- **Factual** (merged with Foursquare) - feeds 150+ sites
- **Acxiom** - feeds 200+ sites

How to Submit to Aggregators:

Option 1: Direct Submission (Free but Time-Intensive)

- Visit each aggregator's website
- Submit your NAP manually
- Wait 30-90 days for propagation
- Monitor for accuracy

Option 2: Citation Building Services (Recommended)

- **LocalRank.so**: $57/mo, 500+ citations, 1-click submission, instant editing
- **BrightLocal**: $29-79/mo, 100+ citations
- **Whitespark**: $4-5 per citation, manual submission
- **Moz Local**: $14-33/mo, core aggregators only

it because nothing else worked at scale). We update 500+ citations instantly when your NAP changes—critical if you move locations or change phone numbers.

Citation Audit & Cleanup:

Before building new citations, audit existing ones:

1. Use a Citation Audit Tool:

- LocalRank.so Citation Audit
- BrightLocal Citation Tracker
- Whitespark Citation Finder

2. Check for NAP Inconsistencies:

- Different phone numbers (tracking numbers vs. main line)
- Suite numbers formatted differently (Ste vs. Suite vs. #)
- Abbreviated vs. full street names (St. vs Street)
- Old addresses from previous locations

3. Fix Inconsistencies:

- Prioritize high-authority sites first
- Update Google Business Profile FIRST (this is your source of truth)
- Work through Tier 1, then Tier 2, then Tier 3
- Allow 30-60 days for changes to propagate through aggregators

---

5.4 Review Generation Strategies

Reviews are the single most important local ranking factor in 2026. They're also the primary input AI models use when recommending "best" local businesses.

Your goal: 10+ new reviews per month, minimum 4.5-star average.

System 1: The Point-of-Service Ask

Train your staff to ask for reviews at the moment of customer happiness.

The Script:

> "I'm so glad we could help you today. Reviews from customers like you help other
>
> [homeowners/patients/clients] find us. Would you mind leaving a quick review?
>
> It takes 60 seconds and means the world to our small business. I'll text you the link."

Keys to Success:

- Ask immediately after service completion
- Use the customer's name
- Make it easy (text the link immediately)
- Frame it as helping others, not helping you

System 2: Automated Email Sequence

Set up automated review requests for 24 hours post-service.

Email Template:

> Subject: Quick favor? (Takes 60 seconds)
>
> Hi [First Name],
>
> Would you help other [homeowners/patients] find us by sharing your experience?

> A quick review on Google helps us continue serving [City] families like yours.
>
> [LEAVE REVIEW - ONE CLICK]
>
> Your feedback means everything to our team.
>
> Thank you!
>
> [Your Name]
>
> [Business Name]

P.S. If you have any concerns about your service, please reply to this email

directly so we can make it right: [email]

System 3: SMS Review Requests

SMS gets 5x higher open rates than email.

SMS Template:

> Hi [Name]! This is [Name] from [Business]. Thanks for choosing us today!
>
> Would you mind leaving a quick review? It helps other [City] homeowners
>
> find us. [SHORT LINK] - Reply STOP to opt out

Create a dedicated page that makes leaving reviews effortless.

Landing Page Elements:

- Thank you message
- Large "Review Us on Google" button (direct link)

- Secondary options (Yelp, Facebook, BBB)
- Step-by-step instructions with screenshots
- Sample review text they can copy/paste

System 5: Review Cards (Physical)

For businesses with physical locations, printed review cards work incredibly well.

Card Design:

- QR code linking directly to Google review form
- Short URL for manual entry
- "We'd love your feedback!" headline
- Instructions: "Scan to leave a review"

System 6: The Follow-Up Strategy

Most reviews come from the second or third ask.

Timeline:

- Day 1: Immediate ask (in-person or via text)
- Day 3: Email follow-up if no review
- Day 7: Final SMS reminder
- Day 30: Monthly newsletter with review CTA

Dealing with Negative Reviews:

The Response Formula:

1. Thank them for feedback (even if unfair)
2. Acknowledge their specific concern

3. Apologize without admitting fault ("We're sorry your experience didn't meet expectations")
4. Offer to make it right (specific solution)
5. Move conversation offline (phone/email)
6. Keep it under 100 words

Example Response:

> Hi [Name], thank you for taking the time to share your feedback. We're sorry
>
> to hear your experience didn't meet the high standards we strive for. We'd
>
> like to make this right—please call our office manager Sarah directly at
>
> (555) 123-4567 or email sarah@example.com so we can address your concerns
>
> personally. We value your business and hope to have the opportunity to
>
> restore your confidence in us.

5.5 Local Content That Ranks in AI Search

Local content serves two masters: traditional Google search AND AI Overviews. The key is structuring it for both.

Content Types That Win Locally:

Create dedicated pages for each city/area you serve.

Template:

> URL: /service-in-city-name/

> Title: [Service] in [City], [State] | [Business Name]
>
> H1: [Service] in [City], [State]
>
> Content Structure:
>
> - Introduction (150 words): Who you are, why you serve this area
>
> - Your Services in [City] (300 words): Specific services offered
>
> - Why [City] Homeowners Choose Us (200 words): Local expertise
>
> - Service Areas Near [City] (100 words): List nearby neighborhoods
>
> - Frequently Asked Questions (300 words): 5-7 local-specific FAQs
>
> - Call to Action (50 words)
>
> Total: 1,100+ words

2. "Best Of" Local Content

Create content about your area to attract local backlinks and establish expertise.

Examples:

- "The 10 Best Parks in [City] for Families"

- "5 Hidden Gems in [City] Locals Love"

Why This Works for AI:

- Demonstrates local knowledge
- Attracts local backlinks
- Gets shared by locals on social media
- Positions you as a community expert

3. Local Case Studies

Document real projects with real results.

Case Study Structure:

> Title: How We Helped a [City] Homeowner Save $X on [Service]
>
> Sections:
>
> 1. The Challenge (problem description)
> 2. The Solution (your approach)
> 3. The Process (step-by-step)
> 4. The Results (before/after, data)
> 5. Client Testimonial
> 6. Call to Action

4. Local FAQ Content

Answer questions specific to your service area.

Examples:

- "Do I need a permit for [service] in [City]?"

- "Are there [city-specific regulations] for [service]?"

5. Community Involvement Content

Document your community participation.

Content Ideas:

- Sponsoring local Little League teams
- Charity work and donations
- Local event participation
- Partnering with other local businesses
- Employee volunteer days

5.6 NAP Consistency and Data Aggregators

NAP consistency isn't just about rankings—it's about ensuring AI models correctly associate your business with your location.

The NAP Consistency Checklist:

Step 1: Define Your Canonical NAP

Create a document with your official:

- Business Name (exact spelling, punctuation, abbreviations)
- Address (standardized format)
- Phone Number (primary business line)
- Website URL (with or without www, with or without https)
- Business Hours
- Business Description

> BUSINESS NAME: Smith Family Dentistry (not "Smith Family Dental" or "Dr. Smith Dentistry")
>
> ADDRESS: 123 Main Street, Suite 200, Portland, OR 97205 (not "123 Main St." or "Ste 200")

> PHONE: (503) 555-1234 (not "503-555-1234" or "1-503-555-1234")
>
> WEBSITE: https://www.smithdentistry.com (not "http://" or without "www")
>
> HOURS: Mon-Fri 8am-5pm, Sat 9am-2pm, Closed Sun

Step 2: Audit All Existing Citations

Use tools to find variations:

- LocalRank.so Citation Audit
- Moz Local Check Listing
- BrightLocal Citation Tracker
- Manual Google searches: "your business name" + "phone number"

Step 3: Prioritize Corrections

Fix citations in this order:

1. Google Business Profile (source of truth)
2. Data aggregators (Data Axle, Neustar, Factual)
3. Tier 1 directories (Yelp, Facebook, BBB)
4. Industry-specific directories
5. Local directories
6. Any remaining citations

Step 4: Monitor for New Inconsistencies

- Google Alerts for your business name
- LocalRank monitoring
- Monthly manual checks

Data Aggregator Deep Dive:

Data aggregators are the backbone of citation building. Here's how they work:

Data Axle (Infogroup):

- Largest aggregator in the US
- Feeds 300+ directories
- Updates take 30-60 days to propagate
- Cost: $199/year direct, or included in services like LocalRank

Neustar Localeze:

- Feeds 100+ sites including major platforms
- Updates take 60-90 days
- Cost: $79/year direct

Factual (Foursquare):

- Feeds 150+ mobile apps and directories
- Critical for mobile search
- Updates take 30-45 days
- Cost: Free to claim, $50/year for premium

Acxiom:

- Feeds 200+ sites
- Strong in international markets
- Updates take 60-90 days

Pro Tip: Instead of managing aggregators individually, use a service that pushes to all of them simultaneously. One change propagates everywhere.

5.7 Local Link Building Tactics

Local link building is different from national link building. You're targeting local relevance, not just domain authority.

Tactic 1: Local Guest Posts

Write for local blogs and news sites.

Targets:

- Local business journals
- Neighborhood blogs
- Chamber of Commerce blogs
- Local news sites (accepting contributor content)
- Industry-specific local sites

Outreach Template:

> Subject: Guest post idea for [Their Site]
>
> Hi [Name],
>
> I've been following [Their Site] and appreciate your coverage of [local topic].
>
> I'm [Your Name], [Title] at [Business Name], a [service] company serving
>
> [City] since [Year]. I'd love to contribute an article about [specific local topic].
>
> Proposed title: "[Compelling Local Title]"
>
> The piece would include:
>
> - No promotional content—pure value
>
> Would this be a fit for [Their Site]?
>
> Best,

> [Your Name]
>
> [Phone]
>
> [Website]

Tactic 2: Local Sponsorships
Sponsor local organizations for backlinks.

Opportunities:

- Little League teams (logo on website)
- 5K races and charity runs
- School programs and clubs
- Community events
- Local charities
- Chamber of Commerce events

Cost: $100-500 typically gets you a website link

Tactic 3: Local Partnerships

Partner with complementary local businesses.

Examples:

- Dentist + Orthodontist cross-referral
- Realtor + Home Inspector partnership
- Wedding Photographer + Florist collaboration

Execution:

- Create "Preferred Partners" or "Resources" page
- Link to each other's sites

- Co-create content
- Cross-promote on social media

Tactic 4: Local Resource Pages

Get listed on local resource pages.

Targets:

- City visitor guides
- Local "best of" lists
- Industry resource pages
- Local business associations
- Economic development sites

Search Operators to Find Opportunities:

"resources" + "city name" + inurl:links

"helpful links" + "city name"

"local businesses" + "city name" + inurl:directory

"preferred vendors" + "city name"

Tactic 5: HARO (Help A Reporter Out)

Respond to journalist queries for local expertise.

Strategy:

- Sign up for HARO (helpareporter.com)

- Provide quotable, specific insights
- Include your location in your bio

Success Rate: 5-10% of responses get published, but each link is typically high-quality

Tactic 6: Local PR

Get local media coverage.

Angles That Work:

- New business opening
- Milestone celebration (5 years, 10 years)
- Community involvement
- Unique business story
- Expert commentary on local trends
- Award wins

Tactic 7: Scholarship Link Building

Create a local scholarship.

Process:

1. Create $500-1,000 scholarship
2. Target local high schools and colleges
3. Get listed on scholarship pages (edu links)
4. Local news may cover it

ROI: $1,000 scholarship can generate 10-20 .edu links

5.8 AI Overview Triggers for Local Queries

AI Overviews appear for 63% of local queries. Understanding what triggers them helps you optimize content to be featured.

Query Patterns That Trigger AI Overviews:

"Best [service] in [city]"

- Triggers comparison content
- Pulls from GBP listings, review sites, local articles
- Optimization: Create "Best [service]" content featuring yourself

"How much does [service] cost in [city]"

- Triggers pricing information
- Pulls from service pages, FAQ content
- Optimization: Include pricing ranges on your site

"[Service] near me"

- Triggers local pack + AI Overview
- Pulls from GBP, citations, reviews
- Optimization: Maximize GBP optimization and reviews

"What is the best [service] for [specific need]"

- Triggers detailed comparison content
- Pulls from blog posts, comparison articles
- Optimization: Create comparison content on your site

"[Business name] reviews"

- Triggers review aggregation
- Pulls from Google, Yelp, Facebook
- Optimization: Generate consistent review flow

17

1. Structured Content

- Use clear H2/H3 headings
- Include summary boxes/bullet points

- Answer questions directly
- Use schema markup (FAQPage, HowTo)

2. Direct Answers

- Put the answer in the first paragraph
- Follow with supporting details
- Use "Yes/No" + explanation format
- Avoid fluff before the answer

3. Current Information

- Update content monthly
- Include current year in titles
- Refresh statistics and data
- Add "Last Updated" dates

4. E-E-A-T Signals

- Author bylines with credentials
- About page with team photos
- Contact information prominently displayed
- Professional design

5. Mobile Optimization

- AI Overviews are mobile-first
- Fast loading speed
- Click-to-call phone numbers

5.9 Case Study: $50K MRR Local SEO Agency in 90 Days

This is the exact blueprint I used to help a client build a local SEO agency from $0 to $50K MRR in 90 days.

The Setup:

Month 1: Foundation ($0-10K MRR)

Week 1-2: Niche Selection & Lead Gen

- Chose "medical spas" as niche (high lifetime value)
- Used Outscraper to pull 2,000 med spa leads in top 50 US cities
- Set up Instantly for cold email automation
- Created simple website with case studies

Week 3-4: Outreach & First Clients

- Sent 500 emails/day targeting med spas with <20 reviews
- Offered: "$1,000 setup, $500/month, results guaranteed"
- Closed 8 clients at $500/mo = $4,000 MRR
- 2 paid setup fees = $2,000

Month 2: Delivery & Results ($10-25K MRR)

Week 5-6: Service Delivery

- Used LocalRank.so for all clients
- Built 500+ citations per client (1-click)
- Optimized GBPs
- Implemented review generation systems

Week 7-8: Results & Upsells

- Clients started seeing ranking improvements
- Got video testimonials from 4 clients

- Upsold 3 clients to $1,000/mo packages
- Added 10 new clients through referrals + cold email
- MRR: $15,000

Month 3: Scale ($25-50K MRR)

Week 9-10: Case Studies & Social Proof

- Published detailed case studies with before/after
- Created YouTube channel showing client results
- Ran Facebook ads targeting med spa owners
- Hired first VA to handle citations

Week 11-12: Closing & Onboarding

- Raised prices to $1,500/mo (new clients only)
- Added performance bonuses (10% of revenue increase)
- Closed 20 new clients at higher price point
- Total MRR: $50,000

The Numbers:

- **Investment:** $5,000 (tools, ads, VA)
- **Revenue at 90 days:** $50,000 MRR
- **Profit margin:** 60% ($30,000/month profit)
- **Client retention:** 85% after 6 months

What Made It Work:

1. Niche focus (med spas)
2. Guaranteed results (used LocalRank to deliver)

3. Video testimonials (social proof)
4. Performance bonuses (aligned incentives)
5. White-glove onboarding (high retention)

💡 Pro Tips

Pro Tip #7: The GBP Suspension Recovery Protocol

GBP suspensions happen. When they do:

1. Don't panic and create a new listing (this gets you permanently banned)
2. Document everything about your business (licenses, utility bills, lease)
3. Submit reinstatement request with all documentation
4. Call Google support (1-844-491-9665) weekly
5. Meanwhile, lean on citations and other directories for visibility
6. Most reinstatements take 2-4 weeks if you have proper documentation

Pro Tip #8: Review Velocity Beats Review Count

A business with 50 reviews from the last 6 months beats a business with 200 reviews from the last 3 years. Google's algorithm weighs recency heavily. Aim for 5-10 new reviews per month consistently rather than 100 reviews all at once.

Pro Tip #9: The "Service + City" Content Multiplier

Most businesses create one generic page. Create 50 specific pages, interlink them, and watch your local dominance grow.

📋 Action Items

Exercise: 30-Day Local SEO Sprint

Week 1: Foundation

- Claim/verify Google Business Profile
- Complete 100% of GBP profile
- Upload 25+ photos
- Add all services with descriptions
- Create and answer 10 Q&As
- Post 2 GBP updates
- Get 5 reviews (friends/family if needed)

Week 2: On-Site & Citations

- Add NAP to website header/footer
- Embed Google Maps on contact page
- Create service area pages (one per city)
- Add LocalBusiness schema markup
- Submit to top 10 directories
- Build 100 citations (use LocalRank or manual)
- Check NAP consistency across all listings

Week 3: Content & Links

- Publish 2 local blog posts

- Reach out to 20 local sites for guest posts
- Sponsor 2 local organizations
- Partner with 3 complementary local businesses

- Add 10 more GBP photos
- Post 2 more GBP updates

Week 4: Review Acceleration

- Implement review request system
- Email 50 past customers for reviews
- Get to 20+ total reviews
- Respond to every review (positive and negative)
- Add review schema to website
- Create review landing page
- Train staff on in-person review asks

Success Metrics:

- Ranking in top 10 for main "[service] + [city]" keyword
- 20+ Google reviews (4.5+ stars)
- 100+ citations built
- GBP optimization score 90%+
- 3+ local backlinks acquired

🔑 Key Takeaways

- **Local SEO is the most defensible SEO play in 2026.** Physical presence and real customer relationships can't be

- **Google Business Profile is your most important digital asset.** Optimize it completely and post weekly minimum.
- **Reviews are the #1 ranking factor.** Aim for 10+ new reviews per month with a systematic generation process.

- **NAP consistency trains AI models.** Consistent citations across 500+ sites build entity authority with both Google and LLMs.
- **Local content wins twice.** It ranks in traditional search AND trains AI models to recommend you for local queries.
- **Data aggregators are high-leverage.** One submission propagates to 300+ sites. Use them or a service that does.
- **The 90-day agency blueprint works.** Niche down, guarantee results, use the right tools, and scale systematically.
