Title: Plumber in Tempe, AZ | Summit Plumbing Pros

Meta description: Licensed plumber in Tempe, AZ (ROC #338366). Repairs, drains, sewer, water heaters, leak detection, and a 24/7 emergency line. Free estimates from Summit Plumbing Pros.

Plumber in Tempe, AZ

When something in the house stops working, you do not want a research project. You want a licensed plumber in Tempe who answers the phone, shows up when they said they would, and fixes it right the first time.

That is the job Summit Plumbing Pros does for Tempe homeowners and rental owners. We are licensed, bonded, and insured (Arizona ROC #338366), we give a free estimate before any work starts, and we treat your home the way we would want ours treated. See [all plumbing services](https://www.summitplumbingpros.com/plumbing/) we offer across the East Valley.

What we fix in Tempe homes

Most calls from Tempe are about one of these. Each has its own page with details, or just call and describe the problem.

- **Drains and clogs.** Slow sinks, backed-up showers, a toilet that keeps clogging. See [drain cleaning in Tempe](https://www.summitplumbingpros.com/drain-cleaning-services-tempe/).
- **Sewer lines.** Backups in more than one fixture, sewage smells, wet spots in the yard. See [sewer line repair in Tempe](https://www.summitplumbingpros.com/sewer-line-repair-tempe/).
- **Trenchless pipe lining.** Our signature no-dig repair for damaged drain and sewer pipes. See [trenchless pipe lining in Tempe](https://www.summitplumbingpros.com/pipe-lining-tempe/).
- **Leaks and slab leaks.** A water bill that jumped, a warm spot on the floor, running-water sounds with everything off. See [leak detection in Tempe](https://www.summitplumbingpros.com/water-leak-detection-tempe/).
- **Water heaters.** No hot water, not enough, or a tank that is leaking. See [water heater repair and installation in Tempe](https://www.summitplumbingpros.com/water-heater-services-tempe/) or [tankless water heater installation in Tempe](https://www.summitplumbingpros.com/tankless-water-heater-installation-tempe/).
- **Hard water.** Scale on fixtures, spotty dishes, appliances wearing out early. See [water softener installation in Tempe](https://www.summitplumbingpros.com/water-softener-installation-tempe/).
- **Water pressure.** Weak showers or pressure that changes through the day. See [water pressure repair in Tempe](https://www.summitplumbingpros.com/water-pressure-services-tempe/).

- **Toilets, faucets, and fixtures.** Repairs and new installs. See [fixture installation in Tempe](https://www.summitplumbingpros.com/plumbing-fixture-installation-in-tempe/).
- **Garbage disposals.** Repair or replacement. See [garbage disposal repair in Tempe](https://www.summitplumbingpros.com/garbage-disposal-service-tempe/).

If water is running where it should not be right now, call our 24/7 line or see the [emergency plumber in Tempe](https://www.summitplumbingpros.com/emergency-plumber-in-tempe/) page.

Call (480) 447-7008 or [request a free estimate online](https://www.summitplumbingpros.com/contact/).

Tempe water and your plumbing

Tempe's water utility puts local hardness at roughly 15 grains per gallon, which counts as hard water. That is why Tempe homes see white scale on faucets and showerheads, water heaters that lose efficiency, and softeners that need service. If you are deciding whether a softener is worth it, we will look at your fixtures and water heater and give you a straight answer, not a sales pitch.

Tempe also offers a rebate on high-efficiency toilets. We can install a WaterSense toilet and tell you what paperwork the city needs.

Your pipes, the city's pipes, and who fixes what

The City of Tempe's leak guidance says that if the leak is in the service line on your property, you need a professional who works on service lines. That is us. If your meter's dial keeps turning with everything off, or the city's WaterSmart alert flags continuous use, call us and we will find where the water is going.

Why Tempe homeowners choose Summit

Frequently asked questions

Are you a licensed plumber in Tempe?

Yes. Summit Plumbing Pros holds Arizona ROC license #338366 and is bonded and insured. You can check any Arizona contractor on the [Registrar of Contractors website](https://roc.az.gov/contractor-search).

Is there a charge for an estimate?

No. Estimates are free on all work, and you see the price before we start.

Do you handle plumbing emergencies in Tempe?

Yes. Our emergency line is open 24/7. For what to do while you wait, see the [emergency plumber in Tempe](https://www.summitplumbingpros.com/emergency-plumber-in-tempe/) page.

Is Tempe water hard enough to need a softener?

The city's water FAQ lists hardness around 15 grains per gallon, which is considered hard. Whether a softener makes sense depends on your fixtures, water heater, and habits. We will tell you honestly.

Do you work on rental properties in Tempe?

Yes. We work with homeowners, landlords, and home-warranty customers across Tempe.

Ready when you are.

Call (480) 447-7008 or [request a free estimate online](https://www.summitplumbingpros.com/contact/).

Title: Plumber in Queen Creek, AZ | Summit Plumbing Pros

Meta description: Plumbing services in Queen Creek, AZ from a licensed East Valley plumber (ROC #338366). Repairs, drains, water heaters, leaks, softeners. Free estimates.

Plumber in Queen Creek, AZ

Queen Creek is spread out, and so is its plumbing. Depending on your street, your water may come from the Town, from EPCOR, or from another provider. What does not change is that everything from your meter into your house is yours to maintain, and that is where Summit Plumbing Pros comes in.

We provide plumbing services in Queen Creek for repairs, installations, and the everyday problems that come with a busy household. Licensed, bonded, and insured (Arizona ROC #338366), with a free estimate before any work. See [all plumbing services](https://www.summitplumbingpros.com/plumbing/) we offer.

[Coupon block unchanged]

What we fix in Queen Creek homes

- **Drains and clogs.** See [drain cleaning in Queen Creek](https://www.summitplumbingpros.com/drain-cleaning-services-queen-creek/).

Call (480) 447-7008 or [request a free estimate online](https://www.summitplumbingpros.com/contact/).

Queen Creek water and your plumbing

The Town of Queen Creek draws its water from groundwater wells and reports hardness between 6 and 17 grains per gallon. On the high end of that range, scale builds on fixtures and inside water heaters. If your dishes spot, your showerhead crusts over, or your water heater rumbles, hard water is usually the reason, and a softener sized for your home solves it.

Who fixes what in Queen Creek

The Town states that it is not responsible for damage from breaks or leaks in your own pipes and fixtures. Its home water audit page shows a simple check: with all water off, look for the plus sign on your meter's leak indicator. If it is there, water is moving somewhere on your property. Call us and we will find it. The Town also offers free water-use assessments through its conservation office if you want a second look at your usage.

Why Queen Creek homeowners choose Summit

[Shared block]

Frequently asked questions

Do you serve all of Queen Creek?

Yes. Queen Creek is part of our East Valley service area, along with neighboring [San Tan Valley](https://www.summitplumbingpros.com/general-plumbing-services-san-tan-valley/).

Are you licensed in Arizona?

Yes. Arizona ROC #338366, bonded and insured.

My water comes from EPCOR, not the Town. Does that matter?

Not for us. The provider owns the main and the meter; the pipes and fixtures on your side are the same job either way.

How hard is Queen Creek water?

The Town reports 6 to 17 grains per gallon. We can test at your tap and tell you where your home falls.

Is the estimate free?

Yes, on all work, before anything starts.

Ready when you are.

Call (480) 447-7008 or [request a free estimate online](https://www.summitplumbingpros.com/contact/).

3. Phoenix

Call (480) 447-7008 or [request a free estimate online](https://www.summitplumbingpros.com/contact/).

Phoenix water and your plumbing

The City of Phoenix's 2025 Water Quality Report lists hardness between 10 and 17.6 grains per gallon, and the city itself notes that hard water causes scaling in pipes, water heaters, faucets, and showerheads. That scale is behind a lot of the water heater and fixture calls we get from Phoenix. A softener, or simply flushing the water heater on schedule, keeps it in check.

Phoenix water customers in single-family homes can also get up to $75 back on a WaterSense toilet. We install them and can point you to the city's rebate page.

Who fixes what in Phoenix

Phoenix Water Services is clear about the line: from the street to the meter is the city's responsibility, and everything after the meter is yours. If the meter is still running with the house shut off, the leak is on your side, and we will find it. Phoenix also does not require a permit to replace an existing water heater in a single-family home when a licensed contractor does the work, so that job stays simple.

Why Phoenix homeowners choose Summit

[Shared block]

Frequently asked questions

Do you serve Phoenix?

Yes. Phoenix is part of our service area. We are based in Mesa and serve the greater East Valley.

Are you licensed to work in Phoenix?

Yes. Arizona ROC #338366 is a state license, valid across Arizona.

Do I need a permit to replace my water heater in Phoenix?

Phoenix exempts replacement of an existing water heater in a one- or two-family home when a licensed contractor does it. We handle it.

How hard is Phoenix water?

The city's 2025 report lists 10 to 17.6 grains per gallon. That is hard water, and it is why water heaters here benefit from regular flushing.

Do you charge for estimates?

No. Free on all work.

Ready when you are.

Call (480) 447-7008 or [request a free estimate online](https://www.summitplumbingpros.com/contact/).

4. Scottsdale

URL: https://www.summitplumbingpros.com/general-plumbing-services-in-scottsdale/

Title: Plumber in Scottsdale, AZ | Summit Plumbing Pros

Meta description: Residential plumber serving Scottsdale. Licensed (ROC #338366), free estimates, 24/7 emergency line. Water softeners, drains, sewer, water heaters, leak detection.

Plumber in Scottsdale, AZ

Scottsdale homeowners call Summit Plumbing Pros for the same reasons our East Valley neighbors do: a plumber who is licensed, shows up on time, explains the work, and leaves the house clean. We handle repairs, drains, sewer lines, water heaters, leaks, and softeners, with a free estimate before any work. See [all plumbing services](https://www.summitplumbingpros.com/plumbing/) we offer.

[Coupon block unchanged]

What we fix in Scottsdale homes

- **Drains and clogs.** See [drain cleaning in Scottsdale](https://www.summitplumbingpros.com/drain-cleaning-services-scottsdale/).
- **Sewer lines.** See [sewer line repair in Scottsdale](https://www.summitplumbingpros.com/sewer-line-repair-scottsdale/).
- **Trenchless pipe lining.** Our no-dig repair for damaged drain and sewer pipes. See [trenchless pipe lining in Scottsdale](https://www.summitplumbingpros.com/pipe-lining-scottsdale/).
- **Leaks and slab leaks.** See [leak detection in Scottsdale](https://www.summitplumbingpros.com/water-leak-detection-scottsdale/).
- **Water heaters.** See [water heater services in Scottsdale](https://www.summitplumbingpros.com/water-heater-services-scottsdale/) and [tankless water heater installation in Scottsdale](https://www.summitplumbingpros.com/tankless-water-heater-installation-scottsdale/).
- **Hard water.** See [water softener installation in Scottsdale](https://www.summitplumbingpros.com/water-softener-installation-scottsdale/).
- **Water pressure.** See [water pressure repair in Scottsdale](https://www.summitplumbingpros.com/water-pressure-services-scottsdale/).
- **Toilets, faucets, and fixtures.** See [fixture installation in Scottsdale](https://www.summitplumbingpros.com/plumbing-fixture-installation-in-scottsdale/).
- **Garbage disposals.** See [garbage disposal repair in Scottsdale](https://www.summitplumbingpros.com/garbage-disposal-service-scottsdale/).

Active leak or backup right now? Call our 24/7 line or see the [emergency plumber in Scottsdale](https://www.summitplumbingpros.com/emergency-plumber-in-scottsdale/) page.

Call (480) 447-7008 or [request a free estimate online](https://www.summitplumbingpros.com/contact/).

Scottsdale water and your plumbing

Scottsdale Water's 2026 Water Quality Report lists hardness of about 13 to 17 grains per gallon depending on where you live, and the city says plainly that it does not treat for hardness because most residential water goes outdoors. Inside the house, that hardness shows up as scale on fixtures and inside the water heater. It is the main reason [water softener installation in Scottsdale](https://www.summitplumbingpros.com/water-softener-installation-scottsdale/) is one of our most requested services here.

Permits and who fixes what in Scottsdale

Scottsdale requires a permit to replace a water heater, and lists softener plumbing, water line replacement, and sewer line repair as permit work. Repairing or replacing a fixture in the same spot does not need one. As a licensed contractor we pull the permit and schedule the inspection for you.

If you suspect a leak, the city's own test is simple: turn off all water, wait 30 minutes, and see whether the meter's sweep hand moved. If it did, something on your property is using water, and that is where we start.

Why Scottsdale homeowners choose Summit

[Shared block]

Frequently asked questions

Do you serve Scottsdale?

Yes. Scottsdale is part of our service area. We are based in Mesa and serve the greater East Valley.

Do I need a permit to replace a water heater in Scottsdale?

Yes. Scottsdale requires one, and either the homeowner or a licensed contractor can obtain it. We take care of it.

How hard is Scottsdale water?

The city's 2026 report lists roughly 13 to 17 grains per gallon depending on area.

Does Scottsdale still offer a toilet rebate?

No. The city discontinued it in 2023. It does offer a smart irrigation controller rebate.

Is the estimate free?

Yes, on all work.

Ready when you are.

Call (480) 447-7008 or [request a free estimate online](https://www.summitplumbingpros.com/contact/).

Call (480) 447-7008 or [request a free estimate online](https://www.summitplumbingpros.com/contact/).

Mesa water and your plumbing

Mesa's 2025 Water Quality Report says hardness averages about 12 grains per gallon in the City Zone and 16 grains per gallon in the Eastern and Southern Zones, and the city suggests starting a softener at 16 grains and adjusting from there. That hardness is why so many Mesa water heaters fill with sediment and why we recommend a flush at least once a year. If you are not sure which zone you are in, we can tell from your address.

Who fixes what in Mesa

The City of Mesa's meter page puts it simply: a leak on your property beyond the meter is yours, and the city suggests calling a plumber. It also lists the usual suspects we find on Mesa leak calls: toilets, irrigation, water softeners, hose bibs, and pool autofill valves. If your meter keeps turning with everything off, call us.

Permits in Mesa are straightforward: a like-for-like water heater swap needs none, while switching a gas storage heater to a gas tankless unit does. We handle the permit when one is required.

Why Mesa homeowners choose Summit

- **Your Mesa neighbors.** Our office is on West Birchwood Avenue.
- **We care.** Once we enter the home, we become family, and we treat you that way.

- **Affordable.** Fair, competitive pricing, free estimates on every job, financing available.
- **Prepared.** Licensed, bonded, and insured. Arizona ROC #338366.

Frequently asked questions

Where is Summit Plumbing Pros located?

950 W. Birchwood Ave, Suite 12, Mesa, AZ 85210. See our [contact page](https://www.summitplumbingpros.com/contact/).

How hard is Mesa water?

About 12 grains per gallon in the City Zone and 16 in the Eastern and Southern Zones, per the city's 2025 report.

Do I need a permit to replace my water heater in Mesa?

Not for a like-for-like gas or electric replacement. You do for a switch from a storage gas heater to a gas tankless unit. We handle it either way.

The city said the leak is on my side of the meter. What now?

Call us. We locate the leak, show you what we found, and give you a free estimate for the repair.

Do you offer emergency service in Mesa?

Yes, 24/7. See the [emergency plumber in Mesa](https://www.summitplumbingpros.com/emergency-plumber-in-mesa/) page.

Ready when you are.

Call (480) 447-7008 or [request a free estimate online](https://www.summitplumbingpros.com/contact/).

6. Chandler

URL: https://www.summitplumbingpros.com/general-plumbing-services-chandler/

Title: Plumber in Chandler, AZ | Summit Plumbing Pros

Meta description: Licensed plumber in Chandler, AZ (ROC #338366). Repairs, drains, sewer, water heaters, leak detection, fixtures. Free estimates and a 24/7 emergency line.

Plumber in Chandler, AZ

Chandler homeowners and landlords call Summit Plumbing Pros for a licensed plumber who does the job to code, pulls the permit when the city requires one, and gives a free estimate before any work. We are licensed, bonded, and insured under Arizona ROC #338366. See [all plumbing services](https://www.summitplumbingpros.com/plumbing/) we offer.

[Coupon block unchanged]

Call (480) 447-7008 or [request a free estimate online](https://www.summitplumbingpros.com/contact/).

Chandler water and your plumbing

Chandler's 2025 Consumer Confidence Report lists hardness of 10.1 to 16.8 grains per gallon, and the city's water FAQ puts the average at 16.5. The same FAQ passes on the manufacturers' advice: flush your water heater once a year if you have a softener and every six months if you do not. We do water heater flushes, softener installs, and the repairs that hard water eventually causes.

Permits and who fixes what in Chandler

The City of Chandler states that plumbing up to and including the meter is the city's, and everything after the meter is the homeowner's. Chandler's Homeowner's Building Permit Manual exempts like-for-like replacement of water heaters and water softeners from a permit, but replacing or relocating water supply, sewer, or drain piping is not exempt, and if you rent the home out, a licensed contractor has to pull that permit. That is one reason landlords in Chandler work with us.

Why Chandler homeowners choose Summit

[Shared block]

Frequently asked questions

Do I need a permit for plumbing work in Chandler?

Not for a like-for-like water heater or softener swap. Yes for replacing or relocating water, sewer, or drain piping. We handle the permit.

I own a rental in Chandler. Can I pull the permit myself?

Chandler's permit manual says a licensed contractor must obtain permits for homes you lease or rent. We are licensed, so we take care of it.

How hard is Chandler water?

About 16.5 grains per gallon on average per the city's water FAQ.

How often should I flush my water heater in Chandler?

The city's FAQ cites manufacturers: yearly with a softener, every six months without.

Is the estimate free?

Yes, on all work.

Ready when you are.

Call (480) 447-7008 or [request a free estimate online](https://www.summitplumbingpros.com/contact/).

Why homeowners choose Summit

[Shared block]

Ready when you are.

Call (480) 447-7008 or [request a free estimate online](https://www.summitplumbingpros.com/contact/).

Edits to the existing parent page: replace the H1; replace the intro; change the drain-line card link from /expert-drain-line-services/ to /drain-cleaning/; remove the duplicated bottom block (intro, coupon, and phone appear twice); demote "Call Us Today!" and the phone number from headings to text.
