PIPELINERS · 633 W 2ND AVE, MESA, AZ 85210 · ROC #362960 · SNAPSHOT 2026-09-16

Organic SEO performance: 30, 28 and 7-day comparison

All three periods end **Sep 12, 2026**, the last complete day of Search Console data (Sep 13 was partial, Sep 14-15 empty on Sep 16). Each metric is compared only with its own previous window. Two Search Console properties are used and never mixed in one comparison: the **Domain property** (`sc-domain:pipelinersusa.com`, GSC UI) for headline totals, branded split and devices, because it includes the Business Profile link (`http://…utm_medium=gmb`); and the **URL-prefix property** (`https://pipelinersusa.com/`, via Search Atlas) for keyword bands and page/query detail. CRM leads are from the TAG CRM Lead Manager (AI-filtered leads only), with timestamps converted from Singapore time to Arizona time.

30d Aug 14 – Sep 12 vs Jul 15 – Aug 13 | **28d** Aug 16 – Sep 12 vs Jul 19 – Aug 15 | **7d** Sep 6 – Sep 12 vs Aug 30 – Sep 5

1 Executive summary

Improved: CRM leads sourced to the Business Profile more than doubled over 30 days (24 vs 11, with 5 booked worth $27,590), Organic Search leads rose to 4 with 3 booked ($17,600), and branded Google clicks rose to 21 from 14.

Declined: non-branded Google clicks fell 20% (39 vs 49), average position slipped about 4 places (48.4 vs 44.3), and page-1 queries at positions 4-10 dropped from 59 to 33.

Biggest opportunity: "florence pipe break repair" gets 96 impressions at position 15 after losing 11 places, and /florence/ wasn't touched in the Sep 15-16 edits, so it can take the pipe-break fix already made on Buckeye.

Primary concern: growth is coming from the brand and the Business Profile, not from non-branded rankings, and 10 CRM leads in the last 30 days have no usable source ("Other").

Also: an unlisted number, (480) 969-7978, appears on Birdeye and the Ace DuraFlo installer directory with the correct address.

2 KPI comparison

† GA4 via Search Atlas returns an engagement rate, not a count, so engaged sessions = sessions × engagement rate. Position: lower is better. The Business Profile link row is the Domain property's Pages tab for the 30-day window only. CRM "Value" is the value entered on the lead record, not collected revenue; CRM sources come from the

CRM's own attribution (call-tracking number or form source), not from Google data. Search Atlas page tables only credit clicks to named queries, so page-level clicks are not reported below.

3 Winning queries, pages and locations

Item	Current	Previous	Window	Likely contributor (evidence)
Last 7 days: Google clicks (Domain)	19	6	7d	Branded 7 vs 3 and non-branded 12 vs 3. Business Profile website clicks rose the same week (9 vs 2) and CRM Business Profile leads were 8 vs 5, so local and brand demand is the likely driver. It can't be credited to the Sep 15-16 page work, which went live after the window.
Branded Google clicks (Domain)	21	14	30d	Brand demand rising alongside Business Profile leads (CRM 24 vs 11). Reviews (123 at 4.99★) and word of mouth are the likely drivers; no brand campaign is logged.
CRM Organic Search leads	4 (3 booked, $17,600)	2 (0 booked)	30d	Small numbers: 3 calls and 1 chat. The CRM doesn't record the landing page, so which pages produced them is Data unavailable.
/what-is-cipp/ impressions	5,670 @75	4,023 @70	30d	First click in the window ("cipp lining", 647 impr. @75, 28d). National informational demand; little local lead value.
/phoenix/ impressions	1,187 @55	768 @59	30d	More Phoenix trenchless queries: "sewer pipe relining in phoenix" 121 @40, "trenchless sewer repair in phoenix az" 81 @49 (28d). Still 0 page-1 Phoenix terms.
/mesa/ position	39	48	30d	Aug 25-28 city template and FAQ work. Impressions fell (457 vs 557), so the average may have improved partly because low-ranking queries dropped out.
/tempe/ position	25	31	30d	Aug 31 rewrite. "sewer line repair in tempe az" 95 @28 appears in the 28d window.
/sun-city/ · /san-tan-valley/ position	24 · 25	34 · 33	30d	Aug 27 FAQ migration to Elementor; no page-specific change logged.
/trenchless-drain-pipe-repair/ position	50	62	30d	No logged change. It's also the top all-channel GA4 landing page (582 users), but that traffic is mostly paid.
/uv-cured-pipe-lining/	435 impr.	not in top list	30d	Newly visible. "uv cured pipe repair phoenix az" 17 @19 (28d).
"sewer lining maricopa az"	20 @9	@21	28d	Aug 25-28 city work; title changed again Sep 16 (after window).
"buckeye az water line repair" · "sewer line repair queen creek"	29 @16 · 17 @12	@29 · @29	28d	Sep 1 thin-page buildouts (Buckeye rewrite, Queen Creek content).
Positions 1-3 query count	24	16	30d	Mostly 1-5 impression long-tail terms, e.g. "pipe relining near me" 18 @1, "trenchless sewer line repair cost" 12 @3. Low volume.
Business Profile desktop Maps views	119	76	30d	No new reviews or posts in the window; cause not identifiable from the data.

4 Declining queries, pages and locations

Item	Current	Previous	Window	Likely cause (evidence)
Page-1 queries (pos. 4-10)	33	59	30d	Page-1 city terms slid to 11-20 (e.g. "florence pipe break repair" @4 to @15). The count also fell in the 7d window (20 vs 36), so the slide is still happening.
/buckeye/ impressions	360 @18	733 @20	30d	**Documented:** the Sep 1 rewrite removed "pipe break" wording and "buckeye pipe break repair" went to 0. A pipe-break section went live Sep 15 (after this window). Read it Sep 30.
"florence pipe break repair"	96 @15	@4	28d	/florence/ H1 is "Trenchless Pipe Repair in Florence, AZ | Pipeliners USA" and the body uses "pipe break" once (crawl Sep 16). Same pattern as Buckeye.
/tempe/ impressions	394	639	30d	Position improved (25 vs 31) while impressions fell. The Aug 31 rewrite narrowed the query set.
/cave-creek/ · /scottsdale/ · /gilbert/	46 · 22 · 119	173 · 162 · 244	30d	Cause not proven. All three return 200, are indexable and have a self-referencing canonical (checked Sep 16). Scottsdale's H1 is "Expert Plumbing Services in Scottsdale, AZ - Pipeliners USA", which doesn't match its trenchless title.
/sun-lakes/ · /paradise-valley/	121 @45 · 226 @26	228 @35 · 336 @27	30d	Sun Lakes has a bare city-name H1 (crawl Sep 16).
/epoxy-pipe-lining/	14 @68	125 @56	30d	Declining since July. Only 5 pages link to it from content. The title says "Homeowner's Guide | Pipeliners USA" with no Arizona or Phoenix wording.

Item	Current	Previous	Window	Likely cause (evidence)
7 blog/service URLs at 0 impressions	0	45–177 each	30d	/how-much-does-trenchless-pipe-lining-cost/ (147), /14-warning-signs.../ (177), /what-is-trenchless-pipe-repair/ (126), /whole-house-repipe/ (107), /corroded-pipes/ (62), /how-to-identify...tree-roots.../ (68), /sewer-camera-inspection-near-me-in-mesa-az.../ (45 @29). All return 200, are indexable and self-canonical today. Possible de-indexing. Unverified: needs URL Inspection.
/services/	49 @78	158 @67	30d	No H1 on the page (crawl Sep 16).
Non-branded Google clicks (Domain)	39	49	30d	Matches the drop in page-1 queries (59 to 33). Mobile position slipped most (37.4 to 43.1).
Homepage impressions (Domain)	952	1,292	30d	Clicks still rose (24 vs 21). 60 hidden OTTO links from the homepage point to 404 or 301 URLs (crawl Sep 16).
Mobile position	48.5	42.1	30d	Follows the site-wide slide; no mobile-specific cause found.
Business Profile direction requests	39	65	30d	No new reviews since Jul 5 and no posts since Jul 7 (checked Sep 14). Hydro Jetting isn't listed, and 12 of 23 listed services aren't offered.
Business Profile views (7d)	241	371	7d	Desktop search views 46 vs 123. One week is too short to call a trend.

5 Quick opportunities

28-day window (Aug 16 – Sep 12), positions from GSC. **Excluded from new edits:** pages changed Sep 15-16 (Tempe, Mesa, Gilbert, Fountain Hills, Fort McDowell, Maricopa, Litchfield Park, Buckeye). They go to Monitor so their changes can be measured. **Not worth chasing:** "buckeye gas line repair" (17 @16, a service Pipeliners doesn't offer), "pipelining florence or" (48 @12, Oregon) and "well repair fort mcdowell az" (28 @17, not offered).

Page	Keywords (impr. @ pos.)	Current state (crawl Sep 16)	Recommended change
`/florence/`	florence pipe break repair 96 @15 · florence water line repair 19 @15 · trenchless pipe repair florence 18 @9 · page 429 impr. @24 (30d)	Title "Florence, AZ Pipe Break & Water Line Repair | Pipeliners". H1 "Trenchless Pipe Repair in Florence, AZ | Pipeliners USA". "pipe break" appears once in the body.	**Content + H1:** use the Buckeye pattern. Add an H2 "Pipe Break Repair in Florence, AZ" with a 40-60 word direct answer and one FAQ about what to do when a pipe breaks. Set the H1 to "Pipe Break & Water Line Repair in Florence, AZ" to match the title. Keep the title (Kim kept it Sep 16).
`/phoenix/`	sewer pipe relining in phoenix 121 @40 · trenchless sewer repair in phoenix az 81 @49 · sewer line repair phoenix az 60 @50 · page 1,187 impr., 0 clicks	H1 is just "Phoenix". No Plumber schema. Only 6 pages link to it from content.	**H1 + answer block + links:** H1 "Trenchless Sewer Repair in Phoenix, AZ". Add a question H2 with a direct answer. Add contextual links to /phoenix/ from /what-is-cipp/ (5,670 impr.), /uv-cured-pipe-lining/ and /how-to-determine-if-you-have-an-underground-water-leak/ (1,493 impr.). Add the Plumber schema node the other city pages have.
`/chandler/` (East Valley)	sewer line repair in chandler az 191 @44 · trenchless sewer repair chandler 26 @32 · page 321 impr. @43	Title "Sewer Line Repair & Repiping". H1 "Trenchless Pipe Repair Experts ... | Pipeliners USA". Meta is about copper repiping.	**Focus keyword alignment:** use "sewer line repair in Chandler, AZ" in the title, H1, meta, first 100 words, a question H2 and the answer block (Step 8 method). Meta: "Sewer line repair in Chandler, AZ without trenching your yard. Free camera inspection. Call 480-535-6503."
`/hydro-jetting/`	hydro jetting phoenix 68 @76 · hydro jetting phoenix az 65 @74 · page 358 impr. @70	Title targets Phoenix. H1 "Professional Hydro Jetting Services in Arizona". Hydro Jetting isn't a Business Profile service.	Set the H1 to "Hydro Jetting Drain Cleaning in Phoenix, AZ". Add a "Hydro jetting vs snaking" direct answer. Add Hydro Jetting as a Business Profile service linking to this URL.
`/paradise-valley/`	trenchless sewer repair paradise valley 19 @20 · paradise valley trenchless sewer replacement 11 @20	226 impr. @26, 0 clicks	Align the title and H1 to "Trenchless Sewer Repair in Paradise Valley, AZ". Add links from /scottsdale/ and /fountain-hills/.
`/avondale/` · `/goodyear/`	avondale trenchless sewer replacement 11 @14 · goodyear trenchless sewer repair 11 @10	Bare city-name H1s, no Plumber schema	H1 "Trenchless Sewer Repair in Avondale, AZ" / "... in Goodyear, AZ". Add the Plumber node (without the rating, see section 6).
`/queen-creek/`	sewer line repair queen creek 17 @12 · trenchless sewer repair queen creek 15 @20	H1 "Queen Creek's No-Dig Pipe Lining Experts | Pipeliners USA" (uses "pipe lining", which breaks the brand rule)	H1 "Sewer Line Repair in Queen Creek, AZ". Add the keyword to the meta. Add a link from /san-tan-valley/.
`/epoxy-pipe-lining/`	epoxy pipe lining phoenix az 23 @30 · epoxy pipe lining mesa az 15 @26	125 to 14 impr. No AZ wording in the title. 5 linking pages.	Title "Epoxy Pipe Coating in Phoenix & Mesa, AZ | Pipeliners". Add a Phoenix Valley section with a real local project example (needs Scott's facts). Add links from /mesa/ and /phoenix/.
`/what-is-cipp/`	cipp lining 647 @75 · cipp installation 392 @62 · page 5,670 impr.	High impressions, national and informational	Don't rewrite for rank. Use its 50 inbound links and its traffic to link to the service pages: an "In the Phoenix Valley?" box linking to /mesa/, /phoenix/ and /free-sewer-inspection/.
Commercial and multifamily	commercial re-piping chandler 9 @50 · commercial pipe repair mesa az 2 @49	No commercial page. /commercial/ 301s to a monsoon blog post through slug guessing; /multifamily/ is a 404.	Build "Commercial & Multifamily Pipe Restoration in the Phoenix Valley" with a real HOA or multifamily case study and FAQ. It needs Scott's verified project facts first.

Page	Keywords (impr. @ pos.)	Current state (crawl Sep 16)	Recommended change
Reviews on service pages	–	No service page shows testimonials or project examples. The Business Profile has 123 reviews at 4.99★.	Show 2-3 real Google reviews that mention the service on /hydro-jetting/, /epoxy-pipe-lining/ and /what-is-cipp/. Ask for new reviews (none since Jul 5).

6 Technical and local SEO issues

Source: read-only crawl of all 122 sitemap URLs + 217 internal link targets + citation lookups on 2026-09-16 (full detail in `technical-local-findings.md`), plus GSC/Search Atlas data above. Phone numbers are reported, not judged: the site uses a GoHighLevel dynamic number pool by design.

Severity	Issue	Affected URL / listing	Evidence	Recommended correction
High	Lead attribution gaps	TAG CRM, GA4, website chat and forms	CRM tracks calls by source, but 10 of 69 leads (30d) are "Other" (all chats, no source), the 2 forms are source "google" (organic or paid unknown), and no lead records a landing page. GA4 shows only 2 organic key events against 4 CRM organic leads.	Pass UTM source and landing page into the chat widget and form submissions so they reach the CRM. Split source "google" into organic vs paid. Keep the number-pool script and tel: links untouched.
High	Unlisted phone number on citations	Birdeye; Ace DuraFlo installer directory; probably Superpages, Manta and EZlocal (blocked)	(480) 969-7978 with the correct 633 W 2nd Ave address (Birdeye JSON-LD, Ace DuraFlo page, fetched Sep 16)	Ask the owner what 969-7978 is. If it isn't a live tracking line, correct it to (480) 447-5345 on each listing.
High	Rating schema not shown on page and out of date	33 city pages (all except /phoenix/, /avondale/, /goodyear/, /san-tan-valley/)	aggregateRating 4.9 / 122 in OTTO schema, neither number visible. The Business Profile shows 4.99 / 123.	Either show a matching Google rating block on those pages and update the schema to 4.99 / 123, or remove aggregateRating. This reverses the Aug 19 "keep" decision, so Kim decides.
High	Missing or bare H1s	/services/ (none); /phoenix/, /avondale/, /goodyear/, /san-tan-valley/, /sun-city/, /sun-city-west/, /sun-lakes/ (city name only)	Crawl Sep 16. The first 4 city pages also have no Plumber schema.	Use "Service in City, AZ" H1s set in OTTO (it owns city H1s). Check OTTO's heading layer first, see Step 8.
High	Hidden broken links from the homepage	Homepage	60 hidden OTTO links: 21 return 404 (e.g. 34 fake `/service-areas/<city>/` URLs) and 39 return 301	Turn off the stale OTTO indexing link block. The homepage is protected, so ask Kim first.
High	Weak internal links to priority pages	/mesa/ (8 linking pages), /phoenix/ (6), /epoxy-pipe-lining/ (5)	Content links counted with nav and footer removed. For comparison, /epipe-restoration/ has 54 and /what-is-cipp/ has 43.	Add 5 or more contextual links each from high-impression posts (section 5).
High	Pages dropped to zero impressions	7 URLs listed in section 4	45-177 impressions each in the previous 30d, 0 now. Live check: 200, indexable, self-canonical.	Run URL Inspection on each (free GSC). Merge or improve per the Sep 12 indexing plan. Request indexing only after the fix.
Medium	Numbers in static HTML and schema that differ from the Business Profile number	63 pages (JSON-LD 480-535-6503); /epipe-restoration/ (schema 480-680-9480); /free-video-inspection/ (480-808-0337)	535-6503 and 680-9480 are known intentional numbers. 808-0337 isn't on any list. Paid-ad pages are protected.	Don't change anything. Owner confirms whether the schema phone should be 447-5345 and whether 808-0337 is a tracking line.
Medium	No commercial or multifamily page	/commercial/ (301 to a blog post through slug guessing), /multifamily/ (404)	Commercial and multifamily restoration is a priority service	Build the page (section 5), then add a real redirect or menu link.
Medium	Business Profile services and description mismatch	Business Profile 7809	12 of 23 listed services not offered, Hydro Jetting missing, "pipe bursting" in the description, last review Jul 5, last post Jul 7 (checked Sep 14). 0 new reviews in all windows.	Fix the services list and description, restart weekly posts and start a review request routine.
Medium	Hidden content remaining	Homepage (89-word cost comparison hidden on all screens); 7 posts (hidden OTTO "Related Pages"); 11 posts (hidden keyword headings); /do-gurgling-drains-indicate-a-bigger-issue/ (7 FAQ questions in schema that aren't on the page)	Crawl Sep 16	Roll back in OTTO (reversible). Remove the FAQ schema that has no visible FAQ. Homepage needs Kim's approval.
Medium	"Pipeliners USA" in on-page elements	57 titles, 18 H1s, 29 schema names	The brand rule is "Pipeliners"	Bulk-edit in OTTO in batches with a before/after snapshot.
Medium	Noindex page in the sitemap	/free-sewer-repair-estimate/ (paid-ad page)	noindex, nofollow and listed in sitemap.xml	Exclude it from the sitemap only; don't edit the page.
Low	Index counts not current	GSC Pages report	Last read 104 indexed (Sep 14). Search Atlas still shows sitemap_index with 126 submitted; the live sitemap has 122 URLs.	Re-read the GSC Pages report and resubmit sitemap_index.xml if the count stays stale.
Low	Redirect hops	http://www. (2 hops); https://www. with UTM drops the UTM	The Business Profile link is 1 hop and keeps its UTM	Point www to https://pipelinersusa.com in one hop that keeps the query string.

Severity	Issue	Affected URL / listing	Evidence	Recommended correction
Low	ROC license missing	/free-sewer-inspection/	ROC #362960 shows on 121 of 122 URLs	Add it to the page footer or CTA.
Low	Crawler blocking	Site-wide	Search Atlas crawlers get 403s and LiteSpeed reCAPTCHA; Search Atlas reports 8 5xx that couldn't be reproduced	Check GSC Crawl stats by response. Test GPTBot, PerplexityBot and ClaudeBot user agents.

7 Leads and business impact

What the CRM attributes (30d vs previous 30d)

- **Business Profile:** 24 vs 11 leads, all calls; **5 booked, $27,590** vs 4 booked, $15,350. It's the largest lead source (35% of 69 leads). The Business Profile API counted 20 calls in the same window; the CRM counts calls to the Business Profile tracking number, so the two differ.
- **Organic Search:** 4 vs 2 leads (3 calls, 1 chat); **3 booked, $17,600** vs 0 booked. 28d: 3 vs 3 leads, 2 vs 1 booked, $8,800 each. 7d: 1 vs 0.
- Together, Business Profile and organic produced **28 of 69 leads and 8 of 14 bookings** in the last 30 days, against Google Ads 4 leads and 1 booking.
- Google visibility behind it: 60 Google clicks (27 on the Business Profile link), 1,266 profile views, 20 profile calls.

Limits on the claim

- These are **CRM source attributions**, not proof a specific page or ranking produced the job. No lead records a landing page or query.
- "Organic Search" is a small number (4). One booking changes the value by thousands, so read it as direction, not a trend.
- 10 chat leads are "Other" and 2 forms are "google", so organic and Business Profile totals may be understated.
- Free-estimate requests: **Data unavailable**. CRM Value is the value entered on the lead, not collected revenue.
- Google Ads conversions (GHL Calls from Landing Page 10, Calls from ads 5, Job Completed 3, Jul 15 to Sep 12) count paid clicks only.

8 Prioritized action plan

Five actions most likely to lift qualified organic visibility and leads

1. **/florence/ pipe-break section + H1 alignment**: "florence pipe break repair" 96 impr. @15, #1 in the Phoenix rank tracker. It's the closest page-1 recovery on a page nobody touched Sep 15-16.
2. **/phoenix/ H1 + answer block + 5 links from high-impression posts**: 1,187 impressions, 0 clicks, H1 is "Phoenix", only 6 linking pages.
3. **Business Profile cleanup + review requests**: calls are the one lead-like number holding up, but directions are −40% and there have been no reviews since Jul 5.
4. **/chandler/ focus keyword alignment on "sewer line repair in Chandler, AZ"**: 191 impressions @44 on a page whose H1 and meta target something else.
5. **Send source and landing page with chats and forms into the CRM**: 10 chat leads (30d) have no source, and no lead shows which page it came from, so page-level SEO work can't yet be tied to booked jobs.

Priority	Exact action	Affected URL / listing / keyword	Supporting evidence	Expected benefit	Effort	Deadline
Do now						
P1	Ask the owner what (480) 969-7978 is; if it isn't live, correct Birdeye and Ace DuraFlo to (480) 447-5345	Birdeye, Ace DuraFlo (then Superpages, Manta, EZlocal)	Fetched listings show 969-7978	Consistent name, address and phone; no calls lost to a dead line	S	Sep 18
P1	Pass UTM source and landing page into chat and form submissions; split CRM source "google" into organic vs paid	Website chat widget, forms, TAG CRM	10 "Other" chat leads and 2 "google" forms (30d); no landing page on any lead	Page-level proof of which SEO work produces booked jobs	M	Sep 18
P2	Ask the 5 booked Business Profile customers and 3 booked organic customers from the last 30 days for a Google review	Business Profile 7809	CRM: 8 booked jobs from these sources; 0 new reviews since Jul 5	Fresh reviews on the source that produces the most leads	S	Sep 18
Do within 7 days						
P1	Add H2 "Pipe Break Repair in Florence, AZ" (direct answer + FAQ item); set H1 to "Pipe Break & Water Line Repair in Florence, AZ"	/florence/ · florence pipe break repair	96 @15 (was @4); "pipe break" once in body	Recover page-1 position on a high-intent emergency query	M	Sep 23
P1	Set H1 "Trenchless Sewer Repair in Phoenix, AZ"; add answer block and Plumber schema; add links from /what-is-cipp/, /uv-cured-pipe-lining/ and the underground leak post	/phoenix/ · sewer pipe relining in phoenix, trenchless sewer repair in phoenix az	1,187 impr. @55, 0 clicks; 6 linking pages	Move Phoenix terms from 40-50 toward page 2	M	Sep 23
P1	Business Profile: add Hydro Jetting and remove the 12 services not offered; take "pipe bursting" out of the description; post weekly; send review requests to recent jobs	Business Profile 7809	Directions −40% (30d); 0 new reviews; last post Jul 7	More map actions and calls	M	Sep 23
P2	Decide on aggregateRating: show the Google rating and set 4.99 / 123, or remove it from city schema	33 city pages (OTTO)	4.9 / 122 not visible on page	Removes a structured-data guideline risk	S	Sep 23
P2	Add H1 to /services/; replace bare city H1s	/services/, /avondale/, /goodyear/, /san-tan-valley/, /sun-city/, /sun-city-west/, /sun-lakes/	Crawl Sep 16; /services/ 158 to 49 impr.	Clear topic signal on 7 pages	S	Sep 23
P2	URL Inspection on the 7 zero-impression URLs; record indexed yes/no	Section 4 list	45-177 impr. to 0	Confirms whether they were de-indexed	S	Sep 23
Do within 30 days						
P1	Align "sewer line repair in Chandler, AZ" across title, H1, meta, intro, question H2 and answer block (Step 8 method)	/chandler/	191 @44; H1 and meta off-topic	East Valley page moves toward page 1-2	M	Oct 16
P2	Build a Commercial & Multifamily Pipe Restoration page with a verified case study and FAQ	New URL; fix the /commercial/ slug-guess redirect	No commercial page; priority service	A page that can rank for HOA, property manager and commercial searches	L	Oct 16
P2	Align /hydro-jetting/ H1 to Phoenix; add review snippets and a Phoenix FAQ	/hydro-jetting/ · hydro jetting phoenix az	65-68 impr. @74-76	Local relevance for a priority service	S	Oct 16
P2	Retitle /epoxy-pipe-lining/ for Phoenix and Mesa; add a local project section and links from /mesa/ and /phoenix/	/epoxy-pipe-lining/	125 to 14 impr.; 5 linking pages	Halt the decline	M	Oct 16
P3	Turn off the hidden homepage OTTO link block and remove the hidden cost section (Kim's approval)	Homepage	21 404s + 39 301s hidden	Removes broken-link and hidden-content signals	S	Oct 16
P3	Replace "Pipeliners USA" with "Pipeliners" in titles, H1s and schema	57 titles, 18 H1s, 29 schema names	Brand rule	Consistent entity name	M	Oct 16
Monitor						
Watch	Clicks, position and titles/H1 still live (OTTO override check)	/tempe/, /mesa/, /gilbert/, /fountain-hills/, /fort-mcdowell/, /maricopa/, /litchfield-park/	Changed Sep 15-16, 0 clicks at baseline	Proves or disproves the Step 7/8 method	S	Sep 23 · Oct 9
Watch	"buckeye pipe break repair" returns to results	/buckeye/	Pipe-break section live Sep 15	Confirms the fix to reuse on Florence	S	Sep 30
Watch	Count of queries in positions 4-10 (weekly)	Site-wide	59 to 33 (30d)	Early warning for the slide	S	Weekly
Watch	Business Profile calls and directions (weekly)	Business Profile 7809	Directions −40%	Tracks the listing cleanup	S	Weekly
Watch	CRM leads and bookings from Organic Search and Business Profile (weekly, Arizona dates)	TAG CRM Lead Manager	30d: Business Profile 24 leads / 5 booked; Organic 4 / 3	Ties ranking work to booked jobs	S	Weekly

9 Final decision

What is currently helping Pipeliners rank?

The Business Profile: 123 reviews at 4.99★, heatmap average rank 1.1-3 around Mesa, views +18.7%, and the top CRM lead source (24 leads, 5 booked, $27,590 in 30 days). Brand searches at positions 1-2 (branded clicks 21 vs 14). City pages with location-specific trenchless and pipe-break wording that reach positions 5-20 in outer cities (Florence, Buckeye, Fort McDowell, Maricopa).

What is preventing further growth?

Non-branded clicks fell 20% (39 vs 49) as page-1 queries dropped from 59 to 33. The core markets are stuck on pages 4-6: Phoenix terms at 40-50, "sewer line repair in mesa az" at @47. Several priority pages have off-topic or bare H1s and few content links. There's no commercial page, the Business Profile services list is wrong, and chat and form leads reach the CRM without a source or landing page.

Which page or keyword offers the fastest opportunity?

/florence/ for "florence pipe break repair": 96 impressions @15, recently @4, #1 in the Phoenix rank tracker, and a proven fix pattern from Buckeye.

What should the SEO team do first?

Confirm the (480) 969-7978 listings, since the Business Profile and citations drive the most leads. Then ship the Florence pipe-break section and H1 once Kim approves.

What should be monitored during the next seven days?

Titles and H1s on the 7 pages changed Sep 15-16 still showing (OTTO can override them) and their first clicks · whether "buckeye pipe break repair" comes back · non-branded Google clicks and the count of queries in positions 4-10 · CRM Organic Search and Business Profile leads and bookings · Business Profile calls and directions · index status of /sewer-line-maintenance/ · no new 404s.
