Alphalete Trenchless

Google Page Indexing Report

Property: https://alphaletetrenchless.com/
Source: Search Console → Indexing → Pages (All known pages)
Reporting window: 2026-07-18 → 2026-08-14 (GSC data available through 2026-08-07 — see note)
Prepared: 2026-08-15

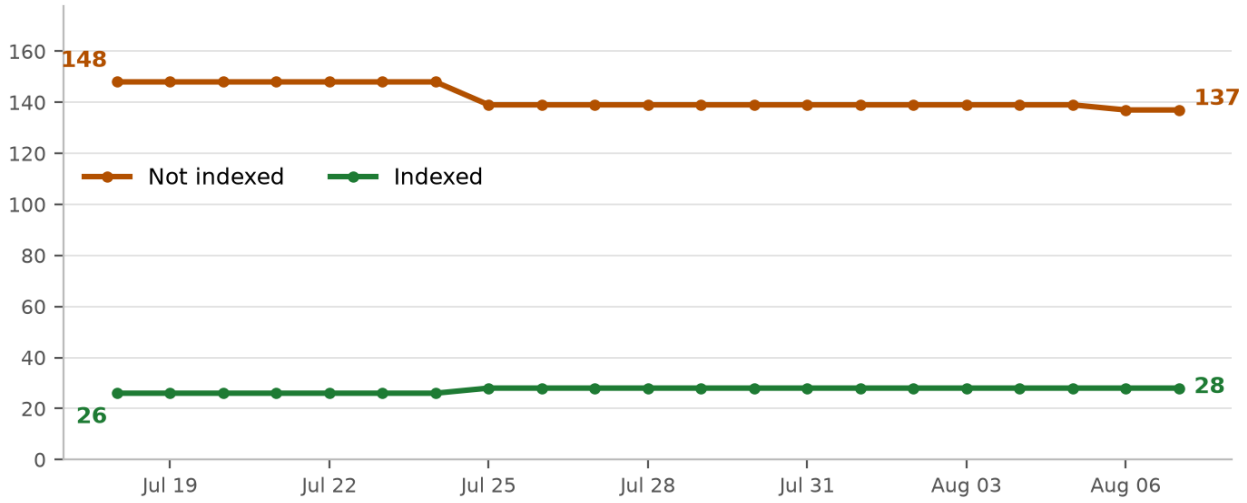
Index Status — Start vs. End of Window

Index Status	Jul 18	Aug 7 (latest)	Change
Indexed	**26**	**28**	**+2**
Not indexed	148	137	–11
Total known pages	**174**	**165**	**–9**

The headline: indexing barely moved — indexed inched up 26 → 28 while the site is carrying **137 not-indexed URLs**, the vast majority in one bucket: **123 "Discovered – currently not indexed"**. Google knows these URLs exist (from the sitemap) but has *never crawled them* (last crawled 1970-01-01). That is the single biggest issue on this site.

Pattern worth investigating: the 28 indexed pages are mostly *flat* URLs (e.g. /cast-iron-vs-pvc-sewer-pipe/), while the discovered-not-indexed set is the *nested* structure (/blog/…, /services/…, /service-areas/…). This looks like a URL restructure where Google indexed the old flat paths and hasn't picked up the new nested ones — check for canonical/duplicate conflicts between the two.

Daily Trend — Indexed vs. Not Indexed (Jul 18 – Aug 7)



Not-indexed reconstructed by summing the exported per-reason drilldowns (dominated by the 123 discovered pages). Indexed is flat near 28; the gap is the crawl/indexing backlog.

Not Indexed — Pages by Reason (with permalinks)

Current not-indexed pages from the per-reason GSC drilldowns. Ordered most-actionable first.

Discovered - currently not indexed — 123 pages [Worth working on]

The core problem. Google discovered these via the sitemap but has never crawled them (last crawled 1970-01-01). Levers: internal links FROM the 28 indexed pages TO this new structure, resubmit/validate the sitemap, Request Indexing on priority service & service-area pages, and confirm these URLs aren't being canonicalized to the old flat versions.

Crawled - currently not indexed — 4 pages [Worth working on]

Crawled but not indexed yet — down from 14 on Jul 18 to 4, so some are clearing. Strengthen internal links and content depth on these.

- https://alphaletetrenchless.com/services/rehabilitation-services
- https://alphaletetrenchless.com/service-areas/loveland-co
- https://alphaletetrenchless.com/service-areas/greeley-co
- https://alphaletetrenchless.com/about-us

Not found (404) — 7 pages [Cleanup]

Old /service-areas/{city}-co URLs and wildcards returning 404. Fine if intentionally retired, but add 301 redirects to the new equivalents so any external links and residual authority carry over.

- https://alphaletetrenchless.com/service-areas/denver-co
- https://alphaletetrenchless.com/service-areas/pueblo-co
- https://alphaletetrenchless.com/service-areas/colorado-springs-co
- https://alphaletetrenchless.com/service-areas/grand-junction-co
- https://alphaletetrenchless.com/wp-*.php
- https://alphaletetrenchless.com/*
- https://alphaletetrenchless.com/service-areas/arvada-co

Page with redirect — 2 pages [Expected / healthy]

Correctly redirecting to a live page. No action needed.

- https://alphaletetrenchless.com/reviews
- https://alphaletetrenchless.com/service-areas/broomfield-co

Excluded by ‘noindex’ tag — 1 page [Expected / intentional]

An admin-ajax popup endpoint kept out of the index. No action needed.

- https://alphaletetrenchless.com/wp-admin/admin-ajax.php?action=pix_get_popup_content

---

Note: Alphalete's site-wide Coverage summary export was not included — only the per-reason drilldowns and the Valid (indexed) export. The not-indexed totals above are the sum of the five exported reasons, so if GSC lists any additional reason the true total could be slightly higher. Re-export the top-level Pages CSV to confirm.

Appendix — Indexed Pages (28 URLs)

Full list of currently indexed URLs from the “Valid” export, most recently crawled first.
