Company Master Profile · as of October 1, 2026

Alphalete Trenchless Services

The single source of truth for anyone writing, ranking or selling for Alphalete: AI agents, content writers, SEO specialists and new team members. Built from every recorded work session and verified site, GSC, Ads and official-source checks. Where something was never confirmed, it says so.

[Verified] live site, GSC, Ads or official source ***[Client-stated]*** Client's own copy or knowledge base ***[Unconfirmed]*** ask the Agency owner or Client before use ***[Do not use]*** prohibited or known wrong

---

1. Basic company information

Company name
Alphalete Trenchless Services *[Verified]*
Used on the site, logo and trucks. Google Business Profile name is "Alphalete Trenchless Sewer & Drain Rehabilitation"; schema uses that GBP name with "Alphalete Trenchless Services" as the alternate name. Other names seen in the wild: Alphalete Mechanical LLC (license holder), Alphalete Companies.

Sister company
Alphalete Plumbing (alphaleteplumbing.com, GBP "Alphalete Plumbing & Drain"), same suite. It handles traditional plumbing; Alphalete Trenchless specializes in CIPP lining and diagnostics. Keep the two brands distinct in all copy and listings. *[Verified]*

Website
https://alphaletetrenchless.com (WordPress + Elementor)

Industry
Sewer and drain rehabilitation; trenchless sewer repair and cured-in-place pipe (CIPP) lining

Business type
Service-area business with a physical office; residential (B2C) and commercial / municipal (B2B)

Years in business
Not documented *[Unconfirmed]*
The sister plumbing company dates to 2015 (BBB). The trenchless company's own start date is unknown. Do not state a number of years.

Main office
716 Clark Pl, Ste 160, Colorado Springs, CO 80915 *[Verified]*

Service areas
Colorado Springs and the Front Range, including the Denver metro. 44 city pages live (see section 11). True service radius *[Unconfirmed]*

Phone
No single official number yet *[Unconfirmed]*
Site displays (719) 787-7746 (a WhatConverts call-tracking number). Schema lists (719) 650-2273. The Search Atlas knowledge graph lists (720) 807-3224. Never type a number into page copy; link to the Contact page.

Email
team@alphaletetrenchless.com

Business hours
GBP shows "open 24 hours" *[Unconfirmed]*

Emergency / after-hours
Not confirmed. Do not claim 24/7 or emergency service. *[Do not use]*

2. Products and services

Main services (5 service pages)

- **Residential trenchless pipelining** (sewer pipe lining, CIPP) *[Verified]*
- **Commercial trenchless pipelining** / commercial sewer line repair *[Verified]*
- **Sewer camera inspection** *[Verified]*
- **Hydro jetting** *[Verified]*
- **Drain cleaning** *[Verified]*

Methods (not separate services)

- CIPP relining, sectional point repair
- Pipe bursting: described as a method; offered as a service *[Unconfirmed]*

Priority to promote

- Residential CIPP / no-dig sewer repair. Every Google Ads conversion in the 12 months before June 2026 came from Residential CIPP campaigns.
- Sewer camera inspection as the entry point (lead hook)
- Commercial sewer line repair (municipal, school districts, property managers, HOAs)

Most profitable

Not provided. Average job value and margins are unknown. *[Unconfirmed]*

Not offered (never imply)

- Home inspection, spore/mold detection, gas line repair *[Do not use]*
- Faucet, toilet, shower, water heater, leak detection (listed on the GBP by mistake) *[Do not use]*
- Directional drilling, drainfield / leach field, repiping

Ask before writing about

- Commercial drain cleaning, backwater valves, in-home epoxy lining, water line repair, storm drain repair, pre-purchase sewer scopes, manhole rehab, installations *[Unconfirmed]*

Residential / commercial
Both

Equipment and technology
HammerHead Bluelight LED curing system for CIPP liners *[Client-stated]*; HD sewer camera inspection; hydro jetting rigs

3. Ideal customers

Residential

- Homeowners in Colorado Springs, Denver metro and Front Range towns
- Older homes with clay, cast-iron or Orangeburg sewer laterals (pre-1970s; Littleton about 3 in 10 homes are pre-1970)
- Homes with finished landscaping, driveways or mature trees they do not want dug up
- Home buyers and sellers who need a sewer scope before closing
- Rural owners on septic (Black Forest area) for drain and camera work

Commercial and municipal

- School districts and facilities directors (outreach target; one district was planning a sewer lining bid)
- Property managers, apartment and HOA boards
- Restaurants, retail, office and industrial properties
- Municipal infrastructure owners

What triggers contact

- A backup, slow drains or sewage smell
- A failed camera or sewer scope during a home sale
- A plumber or snake that keeps clearing the same clog
- Monsoon-season storm backups (July to August)
- A quote for excavation they want to avoid

Customer age and income ranges have never been researched. Treat any demographic claim as unconfirmed.

4. Customer problems and pain points

- Recurring sewer backups and slow drains
- Tree-root intrusion through joints
- Cracked, corroded or scaled cast-iron pipe
- Clay pipe joint separation and offsets
- Orangeburg (fiber) pipe deforming or collapsing
- Bellied (sagging) sewer lines. Note: a belly needs the sagged section dug and re-laid; lining does not fix it.
- Pipe damage from expansive clay soil and freeze-thaw
- Gurgling toilets, basement floor drain backups, sewage smell
- Not knowing who owns the line (owner vs city); in most Front Range cities the owner is responsible up to and including the tap at the main
- Fear of a large, unexpected repair bill
- Fear of a torn-up yard, driveway or business shutdown
- Not knowing what is wrong until someone looks inside the pipe

5. Customer goals

- Find out exactly what is wrong and where, with camera footage they can see
- Fix the line for the long term instead of clearing the same clog again
- Avoid digging up the yard, driveway, landscaping or a business floor
- Get a clear price before work starts
- Get the line back in service quickly with minimal disruption
- Protect the property value and pass a home sale inspection
- For commercial owners: keep tenants and operations running during repair

6. Unique selling proposition

Colorado Springs' trenchless specialist: a team that only does sewer rehabilitation, looks inside the pipe first, explains the options honestly, and repairs the line without digging up the property.

Specialization
Trenchless team focused exclusively on CIPP lining and diagnostics; separate from general plumbing *[Client-stated]*

Technology
HammerHead Bluelight LED curing (marketed as faster, stronger cures) *[Client-stated]*; HD camera inspection

Process
Camera inspection first, then a repair plan, then upfront pricing *[Client-stated]*

Warranty
20-year warranty on work *[Client-stated]*. Wording must be cleared by the Agency owner before use. "50+ year" lifespan claims *[Do not use]*

Years of experience
Unknown *[Unconfirmed]*

Certifications
None documented. A PPRBD license is held under Alphalete Mechanical LLC *[Unconfirmed]*

Financing
Unknown *[Unconfirmed]*

Response time
Unknown; do not claim same-day *[Unconfirmed]*

Local
Office in Colorado Springs; crews also serve the Denver metro *[Verified]*

Guarantees
"100% Satisfaction Guaranteed" badge exists on one page, held for review *[Unconfirmed]*

7. Competitive positioning

No formal competitor study has been run. These are the competitors seen in real data.

Who	Where seen	What they do well
Alphalete Plumbing & Drain (sister)	Google Maps, Nextdoor, PR coverage	About 300 reviews vs about 16; ranks for trenchless map searches in Colorado Springs and earned the trenchless PR links. Same suite, so Google confuses the two.
simplysewersdenver.com	Denver organic search	About 23.7K monthly traffic, 352 referring domains (mostly citations: BBB, YP, Superpages)
nuflow.com	AI answer citations	Top cited domain for trenchless questions; Alphalete was #2 in citation share in July
Denver brands in Ads search terms (5280 Pipeline, Mile High Plumbing)	Google Ads search terms	Brand demand in Denver; added as negatives
HomeAdvisor, Angi	Cost-query results	Own "cost" searches; never link to them

Where Alphalete differs
Trenchless-only specialist with Bluelight LED curing; camera-first diagnosis; commercial and municipal capability

Competitors offer, Alphalete does not
General plumbing, water heaters, leak detection (sister company covers these)

Pricing position
Not set. Positioning is "transparent, upfront pricing after inspection", not budget. Average Ads CPC is about $14. *[Unconfirmed]*

Geographic advantage
Colorado Springs office with Denver reach; few local trenchless specialists in small Front Range towns

Biggest gap
Authority: GSC shows 1 external link, Search Atlas authority 2/100, no BBB, Yelp or YP listing for the trenchless brand

8. Brand personality

- **Honest and straightforward.** Never sells an unneeded repair.
- **Expert.** Technical knowledge explained in plain language.
- **Modern.** Camera diagnostics and LED-cured liners.
- **Local.** Knows Colorado soil, frost and city rules.
- **Professional and calm.** Reassuring during a stressful backup.
- **Respectful of property.** No-dig first.

Taglines in use
"Colorado's CIPP Lining Experts" and "Colorado's Premier Sewer Rehabilitation Experts" *[Client-stated]*

Visual identity
Navy #1A1B5E with orange #F06F23 / #E57300 on white. Oswald headings, Montserrat body. Imagery shows real, no-dig field work, never digging or excavation, never an obviously AI look.

9. Brand voice

Formality
Conversational professional; homeowner-friendly

Language
Simple first, technical term second (say "no-dig sewer pipe lining", then explain CIPP)

Length
Answer the question in the first sentence, then give detail

Use often
no-dig, trenchless, pipe lining, camera inspection, repair plan, upfront pricing, Colorado Springs, Front Range, sewer line, long-term fix

Avoid
cheapest, best, #1, guaranteed, lifetime, 24/7, same-day, "free" (until cleared), dollar amounts, "50 years", em dashes, second-person sales pressure

Use
"Our team runs a camera through the line, shows you what we find, and recommends the repair that fits the pipe and your property."

Avoid
"Guaranteed cheapest sewer repair in Colorado, lasts 50+ years, call 24/7!"

10. Company values

Integrity First
Total transparency; never sell an unneeded repair *[Client-stated]*

Innovative Solutions
Modern trenchless technology such as Bluelight LED curing *[Client-stated]*

Uncompromising Quality
Do the job right the first time *[Client-stated]*

Also shown in practice
Customer education (show the camera footage), respect for property, long-term solutions

11. Geographic identity

Primary city
Colorado Springs (El Paso County)

Secondary metros
Denver, Pueblo, Castle Rock, Parker, Littleton, Lone Tree, Monument, Fountain, Cañon City, Woodland Park, Security-Widefield

Counties
El Paso, Denver, Douglas, Arapahoe, Jefferson, Elbert, Pueblo, Fremont, Teller, Park, Custer

All 44 city pages
Black Forest, Boone, Buffalo Creek, Calhan, Cañon City, Cascade, Castle Rock, Coal Creek, Colorado Springs, Cripple Creek, Denver, Elbert, Elizabeth, Florence, Florissant, Fountain, Franktown, Green Mountain

Falls, Guffey, Kiowa, Lake George, Larkspur, Littleton, Lone Tree, Louviers, Manitou Springs, Matheson, Monument, Palmer Lake, Parker, Penrose, Peyton, Pine, Pueblo, Ramah, Rockvale, Security-Widefield, Sedalia, Simla, USAF Academy, Victor, Wetmore, Woodland Park, Yoder

Service radius
Not confirmed. GBP lists the whole state plus Aspen, Grand Junction and Fort Collins, which is wrong. Aurora, Aspen, Snowmass and Basalt are unconfirmed. *[Unconfirmed]*

Local conditions to write about (verified sources)

- **Expansive bentonite clay soil** along the Front Range (Colorado Geological Survey calls swelling soil a major geologic hazard) shifts and cracks pipe
- **Freeze-thaw and frost heave**; metro frost depth about 36 inches
- **Monsoon storms** in July and August overload lines and cause backups
- **Older clay, cast-iron and Orangeburg laterals** in 1950s to 1970s neighborhoods
- **Owner responsibility rules**: Colorado Springs Utilities, Denver, Pueblo, Littleton, Fountain, Monument, Woodland Park and others make the owner responsible for the service line, often including the tap at the main in the street (exact official wording is on file per city)
- **Septic** in rural El Paso County areas; do not claim "almost all of Black Forest is septic"

12. SEO identity

Keyword ownership (one owner page per keyword)

Keyword	Volume / mo	Owner page
trenchless sewer repair	national	Homepage
trenchless pipe repair	8,100	/services/
CIPP pipe lining, residential sewer pipe lining, no-dig sewer repair	4,400 / 110	/services/residential-trenchless-pipelining/ (retarget planned)
commercial sewer line repair	140	/services/commercial-trenchless-pipelining/
hydro jetting colorado springs	10	/services/hydro-jetting/
sewer camera inspection colorado springs	10	Camera CS blog (pos ~8); service page targets "Colorado"
drain cleaning colorado springs	140	/services/drain-cleaning/
sewer line repair colorado springs; trenchless sewer repair denver	40 / 40	/colorado-springs/, /denver/
trenchless sewer repair pros and cons	90	/blog/trenchless-vs-traditional-sewer-repair/
is trenchless sewer repair worth it	n/a	/blog/trenchless-sewer-repair-pros-and-cons/
who is responsible for sewer line repair	79	/blog/who-is-responsible-for-sewer-line-repair-colorado/

Money keyword opportunities

- cast iron pipe lining (720)

- sewer pipe lining cost (1,000), cipp lining cost (480): needs cost-factors content without prices
- what is cipp lining (110): no page yet
- orangeburg pipe (8,100 head; "what is orangeburg pipe" 260)

Currently ranking (Sep 2026, US)

- /colorado-springs/ #1 for "no dig sewer repair colorado springs"
- /woodland-park/ about #4 for core terms
- Parker 9 to 11, Littleton 10.7, Denver 12.7 to 13.3
- Camera CS blog about #8; hydro CS blog about #10
- What-is-trenchless blog fell from ~25 to ~70 on Sep 16 (decision Oct 2)

Avoid (cannibalization or junk)

- "trenchless sewer repair" as a target on any page but the homepage
- New city pages or national blog chasing
- Home inspection, spore detection, gas line queries the city pages leak into
- Any keyword already owned in the table above

Important service pages
/services/, /services/residential-trenchless-pipelining/, /services/commercial-trenchless-pipelining/, /services/sewer-camera-inspection/, /services/hydro-jetting/, /services/drain-cleaning/

Location pages
44 root city pages, one primary service each (for example /colorado-springs/, /denver/, /black-forest/)

Blog
About 50 posts under /blog/, one category ("Articles"). Topic clusters: trenchless and CIPP; cast iron; Orangeburg and clay pipe; hydro jetting; drain symptoms; camera and scope inspections; Colorado conditions (clay soil, frost heave, monsoon); ownership, insurance and cost factors; commercial, property managers and HOAs; Denver.

Baseline
Case study Day 1 = June 1 2026. June: 2,352 impressions, 16 clicks, 28 page-one queries. Sep 1 to 22: 16,251 impressions, 21 clicks, 116 real page-one queries. Report US only.

13. AEO / GEO topics

Questions Alphalete should be the trusted answer for. Answer each in the first sentence; local versions name the city.

- What is trenchless sewer repair?
- What is CIPP lining and how does it work?
- How long does a CIPP liner last? (no year figures)
- Is pipe lining cheaper than replacement?
- Trenchless vs traditional sewer repair: pros and cons
- CIPP vs pipe bursting: which does my line need?
- Can cast-iron pipes be relined?
- How long does trenchless sewer repair take?

- What does a sewer camera inspection find?
- Should I get a sewer scope before buying a home?
- What is Orangeburg pipe, and does my house have it?
- Can tree roots be removed and the pipe repaired?
- Can a bellied sewer line be fixed without digging?
- What is hydro jetting, and how often should I do it?
- Is hydro jetting safe for cast-iron pipes?
- Why does my sewer back up when it rains?
- Who is responsible for the sewer line in Colorado Springs, Denver and other cities?
- Does homeowners insurance cover sewer line repair?
- How does expansive clay soil damage sewer pipes?
- What causes frost heave damage to sewer lines?
- What are the signs a sewer line needs repair?
- Why is my toilet gurgling?
- How do HOAs and property managers handle shared sewer lines?

14. Sales information

Average job value
Not provided *[Unconfirmed]*

High-value services
Residential and commercial CIPP lining

Sales cycle
Residential: emergency or near-emergency, short. Commercial and municipal: longer, bid-based (a school district was preparing a sewer lining bid). Close rate unknown.

Financing
Unknown *[Unconfirmed]*

Process
Inquiry, then camera inspection, then repair plan, then upfront price, then repair *[Client-stated]*

Lead hook
Initial camera inspection. Saying "free" needs sign-off. *[Unconfirmed]*

Lead capture
Website quote form ("Get My Free Quote") on the homepage, Contact and /services/; phone calls tracked by WhatConverts; Google Ads landing pages /pipelining/ and /free-sewer-inspection/

CTAs in use
Schedule Service · Get a Repair Quote · Book Camera Inspection · Book Hydro Jetting · Book Drain Cleaning · Get a Commercial Quote · Contact us

Paid search
Aug 11 to Sep 7 2026: $3,336 spend, 21 conversions, about $159 per conversion. Denver campaigns convert cheaper than Colorado Springs.

15. Customer objections

Objection	Approved answer angle
Is trenchless repair expensive?	Cost depends on pipe length, diameter, depth, access and condition; the camera inspection sets the plan and an upfront price. Compare total cost including yard, driveway and landscape restoration. No dollar figures.
Will you dig up my yard?	Most lining needs only existing access points such as a cleanout. Some problems, like a belly, need a small excavation; the inspection shows which.
How long will it take?	Many residential linings are completed quickly with little disruption; give the timeline after inspection.
Can my existing pipe be repaired?	Cast iron, clay and many damaged pipes can be lined if the camera shows the host pipe can hold a liner; collapsed or sagging sections may need bursting or replacement.
Is pipe lining permanent?	The liner is engineered for a long service life; confirm warranty terms with the estimate. No year counts.
Is this the city's responsibility?	In most Front Range cities the owner is responsible up to and including the tap; cite the city's own rule.
Will insurance cover it?	Standard policies often exclude wear and roots; a sewer line endorsement may help. Point to the insurance article; never promise coverage.
Do I really need this repair?	Show the footage; the company does not sell repairs a line does not need.

16. Trust signals

Google rating
4.9 stars, about 15 to 16 reviews (GBP unverified; the "Rated on Google" badge links to the correct listing) *[Verified]*

Licenses
PPRBD license under Alphalete Mechanical LLC *[Unconfirmed]*

Insurance
Not documented *[Unconfirmed]*

Certifications, associations, awards
None on record. Possible future memberships: NASSCO, trade directories, Colorado Springs builders association

Warranty
20-year warranty *[Client-stated]*, wording held for the Agency owner

Equipment proof
HammerHead Bluelight LED curing *[Client-stated]*

Case studies / projects
None yet. Request 3 recent jobs with photos and camera stills from the Client.

Never use
Invented reviews, invented job examples, staff-written reviews as social proof

17. Claims and restrictions

Approved

- Trenchless sewer repair and CIPP pipe lining specialists
- Camera inspection before any repair recommendation
- Clear, upfront pricing after inspection (no figures)
- No-dig or minimal-dig repair that protects yards and driveways
- HammerHead Bluelight LED curing
- Residential and commercial service; based in Colorado Springs, serving the Front Range and Denver metro
- Sister company to Alphalete Plumbing, focused only on trenchless work
- Facts cited to official sources (CSU, city code, Colorado Geological Survey, EPA, NASSCO)

Prohibited or unverified

- Any price, cost range or dollar figure
- Phone numbers in body copy or meta descriptions
- "50+ years" or any lifespan in years; "lifetime"
- Warranty terms until the wording is cleared
- "Free" inspection or estimate until cleared
- 24/7, emergency, same-day
- Cheapest, best, #1, guaranteed results, 100% satisfaction
- Years in business, licensed and insured, financing
- Services not confirmed (section 2)
- That lining fixes a bellied line
- Invented local facts, reviews or projects

18. Content guidelines

Page structure

H1 matches the focus keyphrase. Answer-first intro, then question-style H2s each answered in the first sentence, then a local section, then FAQ, then CTA to Contact.

Keyphrase

One per page: in the H1, first sentence, about 3 times in the body, and the meta. Never change a slug to match a keyphrase.

Length

Blog posts about 1,500 to 1,800 words; service hubs 1,200 to 1,500. Write to cover the question, not to a count.

FAQ

4 to 6 real questions with answer-first replies, as editable Elementor accordions; FAQ schema must match visible text.

Internal links

Link to the owning service page and the matching city page at /{city}/; link 2 to 3 related blogs; no "Read More" links; no links to other TAG clients.

External sources
At least one official source (.gov, .edu, city code, CSU, CGS, EPA, NASSCO), checked live and supporting the claim. Never competitors or aggregators.

CTA placement
After the first answer section and at the end; link to /contact/, never a typed phone number

Schema
Plumber / LocalBusiness and Service schema come from the site; FAQPage only when it matches visible FAQs

Meta
Focus keyword first, under 155 characters, no phone, price or warranty

Images
Real-looking no-dig field work matched to the section; blog featured images in the navy and orange Alphalete frame with the real logo; descriptive alt text

Tone and reading level
Plain English for homeowners, about grade 8; explain technical terms on first use; no em dashes; no named staff

Approval
Drafts first; nothing goes live without approval

19. Business goals

- Increase qualified organic leads (forms and tracked calls), measured in GA4 and WhatConverts
- Rank residential CIPP and no-dig sewer repair pages in Colorado Springs and the Denver metro
- Generate commercial and municipal lining projects
- Improve Google Maps visibility once the GBP is verified and corrected
- Build authority: citations, trade directories, real backlinks, separation from the sister brand
- Reduce dependence on paid search (about $159 per Ads conversion)
- Become the cited source in AI answers for Colorado trenchless questions

20. Priority hierarchy

Proposed from the September 2026 strategy; confirm with the Agency owner.

1. **Generate qualified leads.** Working forms and call tracking on every money page come first.
2. **Rank residential CIPP and no-dig repair** in Colorado Springs and Denver, the highest-value service.
3. **Improve local visibility.** Fix and verify the GBP, earn reviews, build citations with one NAP.
4. **Build topical authority** on Colorado sewer problems, owned one keyword per page.
5. **Win commercial and municipal work** through the commercial hub and outreach.
6. **Brand awareness and AI visibility**, kept separate from the sister plumbing brand.

?. Open questions for the Client

Filling these in makes the profile complete. Until then, treat the related items as unconfirmed.

- One official phone number for NAP and listings
- Years in business, licenses, insurance, certifications, associations
- Real business hours; is emergency or 24/7 service offered?
- Service radius; Aurora, Aspen, Snowmass, Basalt?
- Pipe bursting, commercial drain cleaning, backwater valves, epoxy lining, water line, storm drain, pre-purchase scopes?
- Warranty wording; can "free inspection" be said?
- Financing; average job value; close rate; most profitable service
- 3 recent jobs with photos and camera stills; customer testimonials
- Registered legal name and GBP name; any ownership change

Sources: live site checks, Google Search Console (US), Google Ads, Search Atlas, the Client's own knowledge base and About page, and official city and utility codes, gathered May to October 2026.
