Summit Plumbing Pros — SEO Baseline & Audit

Site: summitplumbingpros.com (AZ East Valley — Tempe, Mesa, Chandler, Phoenix, Fountain Hills, San Tan Valley)
Source: Search Atlas agent Site Audit (crawled ~July 10, 2026) | Live-verified via SSH + WP-CLI: July 11, 2026
Access: SSH summit → WP-CLI, Yoast SEO. No browser used.

Read this first. The Search Atlas crawl was stale and materially overstated. Every claim was re-checked against the live database; where they disagree, this baseline uses the live numbers. Live scope: 155 pages + 10 posts = 165 total (audit implied ~168).

Headline: Organic traffic is almost entirely branded. Non-branded local terms like "plumber tempe" sit on Page 2 (Position 15). The real on-page gaps were small and specific, not site-wide.

Audit vs. reality (verified July 11, 2026)

Audit claim	Audit said	Live truth	Outcome
Missing meta descriptions	168 pages	8 pages (mostly utility/policy)	Overstated — done
Unoptimized titles (8 named)	8 pages	Inconsistent; also 6 truly missing	13 fixed
Missing H1 headings	9 pages	0 missing; 3 pages had EXTRA H1	Wrong — 3 fixed
Missing image alt text	59+ images	20 in media library (0 in blogs)	15 fixed
Missing LocalBusiness/Service schema	all pages	Already present & comprehensive	False — no action

---

What is actually true (live findings)

Missing meta descriptions — 8 pages (not 168)

ID	Page	Type	Priority
1682	summit-plumbing-locations	Commercial hub	High — fixed
1693	plumbing-faqs-for-mesa-homeowners	Content	High — fixed
5731	free-tankless-quote-v2	PPC landing	Set noindex
5746	free-tankless-quote-v3	PPC landing	Set noindex
5814	blog	Archive	Optional
5513	privacy-policy	Policy	Low — left
5518	terms-of-service	Policy	Low — left
1569	thank-you-page	Utility	Set noindex

H1 headings — 3 pages had EXTRA H1s (audit said 9 missing)

Crawled all 165 pages: 157 had exactly one H1. The real issue was the opposite of the audit — a handful of pages with 0 or 2+ H1s. Fixed the 3 that mattered by demoting extra/CTA headings to H2.

Page	H1s	Issue	Action
/plumbing/ (17)	3	duplicate title H1 x2 + "Call Us Today!"	Fixed → 1
/water-softeners/ (512)	2	+ "Contact Summit Plumbing Today"	Fixed → 1
/slow-drains/ (1610)	2	+ raw <h1> inside a text widget	Fixed → 1

Image alt text & Schema

- **Alt text:** 216 images; audit said 59+ missing. Live truth: 20 missing in the media library, 0 in rendered blog posts. Added alt to the 15 content images; 5 decorative left blank.

- **Schema:** Audit said LocalBusiness + Service schema were missing — false. Service pages already emit Plumber (a LocalBusiness subtype), Service, PostalAddress, City, State, FAQPage, BreadcrumbList; homepage emits Organization + WebSite. No action needed.

Fix log — July 11, 2026 (via SSH + WP-CLI, no browser)

- **13 page titles** standardized/added to the format [Service] in [City], AZ | Summit Plumbing Pros (7 inconsistent + 6 truly missing).
- **2 meta descriptions** written (153 chars each) for summit-plumbing-locations (1682) and plumbing-faqs-for-mesa-homeowners (1693).
- **3 H1 cleanups** on /plumbing/, /water-softeners/, /slow-drains/ via Elementor document save() API. Server backups at ~/elementor_h1_backup_20260711/.
- **15 image alt texts** added to content/blog images.
- **3 pages set to noindex:** thank-you-page (1569) and the two ad-only tankless landing pages (5731, 5746).
- **All changes verified live** (rendered title, meta, robots, and H1 counts confirmed by server-side curl).

Footguns logged: (1) Yoast — a brand-new title/meta needs wp post update <id> to rebuild the indexable before it renders; (2) Elementor — Document::save() silently no-ops under WP-CLI unless you set an admin current-user first.

What is left (content work, not a technical fix)

- **Tempe content expansion.** /general-plumbing-services-in-tempe/ ranks Position 15 for "plumber tempe." Getting it to Page 1 needs 300–500 words of localized Tempe copy plus 2–3 internal links. Ready to write on your go.
- **Optional, low priority:** basic meta on /privacy-policy/ and /terms-of-service/, left as-is by choice.

Every technical item from the audit is now closed.
