FINAL THOUGHTS

You just consumed the most tactical, real-world AI SEO course available anywhere. Not because I'm the best writer or the smartest marketer — but because I actually do this stuff every single day and I showed you the receipts.

Let me be honest with you for a second.

Most people who buy this course will read it, nod along, bookmark it, and never execute a single thing. They'll tell themselves they need to "learn more first" or "wait until the timing is right" or "finish setting up their website." Six months from now, they'll be in the same position they are today.

Don't be that person.

I started with $450 a month in 2014. I didn't have a mentor, a course, a community, or any of the tools that exist today. I had a laptop, a WordPress site, and a willingness to try things that might not work. Ten years later: $3.4M in annual revenue, 10+ income streams, complete location independence, and a portfolio of SaaS products that generate revenue while I sleep.

The game has never been more in your favor than it is right now. AI search is brand new. ChatGPT has 100M+ daily users and most businesses haven't even thought about optimizing for it. Google AI Overviews are showing up above traditional results and 99% of SEOs are still optimizing like it's 2019. Reddit is

17

FINAL THOUGHTS

APPENDIX: ADDITIONAL RESO...

Every single strategy in this course — ChatGPT ranking, LLM citations, local SEO, parasite SEO, Reddit marketing — is wide open right now. In 12-18 months, these channels will be crowded. The tools will be more expensive. The platforms will be harder to game. The window of opportunity will be smaller.

You're reading this today. That's your advantage. Use it.

Your 30-Day Action Plan

Here's exactly what to do for the next 30 days. No thinking required. Just execution.

WEEK 1: FOUNDATION (Days 1-7)

- Day 1: Sign up for Ahrefs ($99/mo), LocalRank.so Pro, and ChatGPT Plus ($20/mo). Install Google Search Console and GA4 on your site. Total time: 2 hours.
- Day 2: Set up WordPress with the exact plugin stack from Module 9 (GeneratePress, Rank Math, WP Rocket, Schema Pro). Update robots.txt to allow AI crawlers. Total time: 3 hours.
- Day 3: Do keyword research. Find 20 "best [category]" keywords in your niche using Ahrefs. Prioritize by search volume and competition. Total time: 2 hours.
- Day 4: Write your first AI-optimized listicle using the prompt from B.3. Your brand #1, 10 items total, 2,000+ words, FAQ section, comparison table. Total time: 3 hours.
- Day 5: Add schema markup, optimize images, run through the pre-publish checklist (B.8). Publish. Submit to Search Console for indexing. Total time: 2 hours.
- Day 6: Create 5 Reddit accounts. Start the warm-up process — join subreddits, upvote content, lurk. Total time: 1 hour.
- Day 7: Set up Trackings.ai to monitor your brand and 3 competitors. Set up automated alerts. Review your week. Total time: 1 hour.

(different keywords from your list). Total time: 5 hours.

- Day 10: Syndicate all 3 published articles to Medium and LinkedIn. Share on social media. Total time: 2 hours.

- Day 11-12: Set up 10 LLM PBN domains following the SOP from B.1. Install WordPress and configure. Total time: 4 hours.
- Day 13: Generate and publish 50 PBN posts (5 per domain) using ChatGPT. All mentioning your brand. Total time: 4 hours.
- Day 14: Generate and publish remaining 50 PBN posts. Submit all to indexing services. Total time: 4 hours.

WEEK 3: DISTRIBUTION & OUTREACH (Days 15-21)

- Day 15-16: Write a 2,000+ word guest post using the B.1 template. Total time: 4 hours.
- Day 17: Send guest post outreach to 10 target sites. Use templates from B.4 (adapted for guest posts). Total time: 2 hours.
- Day 18-19: Start Reddit commenting. 10 genuine value comments per day across your warmed-up accounts. Include product mentions in 30% of comments. Total time: 2 hours/day.
- Day 20: Check ChatGPT for citations. Test all your target keywords. Document results. Total time: 1 hour.
- Day 21: Follow up on guest post outreach. Negotiate placement for any accepted pitches. Total time: 1 hour.

WEEK 4: OPTIMIZE & SCALE (Days 22-30)

- Day 22-23: Publish guest post (if accepted). Build 5 backlinks to it. Share everywhere. Total time: 3 hours.
- Day 24-25: Analyze what's working. Check Trackingo.ai for

- Day 26-27: Double down on winners. Write 2 more articles targeting keywords where you're getting traction. Total time: 5 hours.

- Day 28-29: Scale Reddit commenting to 20+ per day. Focus on highest-converting subreddits. Total time: 2 hours/day.
- Day 30: Full audit. Document everything — what worked, what didn't, revenue generated, citations earned, rankings achieved. Create your Month 2 plan. Total time: 3 hours.

Total time investment over 30 days: ~60-80 hours (~2-3 hours/day) Total cost: ~$250-500 (tools + domains + hosting) Expected results by Day 30:

- 5+ pieces of AI-optimized content published
- 100 PBN posts indexed
- 1 guest post live
- 200+ Reddit comments placed
- First ChatGPT citations appearing
- First traffic from AI search
- Foundation for $1K-5K/mo in revenue

The Mindset That Makes This Work

I've helped hundreds of people through Advise.so, and the ones who succeed all share three traits:

1. They start before they're ready. Your first piece of content will be bad. Your first cold email will get ignored. Your first Reddit comment might get downvoted. None of that matters. What matters is that you started. Iteration beats perfection every single time.

2. They track everything. The people who fail say things like "I've been doing SEO for 3 months and nothing's working." When

17

you're not measuring it, you can't improve it. Set up Trackings.ai, check it weekly, and make decisions based on data.

3. They don't quit after 2 weeks. SEO is not a get-rich-quick scheme. It's a get-rich-in-90-days scheme if you execute consistently. The people who make $10K/mo didn't do anything

magical — they just showed up every day for 90 days while everyone else gave up.

Where to Go from Here

If you want community and accountability: Join Advise.so. It's my private community of 500+ SEOs, agency owners, and entrepreneurs. Weekly calls, case study breakdowns, and real-time strategy support. This is where I share stuff that doesn't make it into courses.

If you need tools: Use LocalRank.so. I built it specifically for the strategies taught in this course. Citations, LLM citations, rank tracking, Direction Boost, GBP management — it's all in one platform. The Pro plan at $247.50/mo pays for itself with one client.

If you want to follow along daily: Subscribe to my YouTube channel (youtube.com/@indexsy) and follow me on Twitter (@indexsy). I share daily "Build in Public" episodes — 900+ and counting — with real revenue numbers, real experiments, and real results.

One Last Thing

Remember: I started in 2014 with $450 a month. No connections. No capital. No secret formula. Just SEO, consistency, and a willingness to adapt when the game changed.

The game is changing right now. AI search is the biggest shift in SEO since Google launched. The people who adapt today will own the next decade. The people who wait will wonder what happened.

You have the playbook. You have the tools. You have the templates. You have the SOPs. You have the prompts. You have

Go execute.

— Jacky Chou (@indexsy)

P.S. Stop reading and start doing. Seriously. Close this document, open Ahrefs, pick a keyword, and create your first piece of AI-optimized content right now. Your future self will thank you.

P.P.S. When you hit your first $1K month from AI SEO, DM me on Twitter. I retweet every single one. Let's go.
