Summit AZ Local Pages - Batch Plan

Date: 2026-09-03. Based on Summit-AZ-Local-Pages-Phase1-Report-2026-09-03.pdf and SummitAZLocalPagesPriorityList20260903.csv.

Rule: five city pages plus the service hub per batch, ordered by demand (impressions) so the earliest batches touch the most searches. Each batch follows the same steps as sewer batch 1: verify baseline, back up, audit, validate claims, keyword map, briefs, copy, report, approval, publish, track at 14/28/60 days. One batch every two weeks.

Batch	Week	Service	Five pages (impressions, position)	Hub to fix	Why this order
1	Sep 7	Sewer line repair	Phoenix (1,763 @30), Tempe (995 @19), Mesa (863 @28), Chandler (614 @23), San Tan Valley (233 @19)	/sewer-line-repair-and-replacement/ competes with Mesa	Report done; waiting on Scott's confirmations
2	Sep 21	General plumbing (city hubs)	Tempe (14,128 @25, 2 clicks), Queen Creek (1,025 @45), Phoenix (560 @24), Scottsdale (328 @18), Mesa (204 @11, CTR fix)	/plumbing/ and the Chandler page (96% copy of Mesa)	Largest demand on the site by far; these are also the city hubs every other local page links from
3	Oct 5	Tankless water heaters	Tempe (565 @20), Gilbert (509 @28), Chandler (412 @33), Queen Creek (354 @16), Fountain Hills (24 @8)	/water-heaters/ (719 @38)	Second-largest demand; Fountain Hills already on page 1
4	Oct 19	Emergency plumber	Phoenix (765 @27), Mesa (322 @20), Chandler (126 @28), San Tan Valley (74 @44), Apache Junction (not indexed)	/emergency-plumbing-services/ (342 @33)	High-intent calls; fix the not-indexed page inside the batch
5	Nov 2	Drain cleaning	Mesa (hub takes 672 Mesa impressions), Fountain Hills (110 @15), Phoenix (58 @46), Chandler (0), Gilbert (0)	/drain-cleaning/ (2,064 @37) titled as Mesa by OTTO	Biggest hub-versus-city split; three pages not indexed, two near-copies
6	Nov 16	Water softeners	Scottsdale (367 @28), Gilbert (134 @30), Mesa (121 @44), Phoenix (0, 98% copy of Scottsdale), Queen Creek (1, 97% copy of Phoenix)	/water-softeners/ (492 @62)	Real demand plus the worst duplicate cluster
7	Nov 30	Water leak detection	Queen Creek (131 @22), Mesa (119 @27), Fountain Hills (95 @17), Tempe (3 @13, copy of Phoenix), Gilbert (0, copy of STV)	/water-leak-detection/ (150 @42)	Five of ten pages are near-copies; consolidate while rewriting
8	Dec 14	Pipe lining	Tempe (160 @42), Scottsdale (152 @28), Mesa (51 @13), Chandler (34 @59), Phoenix (0)	/pipe-lining/ (100 @39) plus the Mesa trenchless blog	Signature service; Mesa already near page 1
9	Jan 4	Sewer, second half	Gilbert (30 @43), Scottsdale (0), Fountain Hills (0), Apache Junction (0), Queen Creek (not indexed)	Orangeburg Mesa page (315 @48)	Reuses the proven sewer template

Batch	Week	Service	Five pages (impressions, position)	Hub to fix	Why this order
10	Jan 18	Water pressure	Mesa (31 @8, CTR fix), Scottsdale (32 @15), Phoenix (not indexed), Chandler (0), Tempe (0)	/water-pressure-system-services/ (26 @11)	Two pages already near page 1
11	Feb 1	Remaining general plumbing and tankless	General: San Tan Valley (547 @42), Fountain Hills (134 @38), Chandler (rewrite off the Mesa copy), Gilbert (0), Apache Junction (0). Tankless: San Tan Valley (13 @9)		Cleans up the two highest-demand services
12+	Feb onward	Water heaters (tank), fixtures, garbage disposals	Zero impressions across all 30 pages	/water-heaters/, /fixture-installation-services/, /garbage-disposals/	Decide first whether to rewrite or consolidate into the hubs; no demand signal to justify 30 rewrites

Ongoing every batch:

- Not-indexed pages (10 total) get rewritten and re-submitted inside their service batch, never on their own.
- Near-duplicate pairs are rewritten one side at a time; the sister page keeps its content until its own batch.
- Titles over 65 characters (49 pages) are shortened inside each batch, not as a separate task.
- Day 14 / 28 / 60 checks run on the previous batches while the next one is being written.

Rough finish for all 122 pages: end of February 2027 at two weeks per batch. Faster if batches 2 and 3 run in parallel.
