1. **Finish the Tempe page** (guided Elementor session): H1, intro, 6 H2 sections, FAQ + schema, internal links.
2. **Decide on the 6+2 'Areas We Serve' body links**: leave (they 301 fine) or bulk-fix with Better Search Replace after a backup.
3. **Authority building** (Domain Power 10): the long-game ceiling keeping pages on page 3.
4. **Mobile performance**: convert 181 images to WebP, enable compression (optional, later).

Note: traffic and ranking numbers are unchanged because the fixes were made Jul 20-21 and take weeks to reflect in Google. This report tracks work completed against the baseline, not ranking movement yet.
