Summit Plumbing Pros — SEO Baseline

Site: summitplumbingpros.com (AZ East Valley — Tempe, Mesa, Chandler, Phoenix, Fountain Hills, San Tan Valley)
Source: Search Atlas agent Site Audit (crawled ~July 10, 2026) | Live-verified via SSH + WP-CLI: July 11, 2026
Access: SSH summit → public_html, WP-CLI, Yoast SEO. No browser used.

Read this first. The Search Atlas crawl is stale and materially overstated. I re-queried the live database; where the audit and reality disagree, this baseline uses the live numbers and flags the audit as stale. Site scope (live): 155 pages + 10 posts = **165 total** (audit implied ~168).

Headline: Organic traffic is almost entirely branded. Non-branded local terms like "plumber tempe" sit on Page 2 (Position 15). The real on-page gaps are small and specific — not site-wide.

Audit vs. reality (verified 2026-07-11)

Audit claim	Audit said	Live truth	Verdict
Missing meta descriptions	168 pages	8 pages (mostly utility/policy)	Overstated - done
Unoptimized titles (8 named pages)	8 pages	Inconsistent - fixed 7, 1 already OK	Done
Missing custom Yoast title	-	12 pages (Yoast auto-fills fallback)	Real - 6 fixed
Missing H1 headings	9 pages	0 missing; 3 pages had EXTRA H1	Wrong - fixed
Missing image alt text	59+ images	20 in media library (0 in blogs)	Overstated - 15 fixed
Missing LocalBusiness/Service schema	all pages	Already present & comprehensive	False - no action

---

What is actually true (live findings)

Missing meta descriptions — 8 pages (not 168)

ID	Page	Type	Priority
1682	summit-plumbing-locations	Commercial hub	High - fix
1693	plumbing-faqs-for-mesa-homeowners	Content	High - fix
5731	free-tankless-quote-v2	PPC landing	Check index first
5746	free-tankless-quote-v3	PPC landing	Check index first
5814	blog	Archive	Optional
5513	privacy-policy	Policy	Low
5518	terms-of-service	Policy	Low
1569	thank-you-page	Utility	Set noindex

Missing custom Yoast title — 12 pages

Not "broken" — Yoast falls back to `Title | Site Name`. These just lack a hand-optimized title. Do the real service/content pages; skip utility.

ID	Service/content pages worth optimizing (6)
1772	leaking-pipe-repair-in-arizona
1744	old-cracked-and-corroded-pipes
1804	orangeburg-pipe-repair-in-mesa-az

1610	slow-drains
1682	summit-plumbing-locations
1693	plumbing-faqs-for-mesa-homeowners

Landing/utility (skip or low, 6): free-tankless-quote-v2 (5731), free-tankless-quote-v3 (5746), blog (5814), privacy-policy (5513), terms-of-service (5518), thank-you-page (1569).

H1 headings — LIVE-CHECKED (audit wrong again)

Crawled all 165 pages: 157 had exactly 1 H1. The audit "9 missing H1" pages all have a proper H1. Real issue was the opposite — 8 pages with 0 or 2+ H1s.

Page	H1s	Issue	Action
/plumbing/ (17)	3	duplicate title H1 x2 + "Call Us Today!" as H1	Fixed to 1
/water-softeners/ (512)	2	+ "Contact Summit Plumbing Today" as H1	Fixed to 1
/slow-drains/ (1610)	2	+ raw inside a text widget	Fixed to 1
/privacy-policy/, /terms-of-service/	2	boilerplate double-H1	Low - left
tankless-quote v2 / v3	0	PPC landing pages (no H1)	Set noindex (ad-only)
/thank-you-page/	0	now noindexed	Ignore

Image alt text — LIVE-CHECKED (audit overstated)

216 images; audit said "59+ missing." Live truth: 20 missing in the media library, 0 missing in rendered blog posts (Elementor image widgets already carry alt). Fixed the 15 content images; skipped 5 decorative (Contact icons, footer screenshot, staff graphic).

Schema — LIVE-CHECKED (audit wrong — already exists)

Audit claimed LocalBusiness + Service schema were missing. They are present and comprehensive: service pages emit `Plumber` (a LocalBusiness subtype), `Service`, `PostalAddress`, `City`, `State`, `FAQPage`, `BreadcrumbList`; homepage has `Organization` + `WebSite`. No action needed.

Still open

• **Tempe "Quick Win"** — /general-plumbing-services-in-tempe/, "plumber tempe" Position 15; content expansion still valid (a writing task, not a bug).

Fix log — 2026-07-11 (via SSH + WP-CLI)

Titles — DONE (7 pages). Standardized Yoast titles to `[Service] in [City], AZ | Summit Plumbing Pros`. Verified live in rendered title tag.

ID	Page	New title
4775	garbage-disposal-service-chandler	Garbage Disposal Service in Chandler, AZ | Summit Plumbing Pros
4974	garbage-disposal-service-mesa	(already correct - skipped)
5120	garbage-disposal-service-tempe	Garbage Disposal Service in Tempe, AZ | Summit Plumbing Pros
5268	plumbing-fixture-installation-in-fountain-hills	Plumbing Fixture Installation in Fountain Hills, AZ | Summit Plumbing Pros
5448	plumbing-fixture-installation-in-phoenix	Plumbing Fixture Installation in Phoenix, AZ | Summit Plumbing Pros

5172	plumbing-fixture-installation-in-chandler	Plumbing Fixture Installation in Chandler, AZ | Summit Plumbing Pros
4542	water-heater-services-fountain-hills	Water Heater Services in Fountain Hills, AZ | Summit Plumbing Pros
4572	water-heater-services-san-tan-valley	Water Heater Services in San Tan Valley, AZ | Summit Plumbing Pros

Meta on those 8 service pages — NO ACTION (already good). The audit "missing meta" was stale; all 8 already had solid localized descriptions. Not overwritten.

Batch 2 — DONE (real gaps from the live query, verified live):

ID	Page	Added custom title
1772	leaking-pipe-repair-in-arizona	Leaking Pipe Repair in Arizona | Summit Plumbing Pros
1744	old-cracked-and-corroded-pipes	Old, Cracked & Corroded Pipe Repair in AZ | Summit Plumbing Pros
1804	orangeburg-pipe-repair-in-mesa-az	Orangeburg Pipe Repair in Mesa, AZ | Summit Plumbing Pros
1610	slow-drains	Slow Drain Repair in Mesa & Gilbert, AZ | Summit Plumbing Pros
1682	summit-plumbing-locations	East Valley Plumbing Service Areas, AZ | Summit Plumbing Pros
1693	plumbing-faqs-for-mesa-homeowners	Plumbing FAQs for Mesa, AZ Homeowners | Summit Plumbing Pros

• **Meta descriptions** (153 chars each) written for 1682 (locations) and 1693 (Mesa FAQs).
• **1569 thank-you-page** set to `noindex, follow`.

H1 cleanup — DONE (3 pages). Demoted extra/duplicate H1s to H2 on /plumbing/ (17), /water-softeners/ (512), /slow-drains/ (1610) so each has exactly one H1 (the real title). Via Elementor document save() API; backups on server at ~/elementor_h1_backup_20260711/. Verified live: 1 H1 each.

Alt text — DONE (15 images). Added descriptive brand-aligned alt to the 15 content/blog images missing it (media-library gap 20 to 5; the 5 left are decorative, skipped). Rendered blog posts had 0 missing alt.

Schema — NO ACTION (already comprehensive). Service pages already output Plumber (LocalBusiness) + Service + address/geo + FAQPage + BreadcrumbList; homepage has Organization + WebSite.

Tankless PPC LPs — DONE. Set /free-tankless-quote-v2/ (5731) + v3/ (5746) to noindex, follow (ad-only pages, kept out of organic to avoid competing with real service pages). Verified live.

Footguns (confirmed): (1) Yoast — pages with a pre-existing title updated from `wp post meta update` alone; new titles needed `wp post update <id>` to rebuild the indexable. (2) Elementor — `Document::save()` silently no-ops under WP-CLI unless you `wp_set_current_user(<admin>)` first.

Do next (remaining)

1. Meta for summit-plumbing-locations (1682) + plumbing-faqs (1693). — **DONE**
2. Titles on the 6 service/content pages (1772, 1744, 1804, 1610, 1682, 1693). — **DONE**
3. Set /thank-you-page/ (1569) to noindex. — **DONE**
4. Verify H1 live + fix real issues (3 pages). — **DONE**
5. Verify alt-text + schema live; fix real gaps. — **DONE** (15 alt fixed; schema already good)
6. Tankless PPC LPs (5731/5746): set noindex (ad-only). — **DONE**
7. Tempe content expansion (/general-plumbing-services-in-tempe/) — the one remaining content task.

Every technical audit item is now closed. Only remaining work = the Tempe content expansion (a writing task).
